CBIP is the complete reference and buying guide to English-language Canadian books currently in print; consequently, the Author and Title Index, Subject Index and microfiche editions are indispensable to the book profession. With submissions from both small and large publishers, CBIP provides access to titles not listed anywhere else. Containing more than 48,000 titles, of which approximately 4,000 have a 2001 imprint, the Author and Title Index is extensively cross-referenced. The Subject Index lists the titles under 800 different subject categories. Both books offer the most complete directory of Canadian publishers available, listing the names and ISBN prefixes, as well as the street, e-mail and web addresses of more than 4,850 houses. The quarterly microfiche service provides updated information in April, July and October. CBIP is constantly referred to by order librarians, booksellers, researchers, and all those involved in book acquisition. In addition, CBIP is an invaluable record of the vast wealth of publishing and writing activity in the scientific, literary, academic and arts communities across Canada. A quarterly subscription service including the annual Author and Title Index (March 2001) plus quarterly microfiche updates (April, July, and October 2001) is also available. ISBN 0802049567 \$220.00 NET.

MATHEMATICS**APPLYING THE CONCEPTS 9. TEACHER'S RESOURCE SUPPLEMENT****MCGRAW-HILL EDUCATION MATH GRADE 7, SECOND EDITION**

McGraw-Hill Education All the Math Your 7th Grader Needs to Succeed This book will help your elementary school student develop the math skills needed to succeed in the classroom and on standardized tests. The user-friendly, full-color pages are filled to the brim with engaging activities for maximum educational value. The book includes easy-to-follow instructions, helpful examples, and tons of practice problems to help students master each concept, sharpen their problem-solving skills, and build confidence. Features include: • A guide that outlines national standards for Grade 7 • Concise lessons combined with lot of practice that promote better scores—in class and on achievement tests • A pretest to help identify areas where students need more work • End-of-chapter tests to measure students' progress • A helpful glossary of key terms used in the book • More than 1,000 math problems with answers Topics covered: • Mathematical operations and number properties • Negative numbers and absolute value • Solving problems with rational numbers • Ratios and proportions • Percent and percent change • Graphing relationships and unit rates • Roots and exponents • Scientific notation • Solving equations and inequalities • Customary and metric units of measure, including conversions • Data presentation • Statistics and probability • Constructing and analyzing geometric figures • Solving problems involving angle measure, area, surface area, and volume

READING FOR EVIDENCE AND INTERPRETING VISUALIZATIONS IN MATHEMATICS AND SCIENCE EDUCATION

Springer Science & Business Media CRYSTAL—Alberta was established to research ways to improve students' understanding and reasoning in science and mathematics. To accomplish this goal, faculty members in Education, Science, and Engineering, as well as school teachers joined forces to produce a resource bank of innovative and tested instructional materials that are transforming teaching in the K-12 classroom. Many of the instructional materials cross traditional disciplinary boundaries and explore contemporary topics such as global climate change and the spread of the West Nile virus. Combined with an emphasis on the use of visualizations, the instructional materials improve students' engagement with science and mathematics. Participation in the CRYSTAL—Alberta project has changed the way I think about the connection between what I do as a researcher and what I do as a teacher: I have learned how to better translate scientific knowledge into language and activities appropriate for students, thereby transforming my own teaching. I also have learned to make better connections between what students are learning and what is happening in their lives and the world, thereby increasing students' interest in the subject and enriching their learning experience.
