Evidence from the language pairs French-German, Italian-Swedish, Spanish-English, Spanish-German, Spanish-Basque, Portuguese-Japanese-English, Portuguese-German, English-German, Turkish-German is brought to bear on grammatical issues pertaining to the morphology and syntax of the noun phrase, pronoun use and the null-subject property, clause structure, verb position, non-finite clauses, agreement at the clause level, and on issues like code mixing and language dominance.

Reading, Writing, and Rigor

Helping Students Achieve Greater Depth of Knowledge in Literacy

*ASCD What does rigor, a word that frequently pops up in conversations about education, really mean? More specifically, what does it mean for literacy instruction, and how does it relate to challenging standards-based assessments? In this informative and practical guide, literacy expert Nancy Boyles uses the framework from Webb's *Depth of Knowledge (DOK)* to answer these questions, offering experience-based advice along with specific examples of K-8 assessment items. Boyles defines rigor and shows how it relates to literacy at each DOK level and explains the kind of thinking students will be expected to demonstrate. She then tackles the essence of what teachers need to know about how DOK and its associated rigors are measured on standards-based assessments. Specifically, readers learn how each DOK rigor aligns with • standards, • text complexity, • close reading, • student interaction, • the reading-writing connection, and • formative assessment. Teachers, coaches, and administrators will find clear guidance, easy-to-implement strategies, dozens of useful teaching tools and resources, and encouragement to help students achieve and demonstrate true rigor in reading and writing.*

Occupational Outlook Handbook

Visible Learning

A Synthesis of Over 800 Meta-Analyses Relating to Achievement

Routledge This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers – an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.
