### **A SMITTEN NOVELLA**

---

*Thomas Nelson* Fall, winter, spring, and summer, Smitten is a place for love . . . and mystery. But will professional cupid Zoe finally meet her match? There's a secret in Grandma Rose's attic—a forgotten set of dog tags belonging to her first love. But David Hutchins was killed in action and never returned to town. How did the dog tags end up in the Grandma's attic? It's a romantic mystery fit for a town like Smitten, Vermont, which has been working hard to reinvent itself as a destination for lovers. Rose's three granddaughters are determined to investigate, though their mother Anna has reservations about digging up the past. But will they get distracted by mystery men of their own before they solve the puzzle of the dogtags? In *Make Me a Match*, Zoe sinks every dollar she has into a matchmaking service, but the good-looking new city manager seems determined to shut her business down. Is he an obstacle to her success . . . or a divine gift for her own lonely heart? Excerpted from *Secretly Smitten*, a novel in four parts written by Inspirational fiction's most popular romance novelists—and real life BFFs!

## **PARENTING MATTERS**

---

## **SUPPORTING PARENTS OF CHILDREN AGES 0-8**

---

*National Academies Press* Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in

funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

## **PATHWAYS TO HEALTH EQUITY**

---

*National Academies Press* In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways.

Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

## **TAKE THE RISK**

---

### **LEARNING TO IDENTIFY, CHOOSE, AND LIVE WITH ACCEPTABLE RISK**

---

Zondervan No risk, pay the cost. Know risk, reap the rewards. In our risk-avoidance culture, we place a high premium on safety. We insure our vacations. We check crash tests on cars. We extend the warranties on our appliances. But by insulating ourselves from the unknown—the risks of life—we miss the great adventure of living our lives to their full potential. Ben Carson spent his childhood as an at-risk child on the streets of Detroit, and today he takes daily risks in performing complex surgeries on the brain and the spinal cord. Now, offering inspiring personal examples, Dr. Carson invites us to embrace risk in our own lives. From a man whose life dramatically portrays the connection between great risks and greater successes, here are insights that will help you dispel your fear of risk so you can dream big, aim high, move with confidence, and reap rewards you've never imagined. By avoiding risk, are you also avoiding the full potential of your life? The surgery was as risky as anything Dr. Ben Carson had seen. The Bijani sisters—conjoined twins—shared part of a skull, brain tissue, and crucial blood flow. One or both of them could die during the operation. But the women wanted

separate lives. And they were willing to accept the risk to reach the goal, even against the advice of their doctors ... As a child on the dangerous streets of Detroit, and as a surgeon in operating theaters around the world, Dr. Ben Carson has learned all about risk—he faces it on a daily basis. Out of his perilous childhood, a world-class surgeon emerged precisely because of the risks Dr. Carson was willing to take. In his compelling new book, he examines our safety-at-all-costs culture and the meaning of risk and security in our lives. In our 21st-century world, we insulate ourselves with safety. We insure everything from vacations to cell phones. We go on low-cholesterol diets and buy low-risk mutual funds. But in the end, everyone faces risk, like the Bijani twins did with their brave decision. Even if our choices are not so dramatic or the outcome so heartbreaking, what does it mean if we back away instead of move forward? Have we so muffled our hearts and minds that we fail to reach for all that life can offer us—and all that we can offer life? Take the Risk guides the reader through an examination of risk, including:

- A short review of risk-taking in history.
- An assessment of the real costs and rewards of risk.
- Learning how to assess and accept risks.
- Understanding how risk reveals the purpose of your lives.

## **GIFTED HANDS**

---

*Zondervan* In 1987, Dr. Benjamin Carson gained worldwide recognition for his part in the first successful separation of Siamese twins joined at the back of the head. The extremely complex and delicate operation, five months in the planning and twenty-two hours in the execution, involved a surgical plan that Carson helped initiate. Carson pioneered again in a rare procedure known as hemispherectomy, giving children without hope a second chance at life through a daring operation in which he literally removed one half of their brain. But such breakthroughs aren't unusual for Ben Carson. He's been beating the odds since he was a child. Raised in inner-city Detroit by a mother with a third grade education, Ben lacked motivation. He had terrible grades. And a pathological temper threatened to put him in jail. But Sonya Carson convinced her son that he could make something of his life, even though everything around him said otherwise. Trust in God, a relentless belief in his own capabilities, and sheer determination catapulted Ben from failing grades to the top of his class --- and beyond to a Yale scholarship . . . the University of Michigan Medical School . . . and finally, at age 33, the directorship of pediatric neurosurgery at Johns Hopkins Hospital in Baltimore, Maryland. Today, Dr. Ben Carson holds

twenty honorary doctorates and is the possessor of a long string of honors and awards, including the Horatio Alger Award, induction into the 'Great Blacks in Wax' Museum in Baltimore, Maryland, and an invitation as Keynote Speaker at the 1997 President's National Prayer Breakfast. Gifted Hands is the riveting story of one man's secret for success, tested against daunting odds and driven by an incredible mindset that dares to take risks. This inspiring autobiography takes you into the operating room to witness surgeries that made headlines around the world --- and into the private mind of a compassionate, God-fearing physician who lives to help others. Through it all shines a humility, quick wit, and down-to-earth style that make this book one you won't easily forget.

## **STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES**

---

### **A PATH FORWARD**

---

*National Academies Press* Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

---

In these highly competitive times and with so many technological advancements, it is impossible for any industry to remain isolated and untouched by innovations. In this era of digital economy, the banking sector cannot exist and operate without the various digital tools offered by the ever new innovations happening in the field of Artificial Intelligence (AI) and its sub-set technologies. New technologies have enabled incredible progression in the finance industry. Artificial Intelligence (AI) and Machine Learning (ML) have provided the investors and customers with more innovative tools, new types of financial products and a new potential for growth. According to Cathy Bessant (the Chief Operations and Technology Officer, Bank of America), AI is not just a technology discussion. It is also a discussion about data and how it is used and protected. She says, "In a world focused on using AI in new ways, we're focused on using it wisely and responsibly."

*Horizon Books ( A Division of Ignited Minds Edutech P Ltd)* A corporate speculator embraces a monetary assessment while choosing whether to put resources into substantial resources or different business. The speculator needs to guarantee that it pays close to a reasonable incentive to buy the venture and that the monetary benefit for its proprietors is augmented. The part talks about monetary assessment with regards to venture choices with an emphasis on speculation valuation and organizing and assessment procedures. Capital gave to an organization, and any value produced inside, should just be put resources into resources if esteem is made for investors—that is, the point at which the estimation of financial advantages emerging from the advantages surpasses the cost of procuring those advantages.
