## Energy Transfer Processes in Polynuclear Lanthanide Complexes

Springer This book describes the luminescence mechanism of polynuclear lanthanide complexes, focusing on energy transfer processes using a combination of experimental and theoretical approaches. Lanthanide complexes show intense luminescence from the lanthanide ion through sensitization by the organic ligands. The high chromaticity of the emission and the long lifetimes of the complexes are particularly attractive for applications such as organic light-emitting diodes and bioprobes. Polynuclear lanthanide complexes (coordination polymers and clusters) have attracted considerable interest for functionalization by energy transfer between lanthanide ions. At the same time, such extra processes complicate the luminescence mechanism, hindering the rational design of functional polynuclear lanthanide complexes. Firstly, the book explains the principle of the theoretical methods, and then describes the concentration-quenching mechanism in coordination polymers. It also examines the effect of intrinsic spin-orbit coupling arising from lanthanide ions on the ligand-to-lanthanide energy transfer efficiency and the mechanism of back energy transfer (the opposite of sensitizing energy transfer) in lanthanide clusters. This sets the stage for the final topic: the suppression of back energy transfer by energy transfer between lanthanide ions in lanthanide clusters, which is of critical importance, showing that the lanthanide clusters can be considered a new generation of functional and efficient luminescent material and could also provide a breakthrough in lanthanide photophysics.

## Fire Drake

Games Workshop The Salamanders attempt a daring rescue mission deep in Dark Eldar territory in order to reveal more secrets held within the Tome of Fire. When Chaplain Elysus of the Salamanders is taken captive by Dark Eldar, he faces a fight for survival at the hands of these cruel aliens. The Firedrakes of 1st Company attempt a daring rescue mission, but much more is at stake than the Chaplain's life. He holds the key to secrets buried beneath Mount Deathfire, secrets that could reveal the damnation - or salvation - of their home world.

## The Chemistry of Contrast Agents in Medical Magnetic Resonance Imaging

John Wiley & Sons Magnetic Resonance Imaging (MRI) is one of the most important tools in clinical diagnostics and biomedical research. The number of MRI scanners operating around the world is estimated to be approximately 20,000, and the development of contrast agents, currently used in about a third of the 50 million clinical MRI examinations performed every year, has largely contributed to this significant achievement. This completely revised and extended second edition: Includes new chapters on targeted, responsive, PARACEST and nanoparticle MRI contrast agents. Covers the basic chemistries, MR physics and the most important techniques used by chemists in the characterization of MRI agents from every angle from synthesis to safety considerations. Is written for all of those involved in the development and application of contrast agents in MRI. Presented in colour, it provides readers with true representation and easy interpretation of the images. A word from the Authors: Twelve years after the first edition published, we are convinced that the chemistry of MRI agents has a bright future. By assembling all important information on the design principles and functioning of magnetic resonance imaging probes, this book intends to be a useful tool for both experts and newcomers in the field. We hope that it helps inspire further work in order to create more efficient and specific imaging probes that will allow materializing the dream of

seeing even deeper and better inside the living organisms. Reviews of the First Edition: "...attempts, for the first time, to review the whole spectrum of involved chemical disciplines in this technique..."—Journal of the American Chemical Society  
"...well balanced in its scope and attention to detail...a valuable addition to the library of MR scientists..."—NMR in Biomedicine

## Toilet Kid

Univ. of Queensland Press Hungry? Need lunch? Want the perfect food to impress your girlfriend? Then you need to see Matt, because Matt has an amazing talent. It's called ... Tuckshop.Matt a.k.a. 'The Tuckshop Kid' is back! And he's smaller than ever! He's lost weight, is sort-of enjoying exercise and is going out with the perfect girl, Kayla, who loves food as much as he does. He can hardly believe his luck. But when Matt uncovers Kayla's secret, he realises that no one is perfect and sometimes problems can take on a life of their own. From the author of the award-winning book The Tuckshop Kid comes the companion adventure about food, friendship and finding your way.

## Spanish, Grade 3

Carson-Dellosa Publishing Brighter Child(R) Spanish for Grade 3 helps students master beginning foreign language skills. Practice is included for learning action words, greetings, food words, and more. School success starts here! Workbooks in the popular Brighter Child(R) series are packed with plenty of fun activities that teach a variety of essential school skills. Students will find help for math, English and grammar, handwriting, and other important subject areas. Each book contains full-color practice pages, easy-to-follow instructions, and an answer key.

## Annual Energy Outlook 2012

### With Projections to 2035

Government Printing Office "The projections in the U.S. Energy Information Administration's (EIA's) Annual Energy Outlook 2012 (AEO2012) focus on the factors that shape the U.S. energy system over the long term. Under the assumption that current laws and regulations remain unchanged throughout the projections, the AEO2012 Reference case provides the basis for examination and discussion of energy production, consumption, technology, and market trends and the direction they may take in the future. It also serves as a starting point for analysis of potential changes in energy policies. But AEO2012 is not limited to the Reference case. It also includes 29 alternative cases (see Appendix E, Table E1), which explore important areas of uncertainty for markets, technologies, and policies in the U.S. energy economy. Many of the implications of the alternative cases are discussed in the 'Issues in focus' section of this report. / Key results highlighted in AEO2012 include continued modest growth in demand for energy over the next 25 years and increased domestic crude oil and natural gas production, largely driven by rising production from tight oil and shale resources. As a result, U.S. reliance on imported oil is reduced; domestic production of natural gas exceeds consumption, allowing for net exports; a growing share of U.S. electric power generation is met with natural gas and renewables; and energy-related carbon dioxide emissions remain below their 2005 level from 2010 to 2035, even in the absence of new Federal policies designed to mitigate greenhouse gas (GHG) emissions."--Executive Summary (p. 2).

## The Book of L

Springer Science & Business Media This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

## Last Train to Brisbane

Combining hauntingly beautiful photographs with classic Australian bush poetry, Last Train to Brisbane takes a nostalgic romp through Brisbane's scenic rim in search of what remains from our railway past. From Gympie through the Mary and Brisbane Valleys, and onto the Southern Downs city of Warwick, poet and Award-Nominated author Phillip Overton takes his lifelong love of the rails on the road. The result is this tribute to the small country towns where it was once possible to catch a train to Brisbane.

## Tiny Crimes

## Very Short Tales of Mystery and Murder

Catapult Forty very short stories that reimagine the genre of crime writing from some of today's most imaginative and thrilling writers "An intriguing take on crime/noir writing, this collection of 40 very short stories by leading and emerging literary voices—Amelia Gray, Brian Evenson, Elizabeth Hand, Carmen Maria Machado, Benjamin Percy, Laura van den Berg and more—investigates crimes both real and imagined. Despite their diminutive size, these tales promise to pack a punch." —Chicago Tribune, 1 of 25 Hot Books for Summer Tiny Crimes gathers leading and emerging literary voices to tell tales of villainy and intrigue in only a few hundred words. From the most hard-boiled of noirs to the coziest of mysteries, with diminutive double crosses, miniature murders, and crimes both real and imagined, Tiny Crimes rounds up all the usual suspects, and some unusual suspects, too. With illustrations by Wesley Allsbrook and flash fiction by Carmen Maria Machado, Benjamin Percy, Amelia Gray, Adam Sternbergh, Yuri Herrera, Julia Elliott, Elizabeth Hand, Brian Evenson, Charles Yu, Laura van den Berg, and more, Tiny Crimes scours the underbelly of modern life to expose the criminal, the illegal, and the deprived.

## Burn Your Portfolio

## Stuff they don't teach you in design school, but should

New Riders It takes more than just a design school education and a killer portfolio to succeed in a creative career. Burn Your Portfolio teaches the real-world practices, professional do's and don'ts, and unwritten rules of business that most designers, photographers, web designers, copy writers, programmers, and architects only learn after putting in years of experience on the job. Michael Janda, owner of the Utah-based design firm Riser, uses humor to dispense nugget after nugget of hard-won advice collected over the last decade from the personal successes and failures he has faced running his own agency. In this surprisingly funny, but incredibly practical advice guide, Janda's advice on teamwork and collaboration, relationship building, managing clients, bidding work, production processes, and more will resonate with creative professionals of all stripes.

# Katie's Cabbage

Univ of South Carolina Press Katie's Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South Carolina, grew a forty-pound cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie's Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie's Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie's Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Patricia

Moore-Pastides, First Lady of the University of South Carolina and author of Greek Revival from the Garden: Growing and Cooking for Life, offers a foreword about her friendship with Katie and her admiration of Katie's dream to end hunger one garden at a time.

## Tariff Question in the Gilded Age

### The Great Debate Of 1888

Penn State Press Protective tariffs were part of American life long before the era of NAFTA and GATT. In the late nineteenth century, the "tariff question" was one of the most controversial issues of the day. As Joanne Reitano shows in this far-reaching study, the ensuing debate was anything but an empty exercise in political rhetoric occupying only politicians and lobbyists. The tariff was of central concern to a broad cross section of people because of its perceived relationship to immediate economic problems, such as wages, prices, and trusts. In fact, it became a means for many Americans to wrestle with the implications of the country's rapid growth and the impact of industrial capitalism on American life. Reitano focuses on the election year of 1888, when the tariff was adopted as a cause célèbre by President Grover Cleveland, Congress, the two major parties, and the press. At the heart of the debate was the Mills Bill for tariff reduction. Although the bill failed to pass, Reitano finds in the rancorous public debate a barometer of changes in the American mind in the Gilded Age. She carefully blends intellectual, political, economic, and social issues through analyses of the Congressional Record, press coverage of the debate, academic and polemical literature, political cartoons, and the presidential campaign. Ultimately, Reitano contends that ideas about political economy have always been central to the American mind. They were so in the Gilded Age as they are today.

## Healthy House Building

### A Design & Construction Guide

Australian Geographic

### Storm Water Management for Construction Activities

### Developing Pollution Prevention

# Plans and the Best Management Practices

CRC Press This guide shows you how to develop and implement a Storm Water Pollution Prevention Plan specifically designed for your construction site. It should answer any questions you have regarding the NPDES General Permit for Storm Water Discharges from Construction Activities that are classified as "Associated with Industrial Activity" (referred to as EPA's Baseline Construction General Permit). Step-by-step guidelines and checklists walk you through the process of setting up your plan, which makes the book invaluable for consultants, regulators, and construction managers and engineers.

## Hockey ABC

Now the youngest fans can learn their ABC's with Canada's favourite game! Two teams of Canadian animals, the Woodland Wapitis and the Forest Flyers, face off in an action-packed ABC hockey game. You'll be cheering for your favourite players as they illustrate the alphabet and the game, from A is for Arena to Z is for Zamboni machine! Find more fun ways to learn by identifying the odd versus even jersey numbers. This oversize board book is perfect for little learners -- and hockey fans of all ages!

## Practical Jinn Magick

# Rituals to Unleash the Powers of the Fire Spirits

Independently Published Jinn Magick is simple to execute, and the results can be some of the best you will find in all occultism. Much has been written about The Fire Spirits, known as the Jinn (or Djinn), but books of practical Jinn Magick are rare. Hardly any exist, and those that do are often a disappointment. This book reveals a practical method for calling on the Jinn and receiving a response. There are forty-two rituals, and the magick can help with influence and passion or destruction and transformation. The rituals deal with reputation and the souring of love. Some rituals affect competition, uncover flaws, weaken others, improve your discipline or make somebody else burn out. Where you feel stuck, you can find release, and there are ways to create more abundance or make somebody else lose what they have. Rituals can create obsessive thoughts in others and make people see the best in you or the worst in another. They can help you seduce or cause somebody to be sexually disgusted by another person. Financial magick works to increase what you have and can make people appreciate your work or make others lose what money they have. There's great potential if you use your imagination. The magick can be subtle

and delicate or life-changing and devastating, according to your wish. Most of the rituals can be modified and are directed at clear, practical results. The Jinn are neither angels or demons, but fire spirits, and they execute your magickal wishes with immense power. The magick may only work half the time, but when it does, it works with alarming intensity. The book is expensive, but that's because there's decades of research in here and these secrets should not be given to those who don't value them. Pay a fair price, do the work well, and you will get what you want.
