LOOKING AT JEWELRY

A GUIDE TO TERMS, STYLES, AND TECHNIQUES

Getty Publications *What is a cabochon? What are the various types of gilding? What is vermeil? This accessible book—the first of its kind—offers concise explanations of key jewelry terms. The fascination with personal adornment is universal. It is a preoccupation that is primal, instinctive, and uniquely human. Jewelry encompasses a seemingly endless number of ornaments produced across time and in all cultures. The range of materials and techniques used in its construction is extraordinary, even revolutionary, with new substances and methods of fabrication added with every generation. In any given society, master artisans have devoted their time, energy, and talent to the fine art of jewelry making, creating some of the most spectacular objects known to humankind. This volume, geared toward jewelry makers, scholars, scientists, students, and fashionistas alike, begins with a lively introduction that offers a cultural history of jewelry and its production. The main text provides information on the most common, iconic, and culturally significant forms of jewelry and also covers materials, techniques, and manufacturing processes. Containing more than eighty color illustrations, this guide will be invaluable to all those wishing to increase their understanding and enjoyment of the art of jewelry.*

2,530 ENTRIES, INCLUDING DEFINITIONS OF JEWELS, GEMSTONES, MATERIALS, PROCESSES, AND STYLES, AND ENTRIES ON PRINCIPAL DESIGNERS AND MAKERS, FROM ANTIQUITY TO THE PRESENT DAY

ART NOUVEAU JEWELRY

Thames & Hudson *Jewelry was one of the purest and most successful expressions of the Art Nouveau movement. Fresh designs and motifs created intense excitement as organic forms surged with new life, and the female form struggled towards freedom, suggesting a long-hidden eroticism. The artists and goldsmiths who created this jewelry were trained in the nineteenth-century disciplines; their technical mastery allowed them to experiment with new materials and enameling processes to indulge their fantasies. This combination - an atmosphere of ideas for a new art and the unrivaled technical skill of the makers - produced some of the most evocative jewelry of modern times. The book deals with major makers in France, and follows the parallel modern movement that spread through Europe and the United States, acquiring different decorative characteristics, from Great Britain, Germany and Austria, to Belgium, Scandinavia and Eastern Europe. Comprehensive biographies of over 300 designers are included, as well as a Guide to Identification, with over 200 makers' marks and signatures.*

THE CLOISTERS

STUDIES IN HONOR OF THE FIFTIETH ANNIVERSARY

Metropolitan Museum of Art In 1988, the Cloisters celebrated its 50th anniversary as the branch museum of the Metropolitan Museum of Art devoted to the art and architecture of medieval Europe. This commemorative volume contains revised papers presented at a commemorative international symposium, held October 1988 at the Metropolitan Museum of Art, with additional contributions by members of the Museum's staff. The papers address a broad range of topics, including the study of medieval art, the history of the Cloisters, and new research on specific works of art in the collection. With 450 illustrations, eight in color. Annotation copyrighted by Book News, Inc., Portland, OR

SURVEY OF HISTORIC COSTUME

A&C Black In the Preface of the 5th Edition of Survey of Historic Costume, Tortora and Eubank conclude with the following: "In the history of dress at the beginning of the 21st century, costume might be compared to a constantly moving river. This river divides into many narrower channels that separate, cross, come together, and separate again, and yet that river continually moves on." Building on the previous editions, the authors update their analysis of Western dress to 2008. Survey of Historic Costume has, from its beginnings, taken seriously the need to accompany the text with appropriate illustrations and the major change in the 5th Edition is the move to full color throughout the book to enrich the text and the concepts. Perfect for anyone interested in historic costume, fashion, textiles, drama, and design, this beautifully illustrated book is full of interesting facts and commentary. New to this Edition:-- Over 500 four-color photographs and illustrations-- Updated text to 2008-- Additional influences from one period or civilization to another, including influences from other cultures-- Index - updated and organized to be utilized as glossary with terms defined and page numbers printed in boldface-- Instructor's Guide provides sources for visuals, websites, teaching strategies and evaluation techniques-- PowerPoint® Presentation contains interactive visual presentation with links to Internet

EISLER'S ENCYCLOPEDIA OF ENVIRONMENTALLY HAZARDOUS PRIORITY CHEMICALS

Elsevier Thousands of inorganic and organic chemicals and their metabolites enter the biosphere daily as a direct result of human activities. Many of these chemicals have serious consequences on sensitive species of natural resources, crops, livestock, and public health. The most hazardous of these were identified by a panel of environmental specialists from the U.S. Fish and Wildlife Service; these chemicals are the focus of this encyclopedia. For each priority group of chemicals, information is presented on sources, uses, physical and chemical properties, tissue concentrations in field collections and their significance, lethal and sublethal effects under controlled conditions. This includes effects on survival, growth, reproduction, metabolism, carcinogenicity, teratogenicity, and mutagenicity - and proposed regulatory criteria for the protection of sensitive natural resources, crops, livestock, and human health. Taxonomic groups of natural resources covered include terrestrial and aquatic plants and invertebrates, fishes, amphibians, reptiles, birds, and mammals. * The only product that centers on the most hazardous environmental chemicals to sensitive natural resources * The only single volume compendium on the subject, allowing ease in consulting * Written by a noted national and international authority on chemical risk assessment to living organisms

BIOGEOCHEMICAL, HEALTH, AND ECOTOXICOLOGICAL PERSPECTIVES ON GOLD AND GOLD MINING

CRC Press Despite the esteemed nature of gold in society, evidence of adverse ecotoxicological effects and risk to human health in various mining and extraction techniques has generated increasing interest in the biological and environmental implications of gold. Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining is the first comprehensive book to evaluate the effect of gold production and use on human health as well as the environmental impact of gold mining and extraction. Dr. Ronald Eisler, a well-known senior research biologist and expert in the chemical and biological effects of various compounds on wildlife, provides a thorough risk assessment of gold, including its geology and sources and physical, chemical, and metabolic properties. The author documents gold concentrations and field collections of abiotic materials and biota and presents research on the lethal and sublethal effects of gold on plants and animals. Supported by case histories, the book examines health risks in gold miners, human sensitivity to jewelry and dental implants, and medicinal uses. It uses examples in several countries to thoroughly explore the environmental effects of gold extraction, including tailings disposal, acid mine drainage, cyanide, arsenic, and mercury contamination, water management issues, and abandoned mines. Unlike traditional risk assessments, the author also takes into account social, political, economic, medicinal, and psychological variables for a more complete perspective on gold's impact on health and the environment. Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining concludes with a discussion on mining legislation, safety, and procedures.

ENGLISH MEDIEVAL INDUSTRIES

CRAFTSMEN, TECHNIQUES, PRODUCTS

A&C Black *English Medieval Industries* is an authoritative modern survey of medieval crafts and their products. It is heavily illustrated by pictures of surviving objects and contemporary representations of medieval work. Each industry is approached by material (amongst others stone, tin, lead, copper, iron, brick, glass, leather, bone and wood), discussing its acquisition, working and sale as a finished product. The contributors are the leading experts in their fields. They describe the specialist work that went to make the housing, clothing, tools, vessels and ornaments of medieval people. A general bibliography provides a valuable reference tool.
