The Healthy Pet Manual

A Guide to the Prevention and Treatment of Cancer

Simon and Schuster Examines the environmental, dietary, and lifestyle-related causes of cancer in pets and how to safeguard their well-being • Cancer is the number one killer of most domestic animals • Includes health care information on dogs, cats, ferrets, rabbits, and guinea pigs • The first consumer-oriented book to assess conventional and alternative treatment options Keeping their pets healthy and happy is the number one priority of pet owners. Having lost four animal companions to cancer, author Deborah Straw became frustrated by the lack of information about what was causing the disease and wanted to know what she could do to treat and prevent it. This thorough and comprehensive guide is the result of her search for answers. It provides readers with the knowledge of how to ward off the unforeseen causes of cancer and protect the safety and health of their pets. Cancer is the number one killer of most domestic animals. This revised and expanded edition of *Why Is Cancer Killing Our Pets?* includes the most up-to-date information on the environmental, dietary, and vaccine-related culprits that may cause cancer in pets and the preventive measures that can be taken against this disease. Readers whose pets have been diagnosed with cancer will benefit from the full spectrum of both conventional and alternative treatments presented in this book--from chemotherapy and laser surgery to herbal therapy, acupuncture, and touch therapy. In addition, readers will find guidance about caring for a sick pet and grieving his or her loss should the pet die. Full of information, options, and support, this is an essential resource for protecting pets.

Understanding Lipid Metabolism with Microarrays and Other Omic Approaches

CRC Press Reviewing current studies and previously unpublished research from leading laboratories around the world, *Unraveling Lipid Metabolism with Microarrays* demonstrates the use of microarrays and transcriptomic approaches to clarify the biological function of lipids. With contributions from world-class researchers, the book focuses on the use of microar

A Field Guide for Setting the Stage

Delivering the Plan Using the Learner's Brain Model

Rowman & Littlefield This book addresses the nature of the learner and how to plan and deliver instruction for long term learning.

Practical Guide to Industrial Safety

Methods for Process Safety Professionals

CRC Press A practical guide to industrial safety. It seeks to assist specialists in managing operations in industrial settings, including high-risk personal exposure such as inhalation hazards and direct chemical contact. It covers hazards in the chemical process industries, inhalation hazards in refineries, indoor air quality management, personal protective equipment, process safety emergency preparedness, safety in the laboratory, and more. There are Web site listings, NFPA hazard ratings, and other sources of information.

Freedom Programme for Men

A Manual for Facilitators

Freedom Publishing (CA) I have produced this manual in response to requests from hundreds of practitioners who have asked for a different approach to working with men who use violence against women. I am Pat Craven a former probation officer who ran perpetrator programmes for Merseyside Probation Service in the UK between 1996 and 1998. I concluded that the programmes could have been much more successful if they were run in a different style and by a different agency which was not subjected to the same constraints as a statutory body. This manual provides detailed instructions which are simple and easy to follow. This programme is aimed at men who have volunteered to attend and many of whom have never come to the attention of authorities.

Chasing Dragons

Security, Identity, and Illicit Drugs in Canada

University of Toronto Press Chasing Dragons reconsiders the meaning of security. Additionally, it discusses avenues for resisting the insecurity produced by liberal states in the post-9/11 world. This critical approach reveals the pervasiveness of power in contemporary Canadian society, how this power is hidden, and the consequences for progressive social politics. Canada has received significant attention of late for initiating a government-sponsored medical marijuana program and for its flirtation with marijuana decriminalization. At best, these initiatives have contributed to Canada being seen as a reluctant ally by Washington, and, at worst, as a potential threat. The result of this impression is increasing American pressure to adopt more robust domestic security policies. At the same time, the Canadian public sees itself as holding unique values that differ from those held by its neighbour to the south. Supposedly these values are best reflected by a distinctive security outlook which produces reasonable responses to potential threats, a sharp contrast to the manic actions of the United States. Chasing Dragons challenges these presumptions of difference and exposes the security politics and policy that they make possible. Focusing on the issues surrounding illicit drugs, Kyle Grayson examines how discourses and practices of security policy actually contribute to the construction of Canadian national and cultural identity. This analysis is also relevant beyond Canada. Crucially, this book identifies the dangers of underestimating the centrality of race and geopolitics to civic conceptions of nationality in liberal societies. Chasing Dragons reconsiders the meaning of security. Additionally, it discusses avenues for resisting the insecurity produced by liberal states in the post-9/11 world. This critical approach reveals the pervasiveness of power in contemporary Canadian society, how this power is hidden, and the consequences for progressive social politics.

Power Supply Devices and Systems of Relay Protection

CRC Press Power Supply Devices and Systems of Relay Protection brings relay protection and electrical power engineers a single, concentrated source of information on auxiliary power supply systems and devices. The book also tackles specific problems and solutions of relay protection power supply systems and devices, which are often not dealt with in the literature. The author, an experienced engineer with more than 100 patents, draws on his own experience to offer practical, tested advice to readers. A Guide to Relay Protection Power Supply for Engineers and Technicians The first chapter reviews the electronics and primary elements of the system, including transistors, thyristors, optocouplers, logic elements, and relays, and their principles of operation. This background gives staff who service relay protection power supply systems the necessary electronics knowledge to help them work more effectively with the equipment. The next chapters of the book then cover built-in digital protection relay power supplies, battery chargers, accumulator batteries, uninterruptible power supply, and characteristic features of auxiliary DC systems at substations and power plants. The final chapters discuss questions and problems that engineers and technicians may face. These include insulation problems, issues in auxiliary DC power supply such as voltage dips, and electromagnetic disturbances such as blackouts, spikes, and surges. The author also explains how to address them. Suitable for beginners and experienced engineers alike, the book is written for those who work with relay protection systems and with AC and DC auxiliary power systems in power plants and substations. It combines theory and practical recommendations to provide a valuable reference on power supply devices and systems.

American Book Publishing Record

The Journal of Imaging Science and Technology

Handbook of Elastomers, Second Edition,

CRC Press "Provides the latest authoritative research on the developments, technology, and applications of rubbery materials. Presents structures, manufacturing techniques, and processing details for natural and synthetic rubbers, rubber-blends, rubber composites, and thermoplastic elastomers. 80% revised and rewritten material covers major advances since publication of the previous edition."

Dictionary of Food Compounds with CD-ROM

CRC Press The increasing world population, competition for arable land and rich fishing grounds, and environmental concerns mandate that we exploit in a sustainable way the earth's available plant and animal resources for human consumption. To that end, food chemists, technologists, and nutritionists engage in a vast number of tasks related to food availabil

Clay-containing Polymeric Nanocomposites

MICAI 2000: Advances in Artificial Intelligence

Mexican International Conference on Artificial Intelligence Acapulco, Mexico, April 11-14, 2000 Proceedings

Springer Fifty years ago, A. Turing predicted that by 2000 we would have a machine that could pass the Turing test. Although this may not yet be true, AI has advanced significantly in these 50 years, and at the dawn of the XXI century is still an active and challenging field. This year is also significant for AI in Mexico, with the merging of the two major AI conferences into the biennial Mexican International Conference on Artificial Intelligence (MICAI) series. MICAI is the union of the Mexican National AI Conference (RNIA) and the International AI Symposium (ISAI), organized annually by the Mexican Society for AI (SMIA, since 1984) and by the Monterrey Institute of Technology (ITESM, since 1988), respectively. The first Mexican International Conference on Artificial Intelligence, MICAI 2000, took place April 11-14, 2000, in the city of Acapulco, Mexico. This conference seeks to promote research in AI, and cooperation among Mexican researchers and their peers worldwide. We welcome you all. Over 163 papers from 17 different countries were submitted for consideration to MICAI 2000. After reviewing them thoroughly, MICAI's program committee, referees, and program chair accepted 60 papers for the international track. This volume contains the written version of the papers and invited talks presented at MICAI. We would like to acknowledge the support

of the American Association for Artificial Intelligence (AAAI), and the International Joint Conference on Artificial Intelligence (IJCAI). We are specially grateful for the warm hospitality and generosity offered by the Acapulco Institute of Technology.

A Biologist's Guide to Analysis of DNA Microarray Data

John Wiley & Sons A great introductory book that details reliable approaches to problems met in standard microarray data analyses. It provides examples of established approaches such as cluster analysis, function prediction, and principle component analysis. Discover real examples to illustrate the key concepts of data analysis. Written for those without any advanced background in math, statistics, or computer sciences, this book is essential for anyone interested in harnessing the immense potential of microarrays in biology and medicine.

Simulation of Semiconductor Processes and Devices

2007

SISPAD 2007

Springer Science & Business Media This volume contains the proceedings of the 12th International Conference on Simulation of Semiconductor Processes and Devices, SISPAD 2007, held September 2007 in Vienna, Austria. It provides a global forum for the presentation and discussion of recent advances and developments in the theoretical description, physical modeling and numerical simulation and analysis of semiconductor fabrication processes, device operation and system performance.

CIM Coursebook 04/05 Strategic Marketing in Practice

Routledge Elsevier/Butterworth-Heinemann's 2004-2005 CIM Coursebook series offers you the complete package for exam success. Comprising fully updated Coursebook texts that are revised annually, and free online access to the MarketingOnline learning interface, it offers everything you need to study for your CIM qualification. Carefully structured to link directly to the CIM syllabus, this Coursebook is user-friendly, interactive and relevant, ensuring it is the definitive companion to this year's CIM marketing course. Each Coursebook is accompanied by access to MARKETINGONLINE (www.marketingonline.co.uk), a unique online learning resource designed specifically for CIM students, where you can: * Annotate, customise and create personally tailored notes using the electronic version of the Coursebook * Receive regular tutorials on key topics from Marketing Knowledge * Search the Coursebook online for easy access to definitions and key concepts * Access the glossary for a comprehensive list of marketing terms and their meanings

International Dictionary of Library Histories

Routledge Following the format of Fitzroy Dearborn's highly successful International Dictionary of Historic Places and International Dictionary of University Histories, the International Dictionary of Library Histories provides basic information for each institution - location and holdings - followed by an extensive (1,000-5,000 word) essay on its history as well as a Further Reading list. In addition, the dictionary includes introductory articles on the history of various types of libraries and a library history in various regions of the world. The dictionary profiles more than 200 institutions from around the world, including the world's most important research libraries and other libraries with globally or regionally notable collections, innovative traditions, and significant and interesting histories. The essays take advantage of the growing scholarship of library history to provide insightful overviews of each institution, including not only the traditional values of these libraries but their innovations as well, such as developments in automated systems

and electronic delivery. The profiles will emphasize the unique materials of research in these institutions - archives, manuscripts, personal and institutional papers. The introductory articles on types of libraries include topics ranging from theological libraries to prison libraries, from the ancient to the digital. An international team of more than 200 leading scholars in the field have contributed essays to the project.

Financing for Low-carbon Energy Transition

Unlocking the Potential of Private Capital

Springer This book is the first comprehensive assessment of the state of low-carbon investments in Asia, analyzing the rationales, mandates and public-private financing activities. Based on the experiences of several regional initiatives wherein public financing is catalyzing private investments in low-carbon infrastructure, this book proposes a framework that can be used as a tool to identify factors that influence private investment decisions and policy instruments that can scale up the private capital. Placing the Asian economies onto a low-carbon development pathway requires an unprecedented shift in investments. This book addresses this situation by asking questions such as: • What is the central role of private finance in achieving the Paris Agreement targets? • What key policy levers and risk mitigation can governments use in an effort to unlock the potentials of private capital? • How can regionally coordinated actions hold significant promise for scaling up private investments?

Computational Linguistics and Intelligent Text Processing

5th International Conference, CICLing 2004, Seoul, Korea, February 15-21, 2004, Proceedings

Springer Science & Business Media CICLing 2004 was the 5th Annual Conference on Intelligent Text Processing and Computational Linguistics; see www.CICLing.org. CICLing conferences are intended to provide a balanced view of the cutting-edge developments in both theoretical foundations of computational linguistics and the practice of natural language text processing with its numerous applications. A feature of CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications. These conferences are a forum for dialogue between the specialists working in the two areas. This year we were honored by the presence of our invited speakers Martin Kay of Stanford University, Philip Resnik of the University of Maryland, Ricardo Baeza-Yates of the University of Chile, and Nick Campbell of the ATR Spoken Language Translation Research Laboratories. They delivered excellent extended lectures and organized vivid discussions. Of 129 submissions received (74 full papers and 44 short papers), after careful international reviewing 74 papers were selected for presentation (40 full papers and 35 short papers), written by 176 authors from 21 countries: Korea (37), Spain (34), Japan (22), Mexico (15), China (11), Germany (10), Ireland (10), UK (10), Singapore (6), Canada (3), Czech Rep. (3), France (3), Brazil (2), Sweden (2), Taiwan (2), Turkey (2), USA (2), Chile (1), Romania (1), Thailand (1), and The Netherlands (1); the figures in parentheses stand for the number of authors from the corresponding country.
