CYBER FRAUD

TACTICS, TECHNIQUES AND PROCEDURES

CRC Press With millions lost each year, cyber crime has evolved from a minor nuisance to a major concern involving well-organized actors and highly sophisticated organizations. Combining the best of investigative journalism and technical analysis, Cyber Fraud: Tactics, Techniques, and Procedures documents changes in the culture of cyber criminals and explores the innovations that are the result of those changes. The book uses the term Botnet as a metaphor for the evolving changes represented by this underground economy. Copiously illustrated, this engaging and engrossing book explores the state of threats present in the cyber fraud underground. It discusses phishing and pharming, trojans and toolkits, direct threats, pump-and-dump scams, and other fraud-related activities of the booming cyber-underground economy. By examining the geopolitical and socio-economic foundations of a cyber threat landscape, the book specifically examines telecommunications infrastructure development, patterns and trends of internet adoption and use, profiles of specific malicious actors, threat types, and trends in these areas. This eye-opening work includes a variety of case studies — including the

cyber threat landscape in Russia and Brazil. An in-depth discussion is provided on the Russian Business Network's (RBN) role in global cyber crime as well as new evidence on how these criminals steal, package, buy, sell, and profit from the personal financial information of consumers. Armed with this invaluable information, organizations and individuals will be better able to secure their systems and develop countermeasures to disrupt underground fraud.

WHO OWNS THE WORLD'S MEDIA?

MEDIA CONCENTRATION AND OWNERSHIP AROUND THE WORLD

Oxford University Press Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. *Who Owns the World's Media?* moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

BRANDED CUSTOMER SERVICE

THE NEW COMPETITIVE EDGE

Berrett-Koehler Publishers Branding is an integral part of modern business strategy. But while there are dozens of books on branding products and marketing campaigns, nobody has applied the logic and techniques of branding to customer service -- until now. *Branded Customer Service* is a practical guide to moving service delivery to a new level so that brand reinforcement occurs every time customers interact with organizational representatives. Janelle Barlow and Paul Stewart show how to infuse an entire organization with brand values and create a recognizable style of service that reflects brand promises and brand images.

INTERNET OF THINGS, SMART SPACES, AND NEXT GENERATION NETWORKS AND SYSTEMS

20TH INTERNATIONAL CONFERENCE, NEW2AN 2020, AND 13TH CONFERENCE, RUSMART 2020, ST. PETERSBURG, RUSSIA, AUGUST 26-28, 2020, PROCEEDINGS, PART II

Springer Nature This book constitutes the joint refereed proceedings of the 20th International Conference on Next Generation Teletraffic and Wired/Wireless Advanced Networks and Systems, NEW2AN 2020, and the 13th Conference on Internet of Things and Smart Spaces, ruSMART 2020. The conference was held virtually due to the COVID-19 pandemic. The 79 revised full papers presented were carefully reviewed and selected from 225 submissions. The papers of NEW2AN address various aspects of next-generation data networks, with special attention to advanced wireless networking and applications. In particular, they deal with novel and innovative approaches to performance and efficiency analysis of 5G and beyond systems, employed game-theoretical formulations, advanced queuing theory, and stochastic geometry, while also covering the Internet of Things, cyber security, optics, signal processing, as well as business aspects. ruSMART 2020, provides a forum for academic and industrial researchers to discuss new ideas and trends in the emerging areas.

TAJIKISTAN

Bradt Travel Guides This new, thoroughly updated second edition of the most practical guide to Central Asia's smallest and least understood country brings to life the 'Roof of the World': Tajikistan. Enhanced trekking details and maps are included, along with more detailed practical information than any other guidebook. Travelling to and entering Tajikistan is easier than ever before with improved transport infrastructure and a new airport terminal in the capital, Dushanbe. Accommodation options in the capital have also improved with new high-end hotels now open for business. This new edition includes details of all such changes and improvements. With this guide you can explore the Tajik side of the Wakhan Corridor, complete with fortresses, petroglyphs, and stunning views of the Pamirs and Hindu Kush. Also covered are the Fann Mountains, easily the most accessible - and one of the most beautiful - mountain ranges in Tajikistan, the UNESCO World Heritage Sites of Sarazm and the Tajik National Park, the hot springs of Garm Chashma, and the Tajikistan section (which forms the majority) of the Pamir Highway, arguably the most spectacular drive in the world. Epic mountain landscapes, glacial lakes, and the mighty Amu Darya - the Oxus River of antiquity - encircle ancient Buddhist sites, Silk Road trading posts, medieval shrines, and planned Soviet cities alike. The modern population continues to draw upon its diverse heritage from Persia, China, Afghanistan and Russia, creating a complex and intriguing culture waiting to be discovered. With first-hand descriptions of everything from Sogdian ruins to playing the traditional sport of buz kashi, trekking on the Murghab Plateau and eating shashlik in garden tea houses, Tajikistan's expert authors bring the country alive in Bradt's new and fully updated edition.

LIFESTYLE IN SIBERIA AND THE RUSSIAN NORTH

Open Book Publishers Lifestyle in Siberia and the Russian North breaks new ground by exploring the concept of lifestyle from a distinctly anthropological perspective. Showcasing the collective work of ten experienced scholars in the field, the book goes beyond concepts of tradition that have often been the focus of previous research, to explain how political, economic and technological changes in Russia have created a wide range of new possibilities and constraints in the pursuit of different ways of life. Each contribution is drawn from meticulous first-hand field research, and the authors engage with theoretical questions such as whether and how the concept of lifestyle can be extended beyond its conventionally urban, Euro-American context and employed in a markedly different setting. Lifestyle in Siberia and the Russian North builds on the contributors' clear commitment to diversifying the field and providing a novel and intimate insight into this vast and dynamic region. This book provides inspiring reading for students and teachers of Anthropology, Sociology and Cultural Studies and for anyone interested in Russia and its regions. By providing ethnographic case studies, it is also a useful basis for teaching anthropological methods and concepts, both at graduate and undergraduate level. Rigorous and innovative, it marks an important contribution to the study of Siberia and the Russian North.

THE MANAGEMENT TRANSFORMATION OF HUAWEI

FROM HUMBLE BEGINNINGS TO GLOBAL LEADERSHIP

Cambridge University Press Huawei has become China's most prominent multinational company and a leader in the ICT sector. Given unprecedented access to the company, the authors of this book examine the management transformation of Huawei from its inception in 1987 until 2019, observing in detail not only the creation of its organizational routines but also the breaking of routines across most major functional areas: Management, Product Development, HR, Supply Chain, Finance, R&D, Intellectual Property, and International Business. 'Dynamic capabilities' are central to theories of competitive advantage and this book highlights Huawei as an ideal case study for the successful implementation of change routines and change-supporting values. The chapters cover all the major change initiatives the firm has undertaken since 1996 to import best practices from the West, with the help of consultants. The insights presented in the book will be particularly interesting for academics in the field of strategy, management, and business history.

NETWORKS IN THE RUSSIAN MARKET ECONOMY

GLOBAL CONNECT

TELECOMMUNICATIONS, CELL COMMUNICATIONS, INTERNET CONNECTIVITY, MOBILE CONNECTIVITY, 175 COUNTRIES

INTERNET OF THINGS AND SENSORS NETWORKS IN 5G WIRELESS COMMUNICATIONS

MDPI The Internet of Things (IoT) has attracted much attention from society, industry and academia as a promising technology that can enhance day to day activities, and the creation of new business models, products and services, and serve as a broad source of research topics and ideas. A future digital society is envisioned, composed of numerous wireless connected sensors and devices. Driven by huge demand, the massive IoT (mIoT) or massive machine type communication (mMTC) has been identified as one of the three main communication scenarios for 5G. In addition to connectivity, computing and storage and data management are also long-standing issues for low-cost devices and sensors. The book is a collection of outstanding technical research and industrial papers covering new research results, with a wide range of features within the 5G-and-beyond framework. It provides a range of discussions of the major research challenges and achievements within this topic.

ACCESS CONTROLLED

THE SHAPING OF POWER, RIGHTS, AND RULE IN CYBERSPACE

MIT Press Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content, and online surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks, surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a combination of technical interrogation and field research methods.

BUTCHER'S COPY-EDITING

THE CAMBRIDGE HANDBOOK FOR EDITORS, COPY-EDITORS AND PROOFREADERS

Cambridge University Press Since its first publication in 1975, Judith Butcher's Copy-editing has become firmly established as a classic reference guide. This fourth edition has been comprehensively revised to provide an up-to-date and clearly presented source of information for all those involved in preparing typescripts and illustrations for publication. From the basics of how to prepare text and illustrations for the designer and typesetter, through the ground rules of house style, to how to read and correct proofs, Copy-editing covers all aspects of the editorial process. New and revised features: • up-to-date advice on indexes, inclusive language, reference systems and preliminary pages • a chapter devoted to on-screen copy-editing • guidance on digital coding and publishing in other media such as e-books • updated to take account of modern typesetting and printing technology • an expanded section on law books • an essential tool for new and experienced copy-editors, working freelance or in-house.

ENTERPRISE INTEGRATION PATTERNS

DESIGNING, BUILDING, AND DEPLOYING MESSAGING SOLUTIONS

Addison-Wesley Enterprise Integration Patterns provides an invaluable catalog of sixty-five patterns, with real-world solutions that demonstrate the formidable of messaging and help you to design effective messaging solutions for your enterprise. The authors also include examples covering a variety of different integration technologies, such as JMS, MSMQ, TIBCO ActiveEnterprise, Microsoft BizTalk, SOAP, and XSL. A case study describing a bond trading system illustrates the patterns in practice, and the book offers a look at emerging standards, as well as insights into what the future of enterprise integration might hold. This book provides a consistent vocabulary and visual notation framework to describe large-scale integration solutions across many technologies. It also explores in detail the advantages and limitations of asynchronous messaging architectures. The authors present practical advice on designing code that connects an application to a messaging system, and provide extensive information to help you determine when to send a message, how to route it to the proper destination, and how to monitor the health of a messaging system. If you want to know how to manage, monitor, and maintain a messaging system once it is in use, get this book.

THE DICTATOR'S HANDBOOK

WHY BAD BEHAVIOR IS ALMOST ALWAYS GOOD POLITICS

Hachette UK A groundbreaking new theory of the real rules of politics: leaders do whatever keeps them in power, regardless of the national interest. As featured on the viral video Rules for Rulers, which has been viewed over 3 million times. Bruce Bueno de Mesquita and Alastair Smith's canonical book on political science turned conventional wisdom on its head. They started from a single assertion: Leaders do whatever keeps them in power. They don't care about the "national interest"-or even their subjects-unless they have to. This clever and accessible book shows that democracy is essentially just a convenient fiction. Governments do not differ in kind but only in the number of essential supporters, or backs that need scratching. The size of this group determines almost everything about politics: what leaders can get away with, and the quality of life or misery under them. The picture the authors paint is not pretty. But it just may be the truth, which is a good starting point for anyone seeking to improve human governance.
