Calendar of Annandale Emigration Extracts from the 'Annandale Observer' The British Library General Catalogue of Printed Books to 1975 The British Library General Catalogue of Printed Books to 1975 Subject Index of Modern Books Acquired Bibliotheca Celtica A Register of Publications Relating to Wales and the Celtic Peoples & Languages The British National Bibliography Bibliography of Historical Works Issued in the United Kingdom: 1971-1975 General Catalogue of Printed Books Diversity in the City *Universidad de Deusto* It seems the world is becoming increasingly uniform culturally. To a certain degree, this observation is correct in the sense that a global mass culture is certainly being disseminated and sold all over the plane. But the world is at the same time increasingly diversified in terms of ethno-cultural identities. The tension between the trend toward cultural uniformity and the trend toward differentiation of identities is well captured by observing the evolution of social dynamics in cities. Most medium-sized and large European cities are today increasingly fragmented socially, economically and ethnically. Some of them are even becoming socially, ethnically and racially ghettoised. But at the same time, European cities remain places where intergroup encounters can develop and where cultural production takes place. The cities are the crossroads between the local and the global. The first aim of this book is to discuss the changes affecting the city and the role played by cultural diversity and ethno-national identities in those changes. The second aim is to examine some crucial issues and aspects of the current process of cultural diversification of cities and its impact on urban socio-economic, political and cultural activities. **Making Ireland British, 1580-1650 *OUP Oxford* This is the first comprehensive study of all the plantations that were attempted in Ireland during the years 1580-1650. It examines the arguments advanced by successive political figures for a plantation policy, and the responses which this policy elicited from different segments of the population in Ireland. The book opens with an analysis of the complete works of Edmund Spenser who was the most articulate ideologue for plantation. The author argues that all subsequent advocates of plantation, ranging from King James VI and I, to Strafford, to Oliver Cromwell, were guided by Spenser's opinions, and that discrepancies between plantation in theory and practice were measured against this yardstick. The book culminates with a close analysis of the 1641 insurrection throughout Ireland, which, it is argued, steered Cromwell to engage in one last effort to make Ireland British. **Onsite Wastewater Treatment Systems Manual** "This manual contains overview information on treatment technologies, installation practices, and past performance."--Intro. **The Book to Come** *Stanford University Press* Featuring essays originally published in *La Nouvelle Revue Française*, this collection clearly demonstrates why Maurice Blanchot was a key figure in exploring the relation between literature and philosophy. **Design Manual Onsite Wastewater Treatment and Disposal Systems** **Draining development? Controlling flows of illicit funds from developing countries** *World Bank Publications* A growing concern among those interested in economic development is the realization that hundreds of billions of dollars are illicitly flowing out of developing countries to tax havens and other financial centers in the developed world. This volume assesses the dynamics of these flows, much of which is from corruption and tax evasion. **Steal This Book** *CreateSpace* **Steal this book Elasmobranch Biodiversity, Conservation and Management Proceedings of the International Seminar and Workshop, Sabah, Malaysia, July 1997** *IUCN* **The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three-day international seminar that included a one-day workshop in order to highlight freshwater and coastal elasmobranch conservation issues in the region and worldwide, to disseminate the result of the project to other Malaysian states and countries, and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation, commercial fisheries management, and for subsistence fishing communities. These proceedings contain numerous peer-reviewed papers originally presented at the seminar, which cover a wide range of topics, with particular reference to species from freshwater and estuarine habitats. The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries, biodiversity, conservation and management. This paper records those conclusions, which highlight the importance of elasmobranchs as top marine predators and keystone species, noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks.** **Mexican Immigration to the United States** *University of Chicago Press* **From debates on Capitol Hill to the popular media, Mexican immigrants are the subject of widespread controversy. By 2003, their growing numbers accounted for 28.3 percent of all foreign-born inhabitants of the United States. Mexican Immigration to the United States analyzes the astonishing economic impact of this historically unprecedented exodus. Why do Mexican immigrants gain citizenship and employment at a slower rate than non-Mexicans? Does their migration to the U.S. adversely affect the working conditions of lower-skilled workers already residing there? And how rapid is the intergenerational mobility among Mexican immigrant families? This authoritative volume provides a historical context for Mexican immigration to the U.S. and reports new findings on an immigrant influx whose size and character will force us to rethink economic policy for decades to come.** Mexican**

Immigration to the United States will be necessary reading for anyone concerned about social conditions and economic opportunities in both countries. *Inside Asylum Bureaucracy: Organizing Refugee Status Determination in Austria* Springer This open access monograph provides sociological insight into governmental action on the administration of asylum in the European context. It offers an in-depth understanding of how decision-making officials encounter and respond to structural contradictions in the asylum procedure produced by diverging legal, political, and administrative objectives. The study focuses on structural aspects on the one hand, such as legal and organisational elements, and aspects of agency on the other hand, examining the social practices and processes going on at the frontside and the backside of the administrative asylum system. Coverage is based on a case study using ethnographic methods, including qualitative interviews, participant observation, as well as artefact analysis. This case study is positioned within a broader context and allows for comparison within and beyond the European system, building a bridge to the international scientific community. In addition, the author links the empirical findings to sociological theory. She explains the identified patterns of social practice in asylum administration along the theories of social practices, social construction and structuration. This helps to contribute to the often missing theoretical development in this particular field of research. Overall, this book provides a sociological contribution to a key issue in today's debate on immigration in Europe and beyond. It will appeal to researchers, policy makers, administrators, and practitioners as well as students and readers interested in immigration and asylum.

Rifqa Haymarket Books Rifqa is Mohammed El-Kurd's debut collection of poetry, written in the tradition of Ghassan Kanafani's Palestinian Resistance Literature. The book narrates the author's own experience of dispossession in Sheikh Jarrah--an infamous neighborhood in Jerusalem, Palestine, whose population of refugees continues to live on the brink of homelessness at the hands of the Israeli government and US-based settler organizations. The book, named after the author's late grandmother who was forced to flee from Haifa upon the genocidal establishment of Israel, makes the observation that home takeovers and demolitions across historical Palestine are not reminiscent of 1948 Nakba, but are in fact a continuation of it: a legalized, ideologically-driven practice of ethnic cleansing.

World Atlas of Desertification Rethinking Land Degradation and Sustainable Land Management World Development Report 1994 Infrastructure for Development World Bank Publications World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services. In recent decades, developing countries have made substantial investments in infrastructure, achieving dramatic gains for households and producers by expanding their access to services such as safe water, sanitation, electric power, telecommunications, and transport. Even more infrastructure investment and expansion are needed in order to extend the reach of services - especially to people living in rural areas and to the poor. But as this report shows, the quantity of investment cannot be the exclusive focus of policy. Improving the quality of infrastructure service also is vital. Both quantity and quality improvements are essential to modernize and diversify production, help countries compete internationally, and accommodate rapid urbanization. The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure. To promote more efficient and responsive service delivery, incentives need to be changed through commercial management, competition, and user involvement. Several trends are helping to improve the performance of infrastructure. First, innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services. Second, an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public-private partnerships is highlighting new ways to increase efficiency and expand services. Third, increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance.

On Diseases of the Skin A System of Cutaneous Medicine Public Works as a Safety Net Design, Evidence, and Implementation World Bank Publications A review of the conceptual underpinnings and operational elements of public works programs around the world., drawing from a rich evidence base and analyzing previously unassimilated data, to fill a gap in knowledge related to public works programs, now so popular.

An Outline of the Relations Between England and Scotland (500-1707) Library of Alexandria Children and Forced Migration Durable Solutions During Transient Years Springer This book responds to the reality that children and youth constitute a disproportionately large percentage of displaced populations worldwide. It demonstrates how their hopes and aspirations reflect the transient nature of their age group, and often differ from those of their elders. It also examines how they face additional difficulties due to the inconsistent definition and uneven implementation of the traditional 'durable solutions' to forced migration implemented by national governments and international assistance agencies. The authors use empirical research findings and robust policy analyses of cases of child displacement across the globe to make their central argument: that the particular challenges and opportunities that displaced children and youth face must be investigated and factored into relevant policy and practice, promoting more sustainable and durable solutions in the process. This interdisciplinary edited collection will appeal to students and scholars of forced migration studies, development, conflict and peace-building and youth studies, along with policy-makers, children's rights organizations and NGOs.

Waiting and the Temporalities of Irregular Migration Routledge This edited volume approaches waiting both as a social phenomenon that proliferates in irregularised forms of migration and as an analytical perspective on migration processes and practices. Waiting as an analytical perspective offers new insights into the complex and shifting nature of processes of bordering, belonging, state power, exclusion and inclusion, and social relations in irregular migration. The chapters in this book address legal, bureaucratic, ethical, gendered, and affective dimensions of time and migration. A key concern is to develop more theoretically robust approaches to waiting in migration as constituted in and through multiple and relational temporalities. The chapters highlight how waiting is configured in specific legal, material, and socio-cultural situations, as well as how migrants encounter, incorporate, and resist temporal structures. This collection includes ethnographic and other empirically based material, as well as theorizing that cross-cut

disciplinary boundaries. It will be relevant to scholars from anthropology and sociology, and others interested in temporalities, migration, borders, and power. **The Scottish Highlanders and the Land Laws An Historico-economical Enquiry Botany Bay, True Tales of Early Australia** *Good Press* "Botany Bay, True Tales of Early Australia" by John Lang. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Samuel and John established the magazine Sidney's Emigrant Journal, and worked together on two books concerning Australian emigration. The present work is an excellent description of Australia's contemporary state, where Samuel Sidney is clearly influenced by both Caroline Chisholm and Alexander Harris. He argues that the Australian colonies are ideal for working class emigration. Already in the introduction it becomes clear that Sidney is very anti-Wakefield, which makes it an important document in the debate between competing proposals for emigration. Apparently Sidney was very well-informed, he had access to otherwise inaccessible primary sources, and the verbatim transcripts add considerably to the book's value. Sidney's work is a full guide, giving excessive and detailed information on one of the most interesting world-regions."--Abebooks website. **Looking Ahead in World Food and Agriculture Perspectives to 2050** *Food & Agriculture Org* In 2009 FAO organised a Forum and a High-level Expert Meeting on 'How to feed the World in 2050'. This book provides vital statistics and includes valuable papers coming out of the meeting. Several aspects of the perspectives for global agriculture are analysed and FAO's projections for the years to come are given. Macroeconomic indicators are explained and how these underpin the poverty levels in the 2050 horizon. **Investing in America's Workforce Improving Outcomes for Workers and Employers The Chinese in the West Indies, 1806-1995 A Documentary History** *University of West Indies Press* The Chinese in West Indies "starts with an excellent introductory essay to place nineteenth-century Chinese immigration in its wider context: the worldwide Chinese migrations, the post-slavery Caribbean background, the contract labour schemes developed after emancipation ... All the documents are well chosen, and together they deal with virtually every important aspect of the migration of Chinese people to the West Indies and their subsequent experiences". Foreword Book jacket. **The Financial and Economic Crisis of 2008-2009 and Developing Countries** *United Nations Publications* As a response to the global financial and economic crisis that began in 2008, many developing and emerging-market economies undertook resolute countercyclical monetary and fiscal actions, which paralleled those of the developed countries. These policy responses contributed significantly to the recovery of the world economy in 2010 and 2011. In particular, the strong and fast responses of Brazil, China and India helped mitigate deflationary risks and avoid a repetition of the Great Depression of the early 1930s. On the other hand, reforms of financial regulation and supervision are taking time to advance, and little progress has been achieved so far in implementing measures to reduce global imbalances and to avoid a malfunctioning of the international exchange-rate system. These would contribute to greater coherence between the international trading and financial systems, and to creating a more stable international economic environment for development. This is a collection of papers that contribute to the debate on these topics, putting the South at centre stage. It examines how the countries of the South were affected by the global economic and financial crisis, and how they responded to it. **Does History Matter? Making and Debating Citizenship, Immigration and Refugee Policy in Australia and New Zealand** *ANU E Press* This volume of essays represents the first systematic attempt to explore the use of the past in the making of citizenship and immigration policy in Australia and New Zealand. Focussing on immigration and citizenship policy in Australia and New Zealand, the contributions to this volume explore how history and memory are implicated in policy making and political debate, and what processes of remembering and forgetting are utilised by political leaders when formulating and defending policy decisions. They remind us that a nuanced understanding of the past is fundamental to managing the politics and practicalities of immigration and citizenship in the early 21st century. **National Union Catalog A Cumulative Author List Representing Library of Congress Printed Cards and Titles Reported by Other American Libraries** Galloway in Ancient and Modern Times **Managing Basin Interdependencies in a Heterogeneous, Highly Utilized and Data Scarce River Basin in Semi-Arid Africa The Case of the Pangani River Basin, Eastern Africa** *CRC Press* For integrated water resources management both blue and green water resources in a river basin and their spatial and temporal distribution have to be considered. This is because green and blue water uses are interdependent. In sub-Saharan Africa, the upper landscapes are often dominated by rainfed and supplementary irrigated agriculture that rely on green water resources. Downstream, most blue water uses are confined to the river channels, mainly for hydropower and the environment. Over time and due to population growth and increased demands for food and energy, water use of both green and blue water has increased. This book provides a quantitative assessment of green-blue water use and their interactions. The book makes a novel contribution by developing a hydrological model that can quantify not only green but also blue water use by many smallholder farmers scattered throughout the landscape. The book provides an innovative framework for mapping ecological productivity where gross returns from water consumed in agricultural and natural vegetation are quantified. The book provides a multi-objective optimization analysis involving green and blue water users, including the environment. The book also assesses the uncertainty levels of using remote sensing data in water resource management at river basin scale. **Riots I Have Known** *Simon & Schuster* Longlisted for the 2019 Center for Fiction First Novel Prize, Ryan Chapman's "gritty, bracing debut" (*Esquire*) set during a prison riot is "dark, daring, and laugh-out-loud hilarious...one of the smartest—and best—novels of the year" (*NPR*). A largescale riot rages through Westbrook prison in upstate New York, incited by a poem in the house literary journal. Our unnamed narrator, barricaded inside the computer lab, swears he's blameless—even though, as editor-in-chief, he published the piece in question. As he awaits violent interruption by his

many, many enemies, he liveblogs one final Editor's Letter. *Riots I Have Known* is his memoir, confession, and act of literary revenge. His tale spans a childhood in Sri Lanka, navigating the postwar black markets and hotel chains; employment as a Park Avenue doorman, serving the widows of the one percent; life in prison, with the silver lining of his beloved McNairy; and his stewardship of *The Holding Pen*, a "masterpiece of post-penal literature" favored by Brooklynites everywhere. All will be revealed, and everyone will see he's really a good guy, doing it for the right reasons. "Fitfully funny and murderously wry," *Riots I Have Known* is "a frenzied yet wistful monologue from a lover of literature under siege" (Kirkus Reviews). *Gender in Agriculture Closing the Knowledge Gap* *Springer Science & Business*

The Food and Agriculture Organization of the United Nations (FAO) produced a 2011 report on women in agriculture with a clear and urgent message: agriculture underperforms because half of all farmers—women—lack equal access to the resources and opportunities they need to be more productive. This book builds on the report's conclusions by providing, for a non-specialist audience, a compendium of what we know now about gender gaps in agriculture. *An Epitome of the History of Medicine* *Alpha Edition* This book has been considered important throughout the human history, and so that this work is never forgotten Alpha Editions has made efforts in its preservation by republishing this book in a modern format for the present and future generations. This whole book has been re-formatted, re-typed and re-designed. These books are not made of scanned copies of their original work, and hence the text is clear and readable.
