TRILINGUAL EDUCATION IN HONG KONG PRIMARY SCHOOLS

Springer **This book focuses on Hong Kong as a multilingual society. It investigates how trilingual education is implemented in Hong Kong primary schools. Based on a large scale survey of 155 Hong Kong schools and in-depth case studies in 3 selected schools, the book gives an overview of trilingual education in Hong Kong primary schools, revealing the views on trilingual education of all stakeholders: school principals, panel chairs, subject teachers, students, and parents. The research findings presented in this book suggest that the implementation of trilingual education varies significantly from school to school, as does the effectiveness of the trilingual education models used. It shows how students' views towards the use of different media of instruction (Mols) also vary, and how their mother-tongue backgrounds affect their perceptions. By documenting views, policies and implementation methods, the book provides insight into the practice of trilingual education in Hong Kong and offers suggestions on potentially effective implementation methods.**

PUGS OF THE FROZEN NORTH

Oxford University Press - Children **Reeve and McIntyre bring you another rip-roaring read! The Race to the Top of the World! It comes around once in a lifetime, and the prize? Your heart's desire. Shen and Sika can't resist the chance to win, but competition is fierce. The path to victory is littered with snow trolls, sea monsters, and a gang of particularly hungry yetis. But Shen and Sika have something the other contestants don't have. Actually, they have 66 other things; pugs to be exact. That's a 264 paw-powered sled! Bursting with stunning illustration throughout, this is a book not to be missed!**

TEACHING MATHEMATICS AT SECONDARY LEVEL

Open Book Publishers **Teaching Mathematics** is nothing less than a mathematical manifesto. Arising in response to a limited National Curriculum, and engaged with secondary schooling for those aged 11–14 (Key Stage 3) in particular, this handbook for teachers will help them broaden and enrich their students' mathematical education. It avoids specifying how to teach, and focuses instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors—but which are little appreciated in the UK at present. This study is aimed at anyone who would like to think more deeply about the discipline of 'elementary mathematics', in England and Wales and anywhere else. By analysing and supplementing the current curriculum, **Teaching Mathematics** provides food for thought for all those involved in school mathematics, whether as aspiring teachers or as experienced professionals. It challenges us all to reflect upon what it is that makes secondary school mathematics educationally, culturally, and socially important.

COMPUTER NETWORKING

A TOP-DOWN APPROACH

Addison-Wesley Longman Computer Networking provides a top-down approach to this study by beginning with applications-level protocols and then working down the protocol stack. Focuses on a specific motivating example of a network-the Internet-as well as introducing students to protocols in a more theoretical context. New short "interlude" on "putting it all together" that follows the coverage of application, transport, network, and datalink layers ties together the various components of the Internet architecture and identifying aspects of the architecture that have made the Internet so successful. A new chapter covers wireless and mobile networking, including in-depth coverage of Wi-Fi, Mobile IP and GSM. Also included is expanded coverage on BGP, wireless security and DNS. This book is designed for readers who need to learn the fundamentals of computer networking. It also has extensive material, on the very latest technology, making it of great interest to networking professionals.

PROCEEDINGS OF THE 23RD INTERNATIONAL CONFERENCE ON INDUSTRIAL ENGINEERING AND ENGINEERING

MANAGEMENT 2016

THEORY AND APPLICATION OF INDUSTRIAL ENGINEERING

Springer International Conference on Industrial Engineering and Engineering Management is sponsored by Chinese Industrial Engineering Institution, CMES, which is the unique national-level academic society of Industrial Engineering. The conference is held annually as the major event in this area. Being the largest and the most authoritative international academic conference held in China, it supplies an academic platform for the experts and the entrepreneurs in International Industrial Engineering and Management area to exchange their research results. Many experts in various fields from China and foreign countries gather together in the conference to review, exchange, summarize and promote their achievements in Industrial Engineering and Engineering Management fields. Some experts pay special attention to the current situation of the related techniques application in China as well as their future prospect, such as Industry 4.0, Green Product Design, Quality Control and Management, Supply Chain and logistics Management to cater for the purpose of low-carbon, energy-saving and emission-reduction and so on. They also come up with their assumption and outlook about the related techniques' development. The proceedings will offer theatrical methods and technique application cases for experts from college and university, research institution and enterprises who are engaged in theoretical research of Industrial Engineering and Engineering Management and its technique's application in China. As all the papers are feathered by higher level of academic and application value, they also provide research data for foreign scholars who occupy themselves in investigating the enterprises and engineering management of Chinese style.

VALIDATING TECHNOLOGICAL INNOVATION

THE INTRODUCTION AND IMPLEMENTATION OF ONSCREEN MARKING IN HONG KONG

Springer This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be

fully validated by a series of research studies in order to satisfy key stakeholders.

THE HISTORY AND FUTURE OF THE WORLD TRADE ORGANIZATION

The History and Future of the World Trade Organization is a comprehensive account of the economic, political and legal issues surrounding the creation of the WTO and its evolution. Fully illustrated with colour and black-and-white photos dating back to the early days of trade negotiations, the publication reviews the WTO's achievements as well as the challenges faced by the organisation, and identifies the key questions that WTO members need to address in the future. The book describes the intellectual roots of the trading system, membership of the WTO and the growth of the Geneva trade community, trade negotiations and the development of coalitions among the membership, and the WTO's relations with other international organisations and civil society. Also covered are the organisation's robust dispute settlement rules, the launch and evolution of the Doha Round, the rise of regional trade agreements, and the leadership and management of the WTO.

HE'LL BE OK

GROWING GORGEOUS BOYS INTO GOOD MEN 10TH ANNIVERSARY EDITION

HarperCollins The 10th anniversary edition of the iconic book that takes parents into the mysterious world of boys, with new foreword, introduction and tribute to the author. **THE TENTH ANNIVERSARY EDITION OF A PARENTING CLASSIC** How do you raise boys to men in a world where trouble beckons at every turn? How do you make sure they learn the 'right' lessons, stay out of danger, find a path to follow? How do you ensure they'll be OK? Celia Lashlie has some of the answers. After years working in the prison service, she knows what can happen when boys make the wrong choices. She also knows what it's like to be a parent - she raised a son on her own and feared for his survival. As a crucial part of the Good Man Project, she talked to 180 classes of boys. Her insights into what boys need - and what parents can do to help them - are ground-breaking. In this new edition of her honest, no-nonsense and best-selling book, Celia reveals what goes on inside the world of boys. With clarity and insight, she offers parents - especially mothers - practical and reassuring advice on raising their boys to become good, loving, articulate men. "Celia did an enormous amount of work, particularly standing up for at risk young people, and she made an enormous contribution." - New Zealand Prime Minister John Key

21ST CENTURY SKILLS DEVELOPMENT THROUGH INQUIRY-BASED LEARNING

FROM THEORY TO PRACTICE

Springer This book presents innovative instructional interventions designed to support inquiry project-based learning as an approach to equip students with 21st century skills. Instructional techniques include collaborative team-based teaching, social constructivist game design and game play, and productive uses of social media such as wikis and other online communication affordances. The book will be of interest to researchers seeking a summary of recent empirical

studies in the inquiry project-based learning domain that employ new technologies as constructive media for student synthesis and creation. The book also bridges the gap between empirical works and a range of national- and international-level educational standards frameworks such as the P21, the OECD framework, AASL Standards for the 21st Century Learner, and the Common Core State Standards in the US. Of particular interest to education practitioners, the book offers detailed descriptions of inquiry project-based learning interventions that can be directly reproduced in today's schools. Further, the book provides research-driven guidelines for the evaluation of student inquiry project-based learning. Lastly, it offers education policymakers insight into establishing anchors and spaces for applying inquiry project-based learning opportunities for youth today in the context of existing and current education reform efforts. The aim of this book is to support education leaders', practitioners' and researchers' efforts in advancing inspiring and motivating student learning through transformative social constructivist inquiry-based knowledge-building with information technologies. We propose that preparing students with inquiry mindsets and dispositions can promote greater agency, critical thinking and resourcefulness, qualities needed for addressing the complex societal challenges they may face.

CODE-SWITCHING BETWEEN STRUCTURAL AND SOCIOLINGUISTIC PERSPECTIVES

Walter de Gruyter GmbH & Co KG The study of code-switching has been carried out from linguistic, psycholinguistic, and sociolinguistic perspectives, largely in isolation from each other. This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence, forms, and outcomes of code-switching. The contributions in this volume are divided into three parts: "code-switching between cognition and socio-pragmatics", "multilingual interaction and identity", and "code-switching and social structure". The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations. They

are predictive and descriptive in their research goals and rely on experimental or naturalistic data. But they share the common goal of seeking to explain how social structures, ideologies, and identity impact on the grammatical and conversational features of code-switching and language mixing, and on the emergence of mixed languages. Given its scope, this volume is a significant addition to the empirical and theoretical foundations of the study of code-switching. It is also of relevance to the general debate on the inter-relationships between language and society.
