Can We Price Carbon?

MIT Press *A political science analysis of the feasibility and sustainability of carbon pricing, drawing from North American, European, and Asian case studies. Climate change, economists generally agree, is best addressed by putting a price on the carbon content of fossil fuels—by taxing carbon, by cap-and-trade systems, or other methods. But what about the politics of carbon pricing? Do political realities render carbon pricing impracticable? In this book, Barry Rabe offers the first major political science analysis of the feasibility and sustainability of carbon pricing, drawing upon a series of real-world attempts to price carbon over the last two decades in North America, Europe, and Asia. Rabe asks whether these policies have proven politically viable and, if adopted, whether they survive political shifts and managerial challenges over time. The entire policy life cycle is examined, from adoption through advanced implementation, on a range of pricing policies including not only carbon taxes and cap-and-trade but also such alternative methods as taxing fossil fuel extraction. These case studies, Rabe argues, show that despite the considerable political difficulties, carbon pricing can be both feasible and durable.*

Research Handbook on Shadow Banking

Legal and Regulatory Aspects

Edward Elgar Publishing Research Handbook on Shadow Banking brings together a range of international experts to discuss shadow banking activities, the purposes they serve, the risks they pose to the financial system and implications for regulators and the regulatory perimeter. Including discussions specific to the UK, European Union, US, China and Singapore, this book offers high level and theoretical perspectives on shadow banking and regulatory risks, as well as more detailed explorations of specific markets in shadow banking.

EU Cohesion Policy

Reassessing performance and direction

Taylor & Francis The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315401867>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. This book brings together academics, members of European institutions, and regional and national level policymakers in order to assess the performance and direction of EU Cohesion policy against the background of the most significant reforms to the policy in a generation. Responding to past criticisms of the effectiveness of the policy, the policy changes introduced in 2013 have aligned European Structural and Investment Funds with the Europe 2020 strategy and introduced measures to improve strategic coherence, performance and integrated development. EU Cohesion Policy: Reassessing performance and direction argues that policy can only be successfully developed and implemented if there is input from both academics and practitioners. The chapters in the book address four important issues: the effectiveness and impact of Cohesion policy at European, national and regional levels; the contribution of Cohesion policy to the Europe 2020 strategy of smart, sustainable and inclusive growth; the importance of quality of government and administrative capacity for the effective management of the Funds; and the inter-relationships between institutions, territory and place-based policies. The volume will be an invaluable resource to students, academics and policymakers across economics, regional studies, European studies and international relations.

Routledge International Handbook of Rural Studies

Routledge Rural societies around the world are changing in fundamental ways, both at their own initiative and in response to external forces. The Routledge International Handbook of Rural Studies examines the organisation and transformation of rural society in more developed regions of the world, taking an interdisciplinary and problem-focused approach. Written by leading social scientists from many countries, it addresses emerging issues and challenges in innovative and provocative ways to inform future policy. This volume is organised around eight emerging social, economic and environmental challenges: Demographic change. Economic transformations. Food systems and land. Environment and resources. Changing configurations of gender and rural society. Social and economic equality. Social dynamics and institutional capacity. Power and governance. Cross-cutting these challenges are the growing interdependence of rural and urban; the rise in inequality within and between places; the impact of fiscal crisis on rural societies; neoliberalism, power and agency; and rural areas as potential sites of resistance. The Routledge International Handbook of Rural Studies is required reading for anyone concerned with the future of rural areas.

Handbook of Research on Technology Tools for Real-World Skill Development

IGI Global Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem-solving skills for the digital age. The Handbook of Research on Technology Tools for Real-World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem-solving skills necessary in everyday life. Featuring timely, research-based chapters exploring the broad scope of digital and computer-based learning strategies including, but not limited to, enhanced classroom experiences, assessment programs, and problem-solving training, this publication is an essential reference source for academicians, researchers, professionals, and policymakers interested in the practical application of technology-based learning for next-generation education.

Public Health Ethics: Cases Spanning the Globe

Springer This Open Access book highlights the ethical issues and dilemmas that arise in the practice of public health. It is also a tool to support instruction, debate, and dialogue regarding public health ethics. Although the practice of public health has always included consideration of ethical issues, the field of public health ethics as a discipline is a relatively new and emerging area. There are few practical training resources for public health practitioners, especially resources which include discussion of realistic cases which are likely to arise in the practice of public health. This work discusses these issues on a case to case basis and helps create awareness and understanding of the ethics of public health care. The main audience for the casebook is public health practitioners, including front-line workers, field epidemiology trainers and trainees, managers, planners, and decision makers who have an interest in learning about how to integrate ethical analysis into their day to day public health practice. The casebook is also useful to schools of public health and public health students as well as to academic ethicists who can use the book to teach public health ethics and distinguish it from clinical and research ethics.

The Poverty of Privacy Rights

Stanford University Press The Poverty of Privacy Rights makes a simple, controversial argument: Poor mothers in America have been deprived of the right to privacy. The U.S. Constitution is supposed to bestow rights equally. Yet the poor are subject to invasions of privacy that can be perceived as gross demonstrations of governmental power without limits. Courts have routinely upheld the constitutionality of privacy invasions on the poor, and legal scholars typically understand marginalized populations to have "weak versions" of the privacy rights everyone else enjoys. Khiara M. Bridges investigates poor mothers' experiences with the state—both when they receive public assistance and when they do not. Presenting a holistic view of just how the state intervenes in all facets of poor mothers' privacy, Bridges shows how the Constitution has not been interpreted to bestow these women with family, informational, and reproductive privacy rights. Bridges seeks to turn popular thinking on its head: Poor mothers' lack of privacy is not a function of their reliance on government assistance—rather it is a function of their not bearing any privacy rights in the first place. Until we disrupt the cultural narratives that equate poverty with immorality, poor mothers will continue to be denied this right.

Architecture as a Way of Seeing and Learning

The built environment as an added educator in East African refugee camps

UCL Press At the beginning of 2020, 66 long-term refugee camps existed along the East African Rift. Millions of young children have been born at the camps and have grown up there, yet it is unknown how their surrounding built environments affect their learning and development. *Architecture as a Way of Seeing and Learning* presents an architect's take on questions many academics and humanitarians ask. Is it relevant to look at camps through an urban lens and focus on their built environment? Which analytical benefits can architectural and design tools provide to refugee assistance and specifically to young children's learning? And which advantages can assemblage thinking and situated knowledges bring about in analysing, understanding and transforming long-term refugee camps? Responding to the extreme lack of information about East African camps, Nerea Amorós Elorduy has built contextualised knowledge – nuanced, situated and participatory – to describe, study and transform the East African long-term camps, and uncover hidden agencies in refugee assistance. She uses architecture as a means to create new knowledge collectively, include more local voices and speculate on how to improve the educational landscape for young children. With this book, Amorós Elorduy brings nuance, contextualisation and empathy to the study and management of long-term refugee camps in East Africa. It is empathy, she argues, that will help change mindsets, decolonise humanitarian refugee assistance and its study. Crossing architecture, humanitarian aid and early childhood development, this book offers many practical learnings.

Ethics and Global Security

A cosmopolitan approach

Routledge *This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice, and offers the reader a concrete ethics for global security. Questions of morality and ethics have long been central to global security, from the death camps, world wars and H-bombs of the 20th century, to the humanitarian missions, tsunamis, terrorism and refugees of the 21st. This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory, policy and international law, across a range of pressing global challenges. The book highlights how, from patrolling a territorial border to maintaining armed forces, security practices have important ethical implications, by excluding some from consideration, presenting others as potential threats and exposing them to harm, and licensing particular actions. While many scholars and practitioners of security claim little interest in ethics, ethics clearly has an interest in them. This innovative book extends the traditional agenda of war and peace to consider the ethics of force short of war such as sanctions, deterrence, terrorism, targeted killing, and torture, and the ethical implications of new security concerns such as identity, gender, humanitarianism, the responsibility to protect, and the global ecology. It advances a concrete ethics for an era of global threats, and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just, stable and inclusive global order. This book fills an important gap in the literature and will be of much interest to students of ethics, security studies and international relations.*

Ending Extreme Inequality

An Economic Bill of Rights to Eliminate Poverty

*Routledge Poverty and inequality are at record levels. Today, forty-seven million Americans live in poverty, while the median is in decline. The top 20 percent now controls 89 percent of all wealth. These conditions have renewed demands for a new economic Bill of Rights, an idea proposed by F. D. Roosevelt, Truman and Martin Luther King, Jr. The new Economic Bill of Rights has a coherent plan and proclaims that all Americans have the right to a job, a living wage, a decent home, adequate medical care, good education, and adequate protection from economic fears of unemployment, sickness and old age. Integrating the latest economic and social data, *Ending Extreme Inequality* explores each of these rights. Each chapter includes: an analysis of the social problems surrounding each right; a historical overview of the attempts to right these wrongs; and assessments of current solutions offered by citizens, community groups and politicians. These contemporary, real-life solutions to inequality can inspire students and citizens to become involved and open pathways toward a more just society.*

Macroeconomic Measurement Versus Macroeconomic Theory

Routledge Ideally, scientific theory and scientific measurement should develop in tandem, but in recent years this has not been the case in economics. There used to be a time when leading economists, or their students, established or led statistical offices and took care that the measurements were consistent with the theory (and vice versa). Not anymore. Macroeconomic theorists and macroeconomic statisticians do not even speak the same language any longer. They do use the same words, such as 'consumption', 'investments' or 'unemployment' but the meanings can often be different. This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual, historical and, in some cases,

ideological origins. It also explores the possible policy implications. In doing so, the book draws on two separate strands of literature which are seldom used in unison: macro-statistical manuals and theoretical macro-papers. By doing so, the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should, in the end, be based upon individual people and households and their social and cultural embedding instead of a 'representative consumer', or Robinson Crusoe figure. This work is essential reading for students, economists, statisticians, and professionals.

The China-Pakistan Economic Corridor of the Belt and Road Initiative

Concept, Context and Assessment

Springer *This book focuses on the implementation of the China-Pakistan Economic Corridor (CPEC), a multi-billion-dollar infrastructure development project intended to connect Asia with Europe, the Middle East and Africa. By introducing a new analytical approach to the study of economic corridors, it gauges the anticipated economic and geopolitical impacts on the region and discusses whether the CPEC will serve as a pioneer project for future regional cooperation between and integration of sub-national regions such as Balochistan, Khyber Pakhtunkhwa, the Federally Administered Tribal Areas, and Gilgit-Baltistan. Further, it explores the interests, expectations and policy approaches of both Chinese and Pakistani local and central governments with regard to the CPEC's implementation. Given its scope, the book will appeal to regional and spatial sciences scholars, as well as social scientists interested in the regional impacts of economic corridors. It also offers valuable information for policymakers in countries participating in the Belt-and-Road Initiative or other Chinese-supported development projects.*

Developmental Science and Sustainable Development Goals for Children and Youth

Springer *This book presents new scientific knowledge on using developmental science to improving lives of children and youth across the globe. It highlights emerging pathways to sustainability as well as the interconnectedness and interdependence of developmental science and sustainable children and youth development globally. Presenting cross-cultural views and current perspectives on the role of developmental science in the realization of the Sustainable Development Goals for children and youth development, contributors from different disciplines from low-and-middle-income countries or scholars working in these countries capture ground realities of the situation of children and youth in these regions. This book addresses developmental issues related to inequity, gender, health, education, social protection, and needs of vulnerable populations of children and youth. Other areas of focus are improving mechanisms and monitoring frameworks of development and well-being indicators.*

The Regulation of Consumer Credit

A Transatlantic Analysis

Edward Elgar Publishing This incisive book gives a comprehensive overview of the regulation of consumer credit in both the US and the UK. It covers policy, procedure and the dynamics of the consumer credit relationship to advocate for a balanced approach in achieving more effective consumer protection.

Brexit and Agriculture

Routledge Acknowledging the challenges and opportunities raised by Brexit for the agri-food supply chain and agricultural policies across the UK, this book provides the first in-depth analysis of agricultural policy developments across the UK's four nations rooted in strong theoretical and practical underpinnings. Arguing that the four nations could be more ambitious in departing from the Common Agricultural Policy and extending beyond the 'public money for public goods' approach adopted across the UK, it critiques the core attributes of their policies with focuses including the debate over outcome-based schemes, governance mechanisms, impacts on farm diversity and path dependency on the Common Agricultural Policy and English approaches. It promotes a 'resilient agriculture' paradigm and utilises social-ecological services, net zero, agroecology and agri-food democracy as the main pathways to achieve this. In doing so, it scrutinises the evolving contextual, political and legal landscape within which devolved and UK agricultural policies are developing from a multilevel governance perspective, examining the implications of WTO law for the UK and its devolved administrations to determine environmental, food and animal welfare standards under the GATT, the SPS and TBT Agreements and financial support schemes under the Agreement on Agriculture. The book assesses the significance of the Northern Ireland Protocol, the Trade and Cooperation Agreement with the EU and other free trade agreements for standards across the UK and access to markets. From a domestic perspective, challenges to devolution and the stability of the Union are highlighted. Elements of unilateral recentralisation are visible via financing mechanisms, the UK Internal Market Act and the Agriculture Act. The book's interdisciplinary nature makes it of interest to lawyers, political scientists, economists, human geographers and scientists, as well as policy-makers, agricultural communities, civil society organisations and think tanks in the devolved administrations, the UK, the EU and beyond.

Building Communities of Engaged Readers

Reading for pleasure

Routledge Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

Secured Transactions Law Reform in Africa

Bloomsbury Publishing Over the last few decades, many countries have reformed their secured transactions law. One of the main reasons has been the clear link between reform and the availability of credit, and the drive to improve access to finance, particularly for micro, small and medium-sized enterprises. This book focuses particularly on developing economies in Africa, which have legal frameworks influenced by English, French, Belgian, Roman-Dutch and other laws. Reform in this area of law across African countries has taken a number of forms, which are explored and discussed in this book. Secured Transactions Law Reform in Africa is a mixture

of a critical description of the pre-reform law and practice, and the reform process itself. It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms. The book sets out a road map for the future of secured transactions reform; primarily in Africa, but also in other countries that have undertaken or are contemplating similar reforms. This book is the second in a series of books about Secured Transactions Law in countries around the world, and its reform, both on a national and an international scale. The first book, Secured Transactions Law Reform: Principles, Policies and Practice, was published in 2016.

Cochrane Handbook for Systematic Reviews of Interventions

Wiley Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

The Fracking Debate

The Risks, Benefits, and Uncertainties of the Shale

Revolution

Columbia University Press Over roughly the past decade, oil and gas production in the United States has surged dramatically—thanks largely to technological advances such as high-volume hydraulic fracturing, more commonly known as “fracking.” This rapid increase has generated widespread debate, with proponents touting economic and energy-security benefits and opponents highlighting the environmental and social risks of increased oil and gas production. Despite the heated debate, neither side has a monopoly on the facts. In this book, Daniel Raimi gives a balanced and accessible view of oil and gas development, clearly and thoroughly explaining the key issues surrounding the shale revolution. *The Fracking Debate* directly addresses the most common questions and concerns associated with fracking: What is fracking? Does fracking pollute the water supply? Will fracking make the United States energy independent? Does fracking cause earthquakes? How is fracking regulated? Is fracking good for the economy? Coupling a deep understanding of the scholarly research with lessons from his travels to every major U.S. oil- and gas-producing region, Raimi highlights stories of the people and communities affected by the shale revolution, for better and for worse. *The Fracking Debate* provides the evidence and context that have so frequently been missing from the national discussion of the future of oil and gas production, offering readers the tools to make sense of this critical issue.

Research Methods for Sports Studies

Taylor & Francis This comprehensive, accessible and practical textbook provides a complete grounding in both qualitative and quantitative research methods for the sports studies student. The book offers the reader a step-by-step guide to the research process, from designing a research project, to collecting and analyzing data, to reporting the research, and is richly illustrated throughout with sport-related case-studies and examples from around the world. Now in a fully revised and updated new edition, the book covers key topics such as: choosing an appropriate research design undertaking a literature review key research techniques, including questionnaires, interviews, content analysis and ethnographic studies data analysis, including an introduction to SPSS, as well as guides to descriptive and inferential statistics writing a research report ethical issues in sports research. *Research Methods in Sports Studies* is designed to be a complete and self-contained companion to any research methods course and contains a wealth of useful features, such as highlighted definitions of key terms, revision questions, practical research exercises, and a companion website with web links, multiple choice questions, powerpoint slides, and other learning resources. The book is also an invaluable reference for any student undertaking a dissertation or research project as part of their studies. Visit the companion website at:

Hispanic Serving Institutions (HSIs) in Practice

Defining "Servingness" at HSIs

*IAP As the general population of Latinxs in the United States burgeons, so does the population of college-going Latinx students. With more Latinxs entering college, the number of Hispanic Serving Institutions (HSIs), which are not-for-profit, degree granting postsecondary institutions that enroll at least 25% Latinxs, also grows, with 523 institutions now meeting the enrollment threshold to become HSIs. But as they increase in number, the question remains: What does it mean to serve Latinx students? This edited book, *Hispanic Serving Institutions (HSIs) in Practice: Defining "Servingness" at HSIs*, fills an important gap in the literature. It features the stories of faculty, staff, and administrators who are defining "servingness" in practice at HSIs. Servingness is conceptualized as the ability of HSIs to enroll and educate Latinx students through a culturally enhancing approach that centers Latinx ways of knowing and being, with the goal of providing transformative experiences that lead to both academic and non-academic outcomes. In this book, practitioners tell their stories of success in defining servingness at HSIs. Specifically, they provide empirical and practical evidence of the results and outcomes of federally funded HSI grants, including those funded by Department of Education Title III and V grants. This edited book is ideal for higher education practitioners and scholars searching for best practices for HSIs in the United States.*

Administrators at HSIs, including presidents, provosts, deans, and boards of trustees, will find the book useful as they seek out ways to effectively serve Latinx and other minoritized students. Faculty who teach in higher education graduate programs can use the book to highlight practitioner engaged scholarship. Legislators and policy advocates, who fight for funding and support for HSIs at the federal level, can use the book to inform and shape a research-based Latinx educational policy agenda. The book is essential as it provides a framework that simplifies the complex phenomenon known as servingness. As HSIs become more significant in the U.S. higher education landscape, books that provide empirically based, practical examples of servingness are necessary.

EU Bioeconomy Economics and Policies: Volume I

Springer Nature *This two-volume book provides an important overview to EU economic and policy issues related to the development of the bioeconomy. What have been the recent trends and what are the implications for future economic development and policy making? Where does EU bioeconomy policy sit within an international context and what are the financial frameworks behind them? Volume I explores the economic theory of bioeconomy policy, as well as European integration, European agriculture, EU budget and future developments in EU agriculture policies.*

Rapport sur le développement humain 2019

Au-delà des revenus, des moyennes et du temps présent - les inégalités de développement humain au XXIe siècle

United Nations *Inégalités de développement humain constituent une entrave à la réalisation du Programme de développement durable à l'horizon 2030. Elles ne se résument pas à des écarts de revenus et de richesses, et l'on ne peut en rendre compte au moyen de simples indicateurs synthétiques unidimensionnels. Elles détermineront aussi les perspectives de ceux et celles qui seront peut-être encore vivants au XXIe siècle. Le Rapport étudie les inégalités de développement humain en allant au-delà des revenus, des moyennes et du temps présent. Il s'interroge sur les formes d'inégalités qui comptent et leurs moteurs, reconnaissant que les inégalités pernicieuses sont généralement mieux perçues comme un symptôme de problèmes d'une plus grande ampleur dans une société ou une économie. Il cherche également à déterminer quelles politiques sont susceptibles de s'attaquer à ces moteurs et des politiques qui peuvent aider les pays à faire avancer leur économie tout en améliorant le développement humain et en réduisant les inégalités.*
