## The Key Code and Advanced Handbook for the Governance and Supervision of Banks in Australia

*Springer Nature This Key Code and Handbook examines the corporate governance and accountability of Major Banks, their directors and executives which were the central focus of bank, Supervisor, Regulator and governmental activity and public scrutiny in 2018 and 2019. This book explores this responsibility focus by providing evidence from the Global Financial Crisis and beyond with both APRA and ASIC investigating illegal conduct, misconduct and conduct which was below the level of community expectations. This book discusses how the Royal Commission into misconduct in the banking and financial services industry has already given rise to a detailed Final Report whose recommendations are still being put into effect. Further, this book uses evidence provided by the large number of Prudential Standards issued by APRA and investigations into the conduct of Major Banks by Regulators. This book explores governance variables – over 1,700 in number and grouped into 159 ‘key groupings’ or separate categories – which are all indexed to 28 governmental, regulatory and supervisory reports and documents to create a governance code and commentary specifically tailored to Australian banks. Each governance variable is modelled on the Stage 1 Relational Approach contained in Enhancing Firm Sustainability Through Governance. Given the huge interest in the governance of banks, Parts 1 and 2 – explaining the Relational Approach - of Stage 1 were recently published in November 2018 and June 2019 in the Australian Journal of Corporate Law. This book is the largest reference book and handbook in publication worldwide containing the structures, mechanisms, processes and protocols – the checks and balances we call ‘governance variables’ – that deeply addresses and explains banking accountability and regulation in Australia.*

## The Cambridge Handbook of Shareholder Engagement and Voting

*Cambridge University Press All over the world, companies play an important role in the economy. Different types of stakeholders hold the reins in these companies. An important class are the shareholders that finance the activities of these companies. In return, stakeholders have a say on how these companies should be organized and structure their activities. This is primarily done through voting and engaging. These mechanisms of voting and engaging allow the shareholders to decide significant aspects of the company structure, from who governs it to how much directors are paid. However, how shareholders vote and engage and how far their rights*

stretch are organized differently in different countries. This pioneering book provides insights into what rights these shareholders have and how the shareholders of companies in nineteen different jurisdictions participate in corporate life through voting and engaging. Comparative and international in scope, it pays particular attention to how jurisdictions align and differ around the world.

# Community Nutrition for Developing Countries

*Athabasca University Press and UNISA Press Nutrition textbooks used by universities and colleges in developing countries have very often been written by scholars who live and work in North America or the United Kingdom. And while the research and information they present is sound, the nutrition-related health challenges with which developing countries must grapple differ considerably from those found in highly industrialized Western nations. The primary aim of Community Nutrition for Developing Countries is to provide a book that meets the needs of nutritionists and other health professionals living and working in developing countries. Written by both scholars and practitioners, the volume draws on their wealth of knowledge, experience, and understanding of nutrition in developing countries to provide nutrition professionals with all the information they require. Each chapter addresses a specific nutrition challenge currently faced by developing countries such as food security, food safety, disease prevention, maternal health, and effective nutrition policy. In addition, the volume serves as an invaluable resource for those developing and implementing nutrition education programmes. With an emphasis on nutritional education as a means to prevent disease and effectively manage health disorders, it is the hope of the nearly three dozen contributors to this work that it will enhance the health and well-being of low-income populations throughout the world.*
