BULLDOZER

DEMOLITION AND CLEARANCE OF THE POSTWAR LANDSCAPE

Yale University Press Although the decades following World War II stand out as an era of rapid growth and construction in the United States, those years were equally significant for large-scale destruction. In order to clear space for new suburban tract housing, an ambitious system of interstate highways, and extensive urban renewal development, wrecking companies demolished buildings while earthmoving contractors leveled land at an unprecedented pace and scale. In this pioneering history, Francesca Russello Ammon explores how postwar America came to equate this destruction with progress. The bulldozer functioned as both the means and the metaphor for this work. As the machine transformed from a wartime weapon into an instrument of postwar planning, it helped realize a landscape-altering "culture of clearance." In the hands of the military, planners, politicians, engineers, construction workers, and even children's book authors, the bulldozer became an American icon. Yet social and environmental injustices emerged as clearance projects continued unabated. This awareness spurred environmental, preservationist, and citizen participation efforts that have helped to slow, though not entirely stop, the momentum of the postwar bulldozer.

THE MOM TEST

HOW TO TALK TO CUSTOMERS & LEARN IF YOUR BUSINESS IS A GOOD IDEA WHEN EVERYONE IS LYING TO YOU

Robfitz Ltd *The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little . As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.*

BAIT AND SWITCH

HUMAN RIGHTS AND U.S. FOREIGN POLICY

Routledge It has become routine for the US government to invoke human rights to justify its foreign policy decisions and military ventures. But this human rights talk has not been supported by a human rights walk. Policy makers consistently apply a double

standard for human rights norms: one the rest of the world must observe, but which the US can safely ignore. Based on extensive interviews with leading foreign policy makers, military officials, and human rights advocates, Mertus tells the story of how America's attempts to promote human rights abroad have, paradoxically, undermined those rights in other countries. The second edition brings the story up-to-date, including new sections on the second half of the Bush administration and the Iraq War, and updates on Afghanistan. The first edition of Bait and Switch won the American Political Science Association's 2005 Best Book on Human Rights.

HOW REAL ESTATE DEVELOPERS THINK

DESIGN, PROFITS, AND COMMUNITY

*University of Pennsylvania Press Cities are always changing: streets, infrastructure, public spaces, and buildings are constantly being built, improved, demolished, and replaced. But even when a new project is designed to improve a community, neighborhood residents often find themselves at odds with the real estate developer who proposes it. Savvy developers are willing to work with residents to allay their concerns and gain public support, but at the same time, a real estate development is a business venture financed by private investors who take significant risks. In *How Real Estate Developers Think*, Peter Hendee Brown explains the interests, motives, and actions of real estate developers, using case studies to show how the basic principles of development remain the same everywhere even as practices vary based on climate, local culture, and geography. An understanding of what developers do and why they do it will help community members, elected officials, and others participate more productively in the development process in their own communities. Based on interviews with over a hundred people involved in the real estate development business in Chicago, Miami, Portland (Oregon), and the Twin Cities of Minneapolis and St. Paul, *How Real Estate Developers Think* considers developers from three different perspectives. Brown profiles the careers of individual developers to illustrate the character of the entrepreneur, considers the roles played by innovation, design, marketing, and sales in the production of real estate, and examines the risks and rewards that motivate developers as people. Ultimately, *How Real Estate Developers Think* portrays developers as creative visionaries who are able to imagine future possibilities for our cities and communities and shows that understanding them will lead to better outcomes for neighbors, communities, and cities.*

THE CLASH OF IDEAS IN WORLD POLITICS

TRANSNATIONAL NETWORKS, STATES, AND REGIME CHANGE, 1510-2010

Princeton University Press Some blame the violence and unrest in the Muslim world on Islam itself, arguing that the religion and its history is inherently bloody. Others blame the United States, arguing that American attempts to spread democracy by force have destabilized the region, and that these efforts are somehow radical or unique. Challenging these views, *The Clash of Ideas in World Politics* reveals how the Muslim world is in the throes of an ideological struggle that extends far beyond the Middle East, and how struggles like it have been a recurring feature of international relations since the dawn of the modern European state. John Owen examines more than two hundred cases of forcible regime promotion over the past five centuries, offering the first systematic study of this common state practice. He looks at conflicts between Catholicism and Protestantism between 1520 and the 1680s; republicanism and monarchy between 1770 and 1850; and communism, fascism, and liberal democracy from 1917 until the late 1980s. He shows how regime promotion can follow regime unrest in the eventual target state or a war involving a great power, and how this can provoke elites across states to polarize according to ideology. Owen traces how conflicts arise and ultimately fade as one ideology wins favor with more elites in more countries, and he demonstrates how the struggle between secularism and Islamism in Muslim countries today reflects broader transnational trends in world history.

NEW ORLEANS AND THE DESIGN MOMENT

Routledge Following the disaster of Hurricane Katrina in New Orleans, people began to discuss and visualize the ways in which the urban structure of the city could be reorganized. Rather than defining the disaster recovery process as simply a matter of rebuilding

the existing city, these voices called for a more radical rethinking of the city's physical, social and environmental systems. This idea of disaster as an opportunity for urban restructuring is a hallmark of a "design moment." Design moments are different from the incremental process of urban growth and development. Instead of gradual growth and change, design moments present the opportunity for a significant restructuring of urban form that can shape the city for decades to come. As such, a design moment presents a critical juncture in the historical growth and development of a city. In this book we explore the question: what does urban design have to do with a disaster like Hurricane Katrina? Focused on New Orleans, the authors explore different dimensions of the post-disaster design moment, including the politics of physical redevelopment, the city's history and identity, justice and the image of the city, demolition and housing development, and the environmental aspects of the recovery process. This book was published as a special issue of the Journal of Urban Design.

HOUSES FOR A NEW WORLD

BUILDERS AND BUYERS IN AMERICAN SUBURBS, 1945-1965

Princeton University Press The fascinating history of the twentieth century's most successful experiment in mass housing While the work of Frank Lloyd Wright, Richard Neutra, and their contemporaries frequently influences our ideas about house design at the midcentury, most Americans during this period lived in homes built by little-known builders who also served as developers of the communities. Often dismissed as "little boxes, made of ticky-tacky," the tract houses of America's postwar suburbs represent the twentieth century's most successful experiment in mass housing. Houses for a New World is the first comprehensive history of this uniquely American form of domestic architecture and urbanism. Between 1945 and 1965, more than thirteen million houses—most of them in new ranch and split-level styles—were constructed on large expanses of land outside city centers, providing homes for the country's rapidly expanding population. Focusing on twelve developments in the suburbs of Boston, Philadelphia, Chicago, and Los Angeles, Barbara Miller Lane tells the story of the collaborations between builders and buyers, showing how both wanted houses and communities that espoused a modern way of life—informal, democratic, multiethnic, and devoted to improving the lives of their children. The resulting houses differed dramatically from both the European International Style and older forms of American domestic architecture. Based on a decade of original research, and accompanied by hundreds of historical images, plans, and maps, this book

presents an entirely new interpretation of the American suburb. The result is a fascinating history of houses and developments that continue to shape how tens of millions of Americans live. Featured housing developments in Houses for a New World: Boston area: Governor Francis Farms (Warwick, RI) Wethersfield (Natick, MA) Brookfield (Brockton, MA) Chicago area: Greenview Estates (Arlington Heights, IL) Elk Grove Village Rolling Meadows Weathersfield at Schaumburg Los Angeles and Orange County area: Cinderella Homes (Anaheim, CA) Panorama City (Los Angeles) Rossmoor (Los Alamitos, CA) Philadelphia area: Lawrence Park (Broomall, PA) Rose Tree Woods (Broomall, PA)

BULLDOZER REVOLUTIONS

A RURAL HISTORY OF THE METROPOLITAN SOUTH

University of Georgia Press By examining the metropolitan fringes of Houston in Montgomery County, Texas, and Washington, D.C., in Loudoun County, Virginia, this book combines rural, environmental, and agricultural history to disrupt our view of the southern metropolis. Andrew C. Baker examines the local boosters, gentlemen farmers, historical preservationists, and nature-seeking suburbanites who abandoned the city to live in the metropolitan countryside during the twentieth century. These property owners formed the vanguard of the antigrowth movement that has defined metropolitan fringe politics across the nation. In the rural South, subdivisions, reservoirs, homesteads, and historical villages each obscured the troubling legacies of racism and rural poverty and celebrated a refashioned landscape. That landscape's historical and environmental "authenticity" served as a foil to the alienation and ugliness of suburbia. Using a source base that includes the records of preservation organizations and local, state, and federal government agencies, as well as oral histories, Baker explores the distinct roots of the environmental politics and the shifting

relationship between city and country within these metropolitan fringe regions.

COMMUNITY PLANNING

INTEGRATING SOCIAL AND PHYSICAL ENVIRONMENTS

John Wiley & Sons This key planning textbook on designing healthy and sustainable communities informs planners about community life and the processes of planning and equips them with the essential knowledge and skills they need to organise change and improve the quality of urban living. The author examines the impacts of social and economic change on community life and organization and explores ways in which these changes can be planned and managed. Community planning is presented as a means to balance and integrate beneficial change with the maintenance of valued cultural traditions and life styles. This involves bringing together fields of study and practice including urban and regional planning, design, communication, housing, community organization, employment, transport, and governance. Links drawn between personal values, human activities, physical spaces and societal governance assist this process of synthesis. Establishing a common vocabulary to discuss planning - for urban and regional planners, including health planners; and open space planners - enables both students and practitioners to work with each other and with those for whom they provide services to create stronger, healthier and more sustainable communities. The aims and roles of community planning are explored and the key planning operations are explained, including the phases and applications of community planning method; the planning and location of community facilities; the roles of design in shaping responsive community spaces; and the capacity of different types of community governance to improve the relations between citizens and societies. The book is organized into two main parts: after the first three chapters have established the interests and scope of community planning, the next six each moves from an account of issues and theoretical concerns, through a review of case studies, to summaries of leading practice. This positive approach is intended to encourage readers to develop their own capacities for effective participation and action. The concluding chapter draws together the contributions of preceding ones to demonstrate the integrity of the community planning process Supplementary website:

These diseases are associated with poverty, and in school-age populations in developing countries, intestinal helminth infections rank first among the causes of all communicable and noncommunicable diseases. This book is based on papers presented at an OECD conference, held in Bali, Indonesia in February 2000, which sought to review activities for the control of diseases due to soil-transmitted helminth infections in Indonesia and neighbouring countries.

MEANWHILE GARDENS

THINK LIKE A MONK

TRAIN YOUR MIND FOR PEACE AND PURPOSE EVERY DAY

Simon & Schuster Jay Shetty, social media superstar and host of the #1 podcast *On Purpose*, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity -How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the *Forbes* magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than

8 billion views, and his podcast, *On Purpose*, is consistently ranked the world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

THE MONKEY WRENCH GANG

Rosetta Books A motley crew of saboteurs wreak outrageous havoc on the corporations destroying America's Western wilderness in this classic, comic extravaganza. When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate coconspirators. And the manic, beer-guzzling, rabidly antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, *The Monkey Wrench Gang* is an outrageous romp with ultra-serious undertones that is as relevant today as it was in the early days of the environmental movement. The author who Larry McMurtry (*Lonesome Dove*) once dubbed "The Thoreau of the American West" has written a true comedic classic with brains, heart, and soul that more than justifies the call from the *Los Angeles Times Book Review* that we should all "praise the earth for Edward Abbey!"

WE HAVE NEVER BEEN MODERN

Harvard University Press With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His

book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape. *We Have Never Been Modern* blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.
