CCTV

NETWORKING AND DIGITAL TECHNOLOGY

Elsevier Closed circuit television (CCTV) is experiencing a leap in technology using digital techniques, networking and the Internet. The new edition of this high-level professional reference retains the particulars that made the first edition a success, including the details of CCD cameras, lenses, coaxial cables, fiber-optics, and system design, but it is expanded to cover all video compression techniques used in the ever increasing assortment of digital video recorders (DVRs) available on the market today. This new edition of the book CCTV demystifies DVR technology. It also serves to clarify the technology of data networking. The theoretical section explains the various compression techniques. Networking is also a new and unknown area for many CCTV installers and this is explained in a brand new section. New edition more accessible

CYCLE INFRASTRUCTURE DESIGN

Stationery Office/Tso Encouraging more people to cycle is increasingly being seen as a vital part of any local authority plan to tackle congestion, improve air quality, promote physical activity and improve accessibility. This design guide brings together and updates guidance previously available in a number of draft Local Transport Notes and other documents. Although the focus is the design of cycle infrastructure, parts of its advice are equally appropriate to improving conditions for pedestrians. Individual chapters cover: general design parameters; signing issues; network management; reducing vehicle speeds on cycle routes; bus and tram routes; cycle lanes; off-road cycle routes; junctions; cycle track crossings; cycle parking; public transport integration. A list of references and an appendix of related publications complete the book. It is hoped that, by bringing together relevant advice in a single document, this guide will make it easier for local authorities to decide what provision, if any, is required to encourage more people to cycle.

CCTV

A TECHNOLOGY UNDER THE RADAR?

Routledge Central state and non-covert surveillance began in earnest at the start of the twentieth century. By the start of the twenty-first century, the UK was one of the most surveilled societies on earth. This groundbreaking volume by Inga Kroener analyses the particular combination of factors that have created this surveillance state. Kroener argues against the inevitability of the rise of CCTV that is so often found in this literature, to map out the early history of CCTV, tracing its development from a tool for education, safety and transport during the 1950s, to one of politics in the 1970s and 1980s, to eventually become a tool of surveillance during the 1990s. Within this analysis, the complex role of the public in 'allowing' the widespread and rapid dissemination of CCTV is discussed and the representation of CCTV in the media is also studied. This volume will be of interest to all

scholars working in the fields of surveillance studies; science, technology and society departments; and social historians more generally.

NATURAL VENTILATION FOR INFECTION CONTROL IN HEALTH-CARE SETTINGS

World Health Organization This guideline defines ventilation and then natural ventilation. It explores the design requirements for natural ventilation in the context of infection control, describing the basic principles of design, construction, operation and maintenance for an effective natural ventilation system to control infection in health-care settings.

STERILE SERVICES DEPARTMENT

The Stationery Office Provides guidance to help health planners, estates and facilities managers, sterile services managers and capital planning and design teams to plan and design a sterile services department. It discusses the objectives of a sterile services department (SSD) and service requirements, particularly focusing on: raising standards in decontamination services by optimising the built environment: service requirements strategy: calculating the optimum capacity of an SSD to eradicate bottlenecks: determining the most appropriate location of an SSD. Design guidance based on the above service objectives is outlined. Finally, the finer details of the individual spaces within an SSD are discussed.

CAMERA MAINTENANCE AND REPAIR

BOOK 1 FUNDAMENTAL TECHNIQUES

Amherst Media, Incorporated This book builds on the basics, and teaches techniques that refine your camera repair skills. Whether you tinker with cameras or own a repair shop, this book is a necessity. The ideal companion to the top selling Camera Maintenance & Repair (Book 1). Clear step-by-step techniques for repair of popular, modern cameras; over 175 detailed photos & illustrations show camera parts and the specifics of disassembly and repair; and special instructions for over 100 camera models and lenses - from Bronica to Zuiko!

QUALITY ASSURANCE FOR SPECT SYSTEMS

The objective of this publication is to provide professionals in nuclear medicine centres with quality assurance procedures for the scintillation camera, computer system and digital image display. It is intended to be a resource for medical physicists, technologists and other healthcare professionals who are responsible for ensuring optimal performance of imaging instruments, particularly SPECT systems, in their respective institutions. It may also be useful to managers, clinicians and other decision makers who are responsible for implementing quality assurance/quality control programmes in nuclear medicine centres.

INTELLIGENT NETWORK VIDEO

UNDERSTANDING MODERN VIDEO SURVEILLANCE SYSTEMS, SECOND EDITION

CRC Press Continuing in the tradition of the bestselling first edition, this book examines networked surveillance video solutions. It provides the latest details on industry hardware, software, and networking capabilities of the latest cameras and DVRs. It addresses in full detail updated specifications on MPEG-4 and other digital video formats, resolution advantages of analog v. digital, intelligent video capabilities, frame rate control, and indoor/outdoor installations factors. New chapters include cloud computing, standards, and thermal cameras.

SURVEILLANCE CAMERA CODE OF PRACTICE

This code of practice provides guidance on the appropriate and effective use of surveillance camera systems by relevant authorities in England and Wales who must have regard to the code when exercising any functions to which the code relates. Other operators and users of surveillance camera systems in England and Wales are encouraged to adopt the code voluntarily. The purpose of the code will be to ensure that individuals and wider communities have confidence that surveillance cameras are deployed to protect and support them, rather than spy on them. Sections cover the background, purpose of the code, scope of the surveillance activity to which this code applies and effect of the code. Chapters include an overview and guiding principles; the development or use of surveillance camera systems; the use or processing of images or other information obtained by virtue of such systems, and the Surveillance Camera Commissioner.

HANDBOOK OF RELIABILITY, AVAILABILITY, MAINTAINABILITY AND SAFETY IN ENGINEERING DESIGN

Springer Science & Business Media This handbook studies the combination of various methods of designing for reliability, availability, maintainability and safety, as well as the latest techniques in probability and possibility modeling, mathematical algorithmic modeling, evolutionary algorithmic modeling, symbolic logic modeling, artificial intelligence modeling and object-oriented computer modeling.

FOOD SAFETY MANAGEMENT

A PRACTICAL GUIDE FOR THE FOOD INDUSTRY

Academic Press Food Safety Management: A Practical Guide for the Food Industry with an Honorable Mention for Single Volume Reference/Science in the 2015 PROSE Awards from the Association of American Publishers is the first book to present an integrated, practical approach to the management of food safety throughout the production chain. While many books address specific aspects of food safety, no other book guides you through the various risks associated with each sector of the production process or alerts you to the measures needed to mitigate those risks. Using practical examples of incidents and their root causes, this book highlights pitfalls in food safety management and provides key insight into the means of avoiding them. Each section addresses its subject in terms of relevance and application to food safety and, where applicable, spoilage. It covers all types of risks (e.g., microbial, chemical, physical) associated with each step of the food chain. The book is a reference for food safety managers in different sectors, from primary producers to processing, transport, retail and distribution, as well as the food services sector. Honorable Mention for Single Volume Reference/Science in the 2015 PROSE Awards from the Association of American Publishers Addresses risks and controls (specific technologies) at various stages of the food supply chain based on food type, including an example of a generic HACCP study Provides practical guidance on the implementation of elements of the food safety assurance system Explains the role of different stakeholders of the food supply

PREVENTING VIOLENCE TO RETAIL STAFF

Provides guidance for retailers and their staff on how the problems and causes of violence might be tackled. Aimed at staff in the retail sector such as senior managers, shop owners, managers and employees. Contents: Violence - what is violence? Who is at risk? What causes it? Policy - developing a policy statement, consulting staff, reporting procedures; Prevention - training, networking; Support - post incident support, victim support, police liaison and court procedures.

INTELLIGENT MULTIMEDIA SURVEILLANCE

CURRENT TRENDS AND RESEARCH

Springer Science & Business Media Intelligent multimedia surveillance concerns the analysis of multiple sensing inputs including video and audio streams, radio-frequency identification (RFID), and depth data. These data are processed for the automated detection and tracking of people, vehicles, and other objects. The goal is to locate moving targets, to understand their behavior, and to detect suspicious or abnormal activities for crime prevention. Despite its benefits, there is societal apprehension regarding the use of such technology, so an important challenge in this research area is to balance public safety and privacy. This edited book presents recent findings in the field of intelligent multimedia surveillance emerging from disciplines such as multimedia computing, computer vision, and artificial intelligence. It consists of nine chapters addressing intelligent video surveillance, video analysis of crowds, privacy issues in intelligent multimedia surveillance, RFID technology for localization of objects, object tracking using visual saliency information, estimating multiresolution depth using active stereo vision, and performance evaluation for video surveillance systems. The book will be of value to researchers and practitioners working on related problems in security, multimedia, and artificial intelligence.

FORMATIVE RESEARCH IN SOCIAL MARKETING

INNOVATIVE METHODS TO GAIN CONSUMER INSIGHTS

Springer This book brings together the state of the art and current debates in the field of formative research, and examines many of the innovative methods largely overlooked in the available literature. This book will help social marketing to move beyond surveys and focus groups. The book addresses the needs of social marketing academics and practitioners alike by providing a robust and critical academic discussion of cutting-edge research methods, while demonstrating at the same time how each respective method can help us arrive at a deeper understanding of the issues that social marketing interventions are seeking to remedy. Each chapter includes a scholarly discussion of key formative research methods, a list of relevant internet resources, and three key readings for those interested in extending their understanding of the method. Most chapters also feature a short case study demonstrating how the methods are used.

THE MAXIMUM SURVEILLANCE SOCIETY

THE RISE OF CCTV

Routledge The use of Closed-Circuit Television, or CCTV, has dramatically increased over the past decade, but its presence is often so subtle as to go unnoticed. Should we unthinkingly accept that increased surveillance is in the public's best interests, or does this mean that 'Big Brother' is finally watching us? This book asks provocative questions about the rise of the maximum surveillance society. Is crime control the principal motivation behind increased surveillance or are the reasons more complex? Does surveillance violate peoples' right of privacy? Who gets surveilled and why? What are its implications for social control? Does surveillance actually reduce crime? What will developments in technology mean for the future of surveillance? What rights do individuals under surveillance have? How is the information gathered through CCTV used by the authorities? Based on extensive fieldwork on automated surveillance in Britain over a two-year period, this book not only attempts to answer these vexing questions, but also provides a wealth of detailed information about the reasoning behind and effects of social control.

MATHEMATICAL MODELS FOR SYSTEMS RELIABILITY

CRC Press Evolved from the lectures of a recognized pioneer in developing the theory of reliability, *Mathematical Models for Systems Reliability* provides a rigorous treatment of the required probability background for understanding reliability theory. This classroom-tested text begins by discussing the Poisson process and its associated probability laws. It then uses a number of stochastic models to provide a framework for life length distributions and presents formal rules for computing the reliability of nonrepairable systems that possess commonly occurring structures. The next two chapters explore the stochastic behavior over time of one- and two-unit repairable systems. After covering general continuous-time Markov chains, pure birth and death processes, and transitions and rates diagrams, the authors consider first passage-time problems in the context of systems reliability. The final chapters show how certain techniques can be applied to a variety of reliability problems. Illustrating the models and methods with a host of examples, this book offers a sound

introduction to mathematical probabilistic models and lucidly explores how they are used in systems reliability problems.

HANDBOOK ON BATTERY ENERGY STORAGE SYSTEM

Asian Development Bank This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

COVERT SURVEILLANCE

DRAFT CODE OF PRACTICE ; PURSUANT TO SECTION 71 OF THE REGULATION OF INVESTIGATORY POWERS ACT 2000

Stationery Office Books (TSO) This code of practice provides guidance on the use of covert surveillance by public authorities under Part II of the Regulation of Investigatory Powers Act 2000, and on entry on, or interference with, property (or with wireless telegraphy) under section 5 of the Intelligence Services Act 1994 or Part III of the Police Act 1997. It replaces the 'Intrusive surveillance code of practice' (ISBN 0113411715) issued in 1999 pursuant to section 101(3) of the Police Act 1997.

STREETS FOR ALL

ADVICE FOR HIGHWAY AND PUBLIC REALM WORKS IN HISTORIC PLACES

This guidance, together with the Streets for All regional documents, provides updated practical advice for anyone involved in planning and implementing highways and other public realm works in sensitive historic locations, including highways engineers, planners and urban and landscape designers. It looks at making improvements to public spaces without harm to their valued character, including specific recommendations for works to surfaces, street furniture, new equipment, traffic management infrastructure and environmental improvements. It draws on experience of Historic England's planning teams in highways and public realm schemes, including case studies showing where highways works and other public realm schemes have successfully integrated with and enhanced areas of historic or architectural sensitivity. This guidance has been prepared by Rowan Whimster and builds on the text published in 2004 with the subsequent Streets for All series. It has been prepared with assistance from the Department for Transport and is supported by the Chartered Institute of Highways and Transportation.

BIM FOR HERITAGE

DEVELOPING A HISTORIC BUILDING INFORMATION MODEL

This guidance on Building Information Modelling for heritage (Historic BIM) offers guidance for owners, end-users and professionals in the fields of heritage and construction. By raising awareness of the potential advantages of a BIM approach, this guidance will help users successfully implement BIM in heritage projects. Historic BIM is, by definition, a multi-disciplinary process that requires the input and collaboration of professionals with very different skillsets. It is also a fast-developing field in terms of research, official guidance, standards and professional practice. This publication addresses the issues surrounding the production and use of BIM for history buildings, and provides information about guidance and standards available elsewhere for managing a building's entire life cycle effectively.

THE AUTOMATED CITY

INTERNET OF THINGS AND UBIQUITOUS ARTIFICIAL INTELLIGENCE

Springer Nature The book outlines the concept of the Automated City, in the context of smart city research and development. While there have been many other perspectives on the smart city such as the participatory city and the data-centric city, this book focuses on automation for the smart city based on current and emerging technologies such as the Internet of Things, Artificial Intelligence and Robotics. The book attempts to provide a balanced view, outlining the promises and potential of the Automated City as well as the perils and challenges of widespread automation in the city. The book discusses, at some depth, automated vehicles, urban robots and urban drones as emerging technologies that will automate many aspects of city life and operation, drawing on current work and research literature. The book also considers broader perspectives of the future city, in the context of automation in the smart city, including aspirational visions of cities, transportation, new business models, and socio-technological challenges, from urban edge computing, ethics of the Automated City and smart devices, to large scale cooperating autonomous systems in the city.

COLOR MANAGEMENT AND QUALITY OUTPUT: WORKING WITH COLOR FROM CAMERA TO DISPLAY TO PRINT

(THE DIGITAL IMAGING MASTERS SERIES)

Routledge We have all felt the frustration of wasting time, paper, and effort when our prints or web images don't match the images we see on our monitors. Fortunately, you're holding the resource that will help solve these problems. This book guides you through the hardware settings and software steps you'll need to post professional images and make stunning prints that showcase your artistic vision. In Color Management & Quality Output, Tom P. Ashe, a color expert and gifted teacher, shows you how to color manage your files from input all the way through output, by clearly explaining how color works in our minds, on our monitors and computers, and through our printers. You'll learn to: properly calibrate your monitor understand Adobe Photoshop color settings build and evaluate color profiles for all your devices navigate the print menu in both Photoshop and Lightroom appreciate the differences between inkjet prints and C-prints optimize sharpening for a variety of print media understand how and why to use RIPs communicate with creative professionals, clients, and output service providers to ensure the highest quality results. This book is part of The Digital Imaging Masters Series, which features cutting-edge

information from the most sought-after and qualified professionals and instructors in the photography field. Based on the progressive curriculum of the Masters of Professional Studies in Digital Photography created by Katrin Eismann at the School of Visual Arts in New York City, these books are the next best thing to being in the classroom with the Digital Photography Masters themselves.

INDEPENDENT INQUIRY INTO INEQUALITIES IN HEALTH

REPORT

Stationery Office/Tso This Report addresses an issue which is fundamentally a matter of social justice; namely that although the last 20 years have brought a marked increase in prosperity and substantial reductions in mortality to the people of this country as a whole, the gap in health between those at the top and bottom of the social scale has widened. Yet there is convincing evidence that, provided an appropriate agenda of policies can be defined and given priority, many of these inequalities are remediable. The same is true for those that exist between the various ethnic groups and between the sexes.

VIDEO SURVEILLANCE SYSTEMS FOR USE IN SECURITY APPLICATIONS

QUALITY CONTROL, RELIABILITY, AND ENGINEERING DESIGN

CRC Press For the first time in a single volume, quality control, reliability, and design engineers have a comprehensive overview of how each of their disciplines interact to achieve optimum product and/or project success. Thoroughly covering every stage of each phase, this outstanding reference provides detailed discussions of techniques and methods, ensuring cost-effective and time-saving procedures ... contains over 80 solved problems -- as well as numerous end-of-chapter exercises -- for reinforcement of essential material ... presents a complete, relevant mathematics chapter that eliminates the need to refer to other math texts ... offers self-contained chapters with introductions, summaries, and extensive references for quick, easy reading and additional study. Quality Control, Reliability, and Engineering Design is a key, on-the-job source for quality control, reliability, and design engineers and managers; system engineers and managers; and mechanical, electrical and electronic, industrial, and project engineers and managers. The book also serves as an ideal reference for professional seminars and in-house training programs, as well as for upper-level undergraduate and graduate courses in Quality Control, Reliability, Quality Control and Reliability, and Quality Control of Engineering Design. A COMPANION TO CRIMINAL JUSTICE, MENTAL HEALTH AND RISK

Policy Press Within the domains of criminal justice and mental health care, critical debate concerning 'care' versus 'control' and 'therapy' versus 'security' is now commonplace. Indeed, the 'hybridisation' of these areas is now a familiar theme. This unique and topical text provides an array of expert analyses from key contributors in the field that explore the interface between criminal justice and mental health. Using concise yet robust definitions of key terms and concepts, it consolidates scholarly analysis of theory, policy and practice. Readers are provided with practical debates, in addition to the theoretical and ideological concerns surrounding the risk assessment, treatment, control and risk management in a cross-disciplinary context. Included in this book is recommended further reading and an index of legislation, making it an ideal resource for students at undergraduate and postgraduate level, together with researchers and practitioners in the field.

TELEMATICS - SUPPORT FOR TRANSPORT

14TH INTERNATIONAL CONFERENCE ON TRANSPORT SYSTEMS TELEMATICS, TST 2014, KATOWICE/KRAKOW/USTRON, POLAND, OCTOBER 22-25, 2014. PROCEEDINGS

Springer This book constitutes the proceedings of the 14th International Conference on Transport Systems Telematics, TST 2014, held in Katowice/Kraków and Ustroń, Poland, in October 2014. The 49 papers included in this volume were carefully reviewed and selected from 125 submissions. The papers provide an overview of solutions being developed in

the fields of transport telematics and intelligent transport systems.
