THE INNOVATIVE CIO

HOW IT LEADERS CAN DRIVE BUSINESS TRANSFORMATION

[Apress](#) "Does your organization fumble when it comes to innovation? 'The Innovative CIO' presents a pragmatic guide to overcoming the 10 'innovation killers' within your company." --Dennis McCafferty "CIO Insight", 1/23/2013 (www.cioinsight.com/it-management/innovation/slideshows/ten-ways-to-kill-innovation/) "Are you unwittingly stifling your employees' entrepreneurial spirit? 'The Innovative CIO' discusses 'innovation killers' that could be holding back your small business or startup." --Paul Shread "TIME/Business & Money", 1/29/2013 (business.time.com/2013/01/29/removing-barriers-to-innovation/#ixzz2JSrUID3A) The Chief Information Officer's influence in the business organization has been waning for years. The rest of the C-suite has come to regard Information Technology as slow, costly, error-prone, boring, and unresponsive to business needs. This perception blinds company leaders to the critical value IT can deliver and threatens the competitive health and long-term survival of their enterprise. The modern CIO must reassert the operational and strategic importance of technology to the enterprise and reintegrate it with every department and level of the business from boardroom to mailroom. IT leaders must design, sell, and implement a vigorous culture of IT competence and innovation that pervades the enterprise. The culture must be rooted in bidirectional exchange across organizations and C-level policies that drive technology innovation as the engine of business innovation. The authors, international IT strategists and innovators, quantify the benefits and risks of IT innovation, survey and rank the myriad innovation opportunities from mature, new, and emerging technologies, and identify the organizational structures and processes that have been proven to deliver ongoing innovation. Buttressing their brief with dozens of case studies and specific examples, The Innovative CIO shows you how to: Take advantage of the IT and business innovation opportunities created by new and emerging technologies Shift IT innovation from afterthought to prime mover in strategic business planning Inject IT into the dynamic core of your organization's culture, training, structure, practice, and policy

[Seven Stories Press](#) Truthout's Progressive Pick of the Week Ralph Nader's 10 Books to Provoke Conversation in 2014 Every year since 1976, Project Censored, our nation's oldest news-monitoring group--a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of

Mickey Huff--has produced a Top-25 list of underreported news stories and a book, *Censored*, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to an international panel of judges. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse, Censored Deja Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, *Censored* is one of the strongest lifesigns of our current collective desire to get the news we citizens need--despite what Big Media tells us.

HOW TO WATCH TELEVISION

[NYU Press](#) We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis--suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds. GLOBAL PRODUCTION

FIRMS, CONTRACTS, AND TRADE STRUCTURE

Princeton University Press Global Production is the first book to provide a fully comprehensive overview of the complicated issues facing multinational companies and their global sourcing strategies. Few international trade transactions today are based on the exchange of finished goods; rather, the majority of transactions are dominated by sales of individual components and intermediary services. Many firms organize global production around offshoring parts, components, and services to producers in distant countries, and contracts are drawn up specific to the parties and distinct legal systems involved. Pol Antràs examines the contractual frictions that arise in the international system of production and how these frictions influence the world economy. Antràs discusses the inevitable complications that develop in contract negotiation and execution. He provides a unified framework that sheds light on the factors helping global firms determine production locations and other organizational choices. Antràs also implements a series of systematic empirical tests, based on recent data from the U.S. Customs and Census Offices, which demonstrate the relevance of contractual factors in global production decisions. Using an integrated approach, Global Production is an excellent resource for researchers, graduate students, and advanced undergraduates interested in the inner workings of international economics and trade.

FIXATION

HOW TO HAVE STUFF WITHOUT BREAKING THE PLANET

Our massive, global system of consumption is broken. Our individual relationship with our stuff is broken. In each of our homes, some stuff is broken. And the strain of rampant consumerism and manufacturing is breaking our planet. We need big, systemic changes, from public policy to global economic systems. Since founding Fixup, a pop-up repair shop that brought her coverage in The New York Times, Salon, New York Public Radio, and more, Sandra Goldmark has become a leader in the movement to demand better "stuff" and to bring companies on board. Her solution is surprisingly simple and involves all of us: have good stuff, not too much, mostly reclaimed, care for it, and pass it on. Fixation charts the path to the next frontier in the health, wellness, and environmental movements--learning how to value stewardship over waste. Passionate, wise, and practical, Fixation offers us a new understanding of stuff by building a value chain where good design, reuse, and repair are the status quo.
