Since the first edition of this book was published, there has been considerable change across public health, health visiting and community nursing. The positive emphasis on developing and describing all services in relation to their purpose and client/user group is reflected in this second, emphasizing multi-disciplinarity and service focus rather than individual professions, whilst retaining the essential emphasis on policy and practice. Familiar occupational titles, such as health visitor, community development worker, midwife or nurse are still used within the chapters, recognizing the continued division of labour and major contributions to public health made by specific grass roots occupations. This second edition has been completely reorganised, expanded and updated to keep up with the rapid progress across the field of community public health. 'Key issues' boxes identify major topics within each chapter Discussion questions stimulate debate Boxes present information in a reader friendly, memorable format Each chapter provides extensive research, conceptual critique, information about sources, and resources for further information. Seven totally new chapters on Partnership Working; Parenting and Family Support; Complex Community-based Initiatives; Leadership through Alongsideness; Quality in a Public Health Service and Immunization Four chapters completely rewritten: Health Needs Assessments; Collaborating for Health; Breastfeeding and Public Health; Safeguarding Children All remaining chapters have been substantially updated. **Introduction to Public Health - E-Book** Elsevier Health Sciences This text introduces students to the core concepts and principles of public health: the nature and scope of public health; its history; an introduction to health determinants and epidemiology; evidence-based practice in public health and understanding public health data plus more. **Educational Audiology Handbook, Third Edition** Plural Publishing Educational Audiology Handbook, Third Edition, offers a roadmap for audiologists who work in schools or other providers who support school-based audiology services. Sharpe An explanation of how and why the economic downturn of 2007 became the Great Recession of 2008 and 2009. It explores the root causes of the cycle of boom and bust of the economy. It describes social equity in terms of its arguments and claims in political, economic, and social circumstances. **Handbook of Global Media Ethics** Springer Nature This handbook is one of the first comprehensive research and teaching tools for the developing area of global media ethics. The advent of new media that is global in reach and impact has created the need for a journalism ethics that is global in principles and aims. For many scholars, teachers and journalists, the existing journalism ethics, e.g. existing codes of ethics, is too parochial and national. It fails to provide adequate normative guidance for a media that is digital, global and practiced by professional and citizen. A global media ethics is being constructed to define what responsible public journalism means for a new global media era. Currently, scholars write texts and codes for global media, teach global media ethics, analyse how global issues should be covered, and gather together at conferences, round tables and meetings. However, the field lacks an authoritative handbook that presents the views of leading thinkers on the most important issues for global media ethics. This handbook is a milestone in the field, and a major contribution to media ethics. **Stroke Rehabilitation E-Book A Function-Based Approach** Elsevier Health Sciences Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's *Stroke Rehabilitation: A Function-Based Approach*, 5th Edition. Using a holistic and multidisciplinary approach, this unique text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. This new fifth edition has been extensively updated to include the research, trends, and best practices in the field. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Case studies challenge you to apply rehabilitation concepts to realistic scenarios. Evidence-based clinical trials and outcome studies clearly outline the basis for stroke interventions. A survivor's perspective is included in one chapter to give you a better understanding of the stroke rehabilitation process from the client point-of-view. Multidisciplinary approach highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. Review questions in each chapter help you assess your understanding of rehabilitation concepts. Key terms and chapter objectives at the beginning of each chapter help you study more efficiently. NEW! Revised and expanded content keeps you up to date on the latest information in all areas of stroke rehabilitation. NEW! Updated references reflect the changes that have been made in the field. NEW! It is written specifically to meet the needs of nursing students undertaking the common foundation programme. It aims to explain how and why sensitive, holistic and evidence-based nursing care is carried out. Therefore it is relevant to students who will enter all branches of nursing and includes material that is both common to all and specific to each branch. The book aims to provide all students on foundation nursing and health care programmes with material of sufficient depth/breadth to achieve the NMC outcomes required for entry into the branch programmes. There is an emphasis not only on the theory that underpins nursing practice in the common foundation programme but also on nursing skills which form an increasingly emphasized part of the programme. The chapters have been reviewed by experts from each branch and also clinical skills to ensure the content reflects each branch accurately and appropriately. Emphasis on clinical skills & lifelong learning Realistic scenarios reinforce the need for patient/client-centred care with a holistic approach Activity boxes for all branches and age groups in each chapter ensure relevance to nurses in diverse settings An integrated approach to health promotion with activity boxes emphasises

that health maintenance and promotion are central to contemporary nursing practice Reflection, critical thinking and research/appraisal skills are encouraged with a problem centred approach that will help to develop the skills needed to provide sensitive and effective, high quality care and to integrate theory with practice The emphasis on nursing/clinical skills underlines the importance of core skills - an integral part of the patient/client experience Cultural diversity is a core theme throughout The importance of evidence-based practice is highlighted and the text helps readers are assisted to acquire the skills to provide evidence-based care A wide range of general and branch-specific interactive boxes help to develop an understanding of some issues in other branches as well as the core issues that affect all nurses. Self- test questions and answers provide an opportunity for readers to take responsibility for and check their learning. Valuable learning tools are included: glossary of key terms, useful websites and references

Open Educational Resources (OER) Pedagogy and Practices IGI Global Access to learning materials has been an issue within education that has had a profound impact on student outcomes and equality among students. New strategies for promoting more equal access to these materials began within institutions of higher learning and can be adapted at lower levels to facilitate equity within educational systems. Open Educational Resources (OER) Pedagogy and Practices is a comprehensive research publication that explores open access to educational materials and its impact on educational cost, educational equity, and poverty. Featuring a range of topics such as instructional design, pedagogy, and gamification, this book is essential for teachers, curriculum developers, instructional designers, principals, school boards, educational professionals, academicians, professors, administrators, educational policymakers, researchers, and educational agencies.

Clinical Pharmacy and Therapeutics E-Book Elsevier Health Sciences 'This new edition of Clinical Pharmacy and Therapeutics was really very helpful when I was doing an MSc course in Advancing Pharmacy Practice and it was really very helpful in all the clinical diseases I have to read for my PBL. I also used it as one of my most reliable reference books for the in-course simulation ward rounds and other clinical case studies. It is a great book to have as a practising clinical or hospital pharmacist or even community pharmacist. It will also be of great use to anyone doing a course in pharmacotherapy. This book will always be of use to you throughout your studentship or when practising after graduation. It is also more portable than most other pharmacotherapy textbooks with the same amount of information.' Now in its sixth edition, this best-selling, multi-disciplinary textbook continues to draw on the skills of pharmacists, clinicians and nurses to present optimal drug regimens. The authors integrate an understanding of the disease processes with an appreciation of the pathophysiological processes, clinical pharmacy and the evidence base. Each chapter is co-written by a pharmacist and a clinician, and each chapter begins with key points and ends with cases to test understanding. The sixth edition is now on StudentConsult for the first time, giving online access to the full text. Key points boxes at the beginning of each chapter Case-study boxes throughout the chapters Each chapter co-written by a pharmacist and a clinician In-depth treatment of therapeutics to support pharmaceutical prescribing Logical order and format: key points, epidemiology, aetiology, disease, clinical manifestations, investigations and treatment, drugs used in treatment. Myles' Textbook for Midwives E-Book Elsevier Health Sciences Written by midwives for midwives, Myles Textbook for Midwives has been the seminal textbook of midwifery for over 60 years. It offers comprehensive coverage of topics fundamental to 21st midwifery practice. Co-edited for the second time, by internationally renowned midwife educationalists, Professor Jayne E Marshall and Maureen D Raynor from the United Kingdom with a team of contributors from across the midwifery community it retains its clear, accessible writing style. Most chapters provide useful case studies, websites of key organisations and charities for individuals to access further information. Reflective questions at the end of each chapter as well as annotated further reading aid reflective learning and stimulate discussions relating to continuing professional development. The book covers key frameworks that govern midwifery practice, exploring ethical and legal frameworks that are essential to every accountable, autonomous, professional midwife. Includes employer-led models of supervision, vital elements of leadership and clinical governance that supports the provision of high quality maternity services and standards of midwifery practice. The concept of resilience is introduced for the reader to contemplate their personal contribution in creating an environment that is conducive to protecting the wellbeing of themselves and colleagues within the workplace. The text covers the UN 2030 Agenda for Sustainable Development, highlighting the importance of midwives as global citizens with common goals, and together they form a strong global community prepared to challenge social inequalities and take action to help end extreme poverty. Covers designing and implementing high quality midwifery care using evidence, policy and models of care. Highlights why a holistic and evidence-informed approach is necessary to achieve effective care for all. Working examples will help the reader to think critically about their own practice. For this edition several new chapters are introduced covering concealed pregnancy, fear of childbirth (tocophobia), care of the acutely unwell woman and end of life issues including rights of the fetus/neonate and ethical considerations.
