## Venice and the Veneto during the Renaissance: the Legacy of Benjamin Kohl

*Firenze University Press* **Benjamin G. Kohl (1938-2010)** taught at Vassar College from 1966 till his retirement as **Andrew W. Mellon Professor of the Humanities** in 2001. His doctoral research at The Johns Hopkins University was directed by **Frederic C. Lane**, and his principal historical interests focused on northern Italy during the Renaissance, especially on Padua and Venice. His scholarly production includes the volumes *Padua under the Carrara, 1318-1405* (1998), and *Culture and Politics in Early Renaissance Padua* (2001), and the online database *The Rulers of Venice, 1332-1524* (2009). The database is eloquent testimony of his priority attention to historical sources and to their accessibility, and also of his enthusiasm for collaboration and sharing among scholars.

## Survival In Auschwitz

*Simon and Schuster* **The author describes his twenty month ordeal in the Nazi death camp.**

## Networked

## The New Social Operating System

*MIT Press* **How social networks, the personalized Internet, and always-on mobile connectivity are transforming—and expanding—social life. Daily life is connected life, its rhythms driven by endless email pings and responses, the chimes and beeps of continually arriving text messages, tweets and retweets, Facebook updates, pictures and videos to post and discuss. Our perpetual connectedness gives us endless opportunities to be part of the give-and-take of networking. Some worry that this new environment makes us isolated and lonely. But in Networked, Lee Rainie and Barry Wellman show how the large, loosely knit social circles of networked individuals expand opportunities for learning, problem solving, decision making, and personal interaction. The new social operating system of “networked individualism” liberates us from the restrictions of tightly knit groups; it also requires us to develop networking skills and strategies, work on maintaining ties, and balance multiple overlapping networks. Rainie and Wellman outline the “triple revolution” that has brought on this transformation: the rise of social networking, the capacity of the Internet to empower individuals, and the always-on connectivity of mobile devices. Drawing on extensive evidence, they examine how the move to networked individualism has expanded personal relationships beyond households and neighborhoods; transformed work into less hierarchical, more team-driven enterprises; encouraged individuals to create and share content; and changed the way people obtain information. Rainie and Wellman guide us through the challenges and opportunities of living in the evolving world of networked individuals.**

## Visualising Facebook

### A Comparative Perspective

*UCL Press* Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.

### Flotsam

*Andersen Press Limited* A bright, science-minded boy goes to the beach equipped to collect and examine flotsam—anything floating that has been washed ashore. Bottles, lost toys, small objects of every description are among his usual finds. But there's no way he could have prepared for one particular discovery: a barnacle-encrusted underwater camera, with its own secrets to share . . . and to keep.

### Digital Anthropology

*Taylor & Francis* Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

### The Gift

## The Form and Reason for Exchange in Archaic Societies

*Routledge* First published in 1990. Routledge is an imprint of Taylor & Francis, an informa company.

### Books and Culture

### Europe and Empire

## On the Political Forms of Globalization

*Fordham Univ Press* The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

## Flatland

### A Romance of Many Dimensions

In a two-dimensional universe populated by a hierarchical society of geometric figures, a square is persecuted for attempting to reveal its new knowledge of a third dimension, learned from encounters with a sphere.

### The Rise of the Network Society

*John Wiley & Sons* This first book in Castells' groundbreaking trilogy, with a substantial new preface, highlights the economic and social dynamics of the information age and shows how the network society has now fully risen on a global scale. Groundbreaking volume on the impact of the age of information on all aspects of society Includes coverage of the influence of the internet and the net-economy Describes the accelerating pace of innovation and social transformation Based on research in the USA, Asia, Latin America, and Europe

### English-Only Europe?

### Challenging Language Policy

*Routledge* **English-Only Europe?** explores the role of languages in the process of European integration. Languages are central to the development of an integrated Europe. The way in which the European Union deals with multilingualism has serious implications for both individual member countries and international relations. In this book, Robert Phillipson considers whether the contemporary expansion of English represents a serious threat to other European languages. After exploring the implications of current policies, Phillipson argues the case for more active language policies to safeguard a multilingual Europe. Drawing on examples of countries with explicit language policies such as Canada and South Africa, the book sets out Phillipson's vision of an inclusive language policy for Europe, and describes how it can be attained.

### Gender in Translation

*Routledge* **Gender in Translation** is a broad-ranging, imaginative and lively look at feminist issues surrounding translation studies. Students and teachers of translation studies, linguistics, gender studies and women's studies will find this unprecedented work invaluable and thought-provoking reading. Sherry Simon argues that translation of feminist texts - with a view to promoting feminist perspectives - is a cultural intervention, seeking to create new cultural meanings and bring about social change. She takes a close look at specific issues which include: the history of feminist theories of language and translation studies; linguistic issues, including a critical examination of the work of Luce Irigaray; a look at women translators through history, from the Renaissance to the twentieth century; feminist translations of the Bible; an analysis of the ways in which French feminist texts such as De Beauvoir's *The Second Sex* have been translated into English.

### The Vulnerable Subject

### Beyond Rationalism in International Relations

*Springer* This book develops a concept of vulnerability in International Relations that allows for a profound rethinking of a core concept of international politics: means-ends rationality. It explores traditions that proffer a more complex and relational account of vulnerability.

### The Cloven Viscount

*Houghton Mifflin Harcourt* When a nobleman is split in two, his separate halves pursue different adventures in a fantastically macabre tale by the author of *Invisible Cities*. It is the seventeenth century, and the Viscount Medardo of Terralba must go into battle against the Turks. But the inexperienced warrior is soon bisected lengthwise by a cannonball. Through a miracle of stitching, one half of him survives, returning to his feudal estate to lead a lavishly evil life. But soon his other, virtuous half appears—also very much alive. When the two halves become rivals for the love of the same woman, there's no telling the lengths each will go to in order to win. Now available in an independent volume for the first time, this deliciously bizarre novella of is Calvino at his most devious and winning.

### The EPZ Conflict of Interpretations

*A&C Black* Paul Ricoeur (1913-) is Professor Emeritus of Philosophy at the University of Chicago and Dean of the Faculty of Letters and Human Sciences at the University of Paris X, Nanterre. One of the foremost contemporary French philosophers, his work is influenced by Husserl, Marcel and Jaspers and is particularly concerned with symbolism, the

creation of meaning and the interpretation of texts. The Conflict of Interpretations ranges across an astonishing diversity of fields: structuralism, linguistics, psychoanalysis, religion and faith. The essays it comprises are bound together by Ricoeur's customary concern for interpretation and language and all bear the stamp of the systematic and critical thinking which has become his hallmark in contemporary philosophy. Edited by Don Ihde>

## English Medium Instruction

*Oxford University Press* Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at [www.oup.com/elt/teacher/emi](http://www.oup.com/elt/teacher/emi) Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university. Oxford Applied Linguistics Series Advisers: Anne Burns and Diane Larsen-Freeman

## On Tyranny

*University of Chicago Press* On Tyranny is Leo Strauss's classic reading of Xenophon's dialogue, Hiero or Tyrannicus, in which the tyrant Hiero and the poet Simonides discuss the advantages and disadvantages of exercising tyranny. This edition includes a translation of the dialogue, a critique of the commentary by the French philosopher Alexandre Kojève, Strauss's restatement of his position in light of Kojève's comments, and finally, the complete Strauss-Kojève correspondence. "Through [Strauss's] interpretation Xenophon appears to us as no longer the somewhat dull and flat author we know, but as a brilliant and subtle writer, an original and profound thinker. What is more, in interpreting this forgotten dialogue, Strauss lays bare great moral and political problems that are still ours." —Alexandre Kojève, Critique "On Tyranny is a complex and stimulating book with its 'parallel dialogue' made all the more striking since both participants take such unusual, highly provocative positions, and so force readers to face substantial problems in what are often wholly unfamiliar, even shocking ways." —Robert Pippin, History and Theory "Every political scientist who tries to disentangle himself from the contemporary confusion over the problems of tyranny will be much indebted to this study and inevitably use it as a starting point."—Eric Voegelin, The Review of Politics Leo Strauss (1899-1973) was the Robert Maynard Hutchins Distinguished Service Professor of Political Science at the University of Chicago.

## Il femminismo degli anni Settanta

## Selections from the Prison Notebooks of Antonio Gramsci

*INTERNATIONAL PUBLISHERS CO* An extensive anthology, including his most important writings while in prison on philosophy, history, Communist Party formation, the intellectuals, and other subjects.

## The Myth of the Paperless Office

*MIT Press* An examination of why paper continues to fill our offices and a proposal for better coordination of the paper and digital worlds. Over the past thirty years, many people have proclaimed the imminent arrival of the paperless office. Yet even the World Wide Web, which allows almost any computer to read and display another computer's documents, has increased the amount of printing done. The use of e-mail in an organization causes an average 40 percent increase in paper consumption. In The Myth of the Paperless Office, Abigail Sellen and Richard Harper use the study of paper as a way to understand the work that people do and the reasons they do it the way they do. Using the tools of ethnography and cognitive psychology, they look at paper use from the level of the individual up to that of organizational culture. Central to Sellen and Harper's investigation is the concept of "affordances"—the activities that an object allows, or affords. The physical properties of paper (its being thin, light, porous, opaque, and flexible) afford the human actions of grasping, carrying, folding, writing, and so on. The concept of affordance allows them to compare the affordances of paper with those of existing digital devices. They can then ask what kinds of devices or systems would make new kinds of activities possible or better support current activities. The authors argue that paper will continue to play an important role in office life. Rather than pursue the ideal of the paperless office, we should work toward a future in which paper and electronic document tools work in concert and organizational processes make optimal use of both.

# Translation, Rewriting, and the Manipulation of Literary Fame

*Taylor & Francis* One of the first books to shine a light on the broad scope of translation studies, this Routledge Translation Classic is widely regarded as a pillar of the discipline. Authored by one of the most influential translation theorists of the twentieth century, *Translation, Rewriting, and the Manipulation of Literary Fame* shows how rewriting - translation, anthologization, historiography, criticism, editing - influences the reception and canonization of works of literature. Firmly placing the production and reception of literature within the wider framework of a culture and its history, André Lefevere explores how rewriting manipulates works of literature to ideological and artistic ends, and demonstrates how rewriting a text can give it a new, sometimes subversive, historical or literary status. Ranging across various literatures, including Classical Latin, French, and German, and here reissued with a new foreword by Scott G. Williams, this is a seminal text for all students and specialists in translation studies, literary theory, and comparative and world literature.

## After Babel

### Aspects of Language and Translation

*New York : Oxford University Press* When it first appeared in 1975, *After Babel* created a sensation, quickly establishing itself as both a controversial and seminal study of literary theory. In the original edition, Steiner provided readers with the first systematic investigation since the eighteenth century of the phenomenology and processes of translation both inside and between languages. Taking issue with the principal emphasis of modern linguistics, he finds the root of the "Babel problem" in our deep instinct for privacy and territory, noting that every people has in its language a unique body of shared secrecy. With this provocative thesis he analyzes every aspect of translation from fundamental conditions of interpretation to the most intricate of linguistic constructions. For the long-awaited second edition, Steiner entirely revised the text, added new and expanded notes, and wrote a new preface setting the work in the present context of hermeneutics, poetics, and translation studies. This new edition brings the bibliography up to the present with substantially updated references, including much Russian and Eastern European material. Like the towering figures of Derrida, Lacan, and Foucault, Steiner's work is central to current literary thought. *After Babel, Third Edition* is essential reading for anyone hoping to understand the debates raging in the academy today.

## Reasoned and Unreasoned Images

### The Photography of Bertillon, Galton, and Marey

*Penn State Press* "Examines three projects in late nineteenth-century scientific photography: the endeavors of Alphonse Bertillon, Francis Galton, and Etienne-Jules Marey. Develops new theoretical perspectives on the history of photographic technology, as well as the history of scientific imaging more generally"--

## Mathematical Challenges from

### Theoretical/Computational Chemistry

*National Academies Press* Computational methods are rapidly becoming major tools of theoretical, pharmaceutical, materials, and biological chemists. Accordingly, the mathematical models and numerical analysis that underlie these methods have an increasingly important and direct role to play in the progress of many areas of chemistry. This book explores the research interface between computational chemistry and the mathematical sciences. In language that is aimed at non-specialists, it documents some prominent examples of past successful cross-fertilizations between the fields and explores the mathematical research opportunities in a broad cross-section of chemical research frontiers. It also discusses cultural differences between the two fields and makes recommendations for overcoming those differences and generally promoting this interdisciplinary work.

## Postproduction

## Culture as Screenplay : how Art Reprograms the World

The French writer Nicolas Bourriaud discusses how, since the early nineties, an ever increasing number of artworks have been created on the basis of preexisting works; more and more artists interpret, reproduce, re-exhibit, or use works made by others or available cultural products. This art of postproduction seems to respond to the proliferating chaos of global culture in the information age, which is characterized by an increase in the supply of works and the art worlds annexation of forms ignored or disdained until now. First published in 2002, this 2nd edition contains a new foreword where the author reflects on how the art of postproduction developed over the last couple of years. Nicolas Bourriaud is the co-director of the Palais de Tokyo in Paris. His previous books include *L'ère tertiaire* (Flammarion), *Éthétique relationnelle* (Presses du réel), and *Formes de vie* (Denoël).

## Handbook of Ecotoxicology

*John Wiley & Sons* The Handbook of Ecotoxicology provides a readily accessible, yet critical collection of information on ecotoxicological testing. Now available in a single paperback volume, this handbook represents excellent value. Part A concentrates on techniques, especially those tests used for prediction. Thorough descriptions of the main tests are provided, followed by critical analyses in terms of ease of handling, repeatability and ecological relevance, and finally, an extensive bibliography citing key documents describing test methods and key papers evaluating them. Part B focuses on the toxicants themselves: summarising their ecological effects, describing ways of predicting effects from physico-chemical properties alone, and describing and discussing fate models. Now available as a single volume in paperback An invaluable reference resource

## AARP Shrink Yourself

## Break Free from Emotional Eating Forever

*John Wiley & Sons* AARP Digital Editions offer you practical tips, proven solutions, and expert guidance. Studies show that the reason why many people gain weight—and keep it on—is emotional eating, not physical eating. Now Dr. Roger Gould, a psychotherapist and a leading authority on emotional eating, shows how to overcome fear, anxiety, and other stresses and stop using food as an over-the-counter tranquilizer that can cause weight gain. With 12 practical ways to stop emotional eating and an eight-session program, Dr. Gould helps you become your own eating therapist and shrink yourself for good.

## Ithaca Forever

## Penelope Speaks, A Novel

*University of California Press* After twenty years, Odysseus finally returns to Ithaca, but instead of receiving the homecoming he had hoped for finds himself caught in an intense battle of wills with his faithful and long-suffering wife Penelope. When Penelope recognizes him under the guise of a beggar, she becomes furious with him for not trusting her enough to include her in his plans for ridding the palace of the Suitors. As a result, she plays her own game of fictions to make him suffer for this lack of faith, inspiring jealousy, self-doubt, and misgivings in her husband, the legendary Homeric hero. In this captivating retelling of the Odyssey, Penelope rises as a major force with whom to be reckoned. Shifting between first-person reflections, Ithaca Forever reveals the deeply personal and powerful perspectives of both wife and husband as they struggle for respect and supremacy within a marriage that has been on hold for twenty years. Translated by PEN award-winner Douglas Grant Heise, Luigi Malerba's novel gives us a remarkable version of this greatest work of western literature: Odysseus as a man full of doubts and Penelope as a woman of great depth and strength.

## From Novice to Expert

### Excellence and Power in Clinical Nursing Practice

*Pearson* This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. For nurses and healthcare professionals.

## What Makes Us Think?

### A Neuroscientist and a Philosopher Argue about Ethics, Human Nature, and the Brain

*Princeton University Press* Will understanding our brains help us to know our minds? Or is there an unbridgeable distance between the work of neuroscience and the workings of human consciousness? In a remarkable exchange between neuroscientist Jean-Pierre Changeux and philosopher Paul Ricoeur, this book explores the vexed territory between these divergent approaches--and comes to a deeper, more complex perspective on human nature. Ranging across diverse traditions, from phrenology to PET scans and from Spinoza to Charles Taylor, *What Makes Us Think?* revolves around a central issue: the relation between the facts (or "what is") of science and the prescriptions (or "what ought to be") of ethics. Changeux and Ricoeur ask: Will neuroscientific knowledge influence our moral conduct? Is a naturally based ethics possible? Pursuing these questions, they attack key topics at the intersection of philosophy and neuroscience: What are the relations between brain states and psychological experience? Between language and truth? Memory and culture? Behavior and action? What is a mental representation? How does a sign relate to what it signifies? How might subjective experience be constructed rather than discovered? And can biological or cultural evolution be considered progressive? Throughout, Changeux and Ricoeur provide unprecedented insight into what neuroscience can--and cannot--tell us about the nature of human experience. Changeux and Ricoeur bring an unusual depth of engagement and breadth of knowledge to each other's subject. In doing so, they make two often hostile disciplines speak to one another in surprising and instructive ways--and speak with all the subtlety and passion of conversation at its very best.

## Medieval Women Writers

This is one of the first anthologies devoted to the writings of women in the Middle Ages. The fifteen women whose works are represented span seven centuries, eight languages, and ten regions or nationalities. Many are recognized, taught, and anthologized in their own countries but have been inaccessible to students in English. Others are little read today because their literary fortunes have paralleled fluctuations in literary taste and literary patronage. Katharina M. Wilson's introduction to the volume places these writers in historical context and explores the question of the female imagination and who these women were who were writing at a time when very few women were literate and most literature, sacred and secular, was penned by men. Each of the fifteen chapters has been written by a different scholar and includes a biographical and critical introduction to the writer, a representative selection of her works in translation, and a bibliography.

## Brave New World Revisited

*Turtleback Books* Describes the shocking scientific devices and techniques available to any group in a position to manipulate society

## What is this Buzzing, Do You Hear it Too?

An amusing and amused writer, Malerba is a curious man: curious about language, history, customs, plots and coincidences of life. ... The author of *What Is This Buzzing, Do You Hear It Too?* is always maliciously ironic, alternating clues to ambiguities.

# Principles of Marketing

**An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.**
