Yet, writing instruction in schools often focuses on traditional methods such as the composition of five-paragraph essays or the adherence to proper grammatical conventions. While these are two components of writing instruction and preparation in education, they only provide a small glimpse into the depth and breadth of writing. As such, writing instruction is increasingly complex and requires multiple perspectives and levels of skill among teachers. The Handbook of Research on Writing Instruction Practices for Equitable and Effective Teaching serves as a comprehensive reference of issues related to writing instruction and leading research about perspectives, methods, and approaches for equitable and effective writing instruction. It includes practices beyond K-12, including best writing practices at the college level as well as the development of future teachers. Providing unique coverage on culturally relevant writing, socio- and racio-linguistic justice, and urgent writing pedagogies, this major reference work is an indispensable resource for administrators and educators of both K-12 and higher education, pre-service teachers, teacher educators, libraries, government officials, researchers, and academicians. **Teacher's Handbook,**

The traditional approach to teaching writing concentrates on mastering the different aspects of writing in the hope that these will eventually unite as a set of integrated skills. More 'progressive' teachers emphasise that writing is a total process which is 'caught' intuitively rather than explicitly taught. Both models are partially unsatisfactory, and consequently a third approach has evolved which seeks to combine the best of both. This book considers this 'systematic' approach, which seeks to retain the emphasis on writing as a total process but identifies within each communicative context the set of sub-skills involved. The author discusses and illustrates the strengths and weaknesses of this approach and the changes in professional thinking and practice that are essential to its successful adoption. He presents an overview of the nature of the writing process, to enable teachers to make clearer and more explicit statements about their objectives in setting classroom writing tasks. **Handbook of Research on Writing and Composing in the Age of MOOCs IGI Global** The development of online learning environments has enhanced the availability of educational opportunities for students.
