SEWAGE TREATMENT PLANTS

ECONOMIC EVALUATION OF INNOVATIVE TECHNOLOGIES FOR ENERGY EFFICIENCY

IWA Publishing Sewage Treatment Plants: Economic Evaluation of Innovative Technologies for Energy Efficiency aims to show how cost saving can be achieved in sewage treatment plants through implementation of novel, energy efficient technologies or modification of the conventional, energy demanding treatment facilities towards the concept of energy streamlining. The book brings together knowledge from Engineering, Economics, Utility Management and Practice and helps to provide a better understanding of the real economic value with methodologies and practices about innovative energy technologies and policies in sewage treatment plants.

PRINCIPLES OF ECONOMICS VOLUME 2 OF 2

Lulu.com This is Volume 2 of 2, covering Chapters 24 - 34 and the appendices. See www.textbookequity.org/principles-of-economics Excerpt: Principles of Economics is designed for a two-semester principles of economics sequence. The text has been developed to meet the scope and sequence of most introductory courses. At the same time, the book includes a number of innovative features designed to enhance student learning. Instructors can also customize the book, adapting it to the approach that works best in their classroom. The pedagogical choices, chapter arrangements, and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project. They thoroughly read the material and offered critical and detailed commentary. The outcome is a balanced approach to micro and macro economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way as well.

MONETARY POLICY, INFLATION, AND THE BUSINESS CYCLE

AN INTRODUCTION TO THE NEW KEYNESIAN FRAMEWORK AND ITS APPLICATIONS - SECOND EDITION

Princeton University Press The classic introduction to the New Keynesian economic model This revised second edition of Monetary Policy, Inflation, and the Business Cycle provides a rigorous graduate-level introduction to the New Keynesian framework and its applications to monetary policy. The New Keynesian framework is the workhorse for the analysis of monetary policy and its implications for inflation, economic fluctuations, and welfare. A backbone of the new generation of medium-scale models under development at major central banks and international policy institutions, the framework provides the theoretical underpinnings for the price stability-oriented strategies adopted by most central banks in the industrialized world. Using a canonical version of the New Keynesian model as a reference, Jordi Galí explores various issues pertaining to monetary policy's design, including optimal monetary policy and the desirability of simple policy rules. He analyzes several extensions of the baseline model, allowing for cost-push shocks, nominal wage rigidities, and open economy factors. In each case, the effects on monetary policy are addressed, with emphasis on the desirability of inflation-targeting policies. New material includes the zero lower bound on nominal interest rates and an analysis of unemployment's significance for monetary policy. The most up-to-date introduction to the New Keynesian framework available A single benchmark model used throughout New materials and exercises included An ideal resource for graduate students, researchers, and market analysts

WORLD ECONOMIC OUTLOOK, APRIL 2020

THE GREAT LOCKDOWN

INTERNATIONAL MONETARY FUND The COVID-19 pandemic is inflicting high and rising human costs worldwide, and the necessary protection measures are severely impacting economic activity. As a result of the pandemic, the global economy is projected to contract sharply by -3 percent in 2020, much worse than during the 2008-09 financial crisis. In a baseline scenario--which assumes that the pandemic fades in the second half of 2020 and containment efforts can be gradually unwound--the global economy is projected to grow by 5.8 percent in 2021 as economic activity normalizes, helped by policy support. The risks for even more severe outcomes, however, are substantial. Effective policies are essential to forestall the possibility of worse outcomes, and the necessary measures to reduce contagion and protect lives are an important investment in long-term human and economic health. Because the economic fallout is acute in specific sectors, policymakers will need to implement substantial targeted fiscal, monetary, and financial market measures to support affected households and businesses domestically. And internationally, strong multilateral cooperation is essential to overcome the effects of the pandemic, including to help financially constrained countries facing twin health and funding shocks, and for channeling aid to countries with weak health care systems.

THE GLOBAL ECONOMY OF PULSES

Food & Agriculture Org. The production, trade and consumption of pulses have seen substantial growth over the last fifteen years. This report examines the trends and patterns of this growth, and the factors that explain these for different kinds of pulses. The report presents an analysis of trends of consumption of pulses in different regions of the world and discusses the role that pulses can play in human nutrition. The report presents an analysis of the dynamics of growth of major pulses in different pulse-producing countries of the world. It describes the increasingly important role of trade in the global economy of pulses and presents an analysis of changing patterns of trade. The report argues that there is a pressing need to close the large gap between potential and actual yields, particularly on smallholder farms in South Asia and sub-Saharan Africa, by increased adoption of improved varieties and modern agronomic practices in all developing countries. This in turn requires a major thrust in agricultural research and extension, improving credit availability, and public investment directed at pulse production. The report discusses future prospects and policy imperatives for sustaining the growth of pulse production.

INSTITUTIONAL ECONOMICS

AN INTRODUCTION

Red Globe Press Institutional economics is an increasingly important area in the field which also verges into political science and sociology. This concise and lucid textbook, which assumes a basic understanding of neoclassical economics, introduces the key ideas, emphasizing the "new" institutional economics but grounding readers in the traditional perspectives.

WORLD ECONOMIC OUTLOOK, OCTOBER 2020

A LONG AND DIFFICULT ASCENT

INTERNATIONAL MONETARY FUND The global economy is climbing out from the depths to which it had plummeted during the Great Lockdown in April. But with the COVID-19 pandemic continuing to spread, many countries have slowed reopening and some are reinstating partial lockdowns to protect susceptible populations. While recovery in China has been faster than expected, the global economy's long ascent back to pre-pandemic levels of activity remains prone to setbacks.

SHIFTING GEO-ECONOMIC POWER OF THE GULF

OIL, FINANCE AND INSTITUTIONS

Ashgate Publishing, Ltd. Bringing together for the first time distinguished Gulf experts to analyse the renewed geo-economic prominence of the Gulf states, this volume investigates some of the 'new power brokers' in the world economy: the oil-exporting states of the Gulf. The Gulf Cooperation Council's (GCC) members: Bahrain, Kuwait, Oman, Qatar, the United

Arab Emirates and Saudi Arabia, collectively have the largest proven oil reserves in the world and are among the world's largest oil-exporting states. Gulf Arab states are actively pursuing a variety of foreign investment strategies. Some of these investments are being managed by sovereign wealth funds, government investment corporations, and government-controlled companies. This renewed geo-economic status has received a lot of media attention but there has been a dearth of academic study on what this shift in global economic power means for the international economic system. This volume aims to fill this gap with a rigorous scholarly analysis based on primary sources and raw economic data. It brings together the expertise of academics who have devoted their career to careful study of the region and of renowned scholars of international political economy.

“一带一路”倡议下的 THE BELT AND ROAD INITIATIVE AND CHINA-AFRICA PRODUCTION CAPACITY COOPERATION

BEIJING BOOK CO. INC. AbstractThe Belt and Road Initiative is an important platform for China's foreign cooperation in the new era.The initiative—underpinned by win-win cooperation—aims to provide diversified options and impetus for world development through cooperation involving a wider range of countries.It has drawn on the experience of China-Africa cooperation and embodies the new international relations proposed by the Chinese government.When Africa's independent development is improving and its market-oriented reform is being implemented—it serves the development of African countries to deepen China-Africa capacity cooperation.In this context—the book is written to provide general information and past experience concerning China-Africa capacity cooperation.**Key Words:**China—Africa—The Belt and Road Initiative—Production Capacity Cooperation.

A SAFE AND JUST SPACE FOR HUMANITY: CAN WE LIVE WITHIN THE DOUGHNUT?

Oxfam

OECD-FAO AGRICULTURAL OUTLOOK 2012

OECD Publishing This report provides world market trends for biofuels, cereals, oilseeds, sugar, meats, fish and dairy products over the 2012-2021 period and contains an evaluation of recent developments, key issues and uncertainties in those commodity markets.

SUSTAINABLE SUPPLY CHAINS

A RESEARCH-BASED TEXTBOOK ON OPERATIONS AND STRATEGY

Springer This book is primarily intended to serve as a research-based textbook on sustainable supply chains for graduate programs in Business, Management, Industrial Engineering, and Industrial Ecology, but it should also be of interest for researchers in the broader sustainable supply chain space, whether from the operations management and industrial engineering side or more from the industrial ecology and life-cycle assessment side. Finding efficient solutions towards a more sustainable supply chain is increasingly important for managers, but clearly this raise difficult questions, often without clear answers. This book aims to provide insights into these kinds of questions for students and practitioners, based on the latest academic research.

IS THE AMERICAN CENTURY OVER?

John Wiley & Sons For more than a century, the United States has been the world's most powerful state. Now some analysts predict that China will soon take its place. Does this mean that we are living in a post-American world? Will China's rapid rise spark a new Cold War between the two titans? In this compelling essay, world renowned foreign policy analyst, Joseph Nye, explains why the American century is far from over and what the US must do to retain its lead in an era of increasingly diffuse power politics. America's superpower status may well be tempered by its own domestic problems and China's economic boom, he argues, but its military, economic and soft power capabilities will continue to outstrip those of its closest rivals for decades to come.

AGRICULTURAL DECISION ANALYSIS

Introduction to decision analysis. Probability. Revision of probabilities. Utility. Procedures for decision analysis. Production under risk. Whole-farm planning under risk. Investment appraisal. Decision analysis with preferences unknown.

CLIMATE LEVIATHAN

A POLITICAL THEORY OF OUR PLANETARY FUTURE

Verso Books How climate change will affect our political theory—for better and worse Despite all the science and summits, leading capitalist states have not managed to mitigate anything close to an adequate level of carbon emissions. There is no way the world will warm less than the critical 2C threshold. What are the likely political-economic outcomes? Where is our warming world headed? Possibilities in the struggle for climate justice depend on our capacity to anticipate where the existing global order is likely to go. Climate Leviathan provides a radical way of thinking about how environmental change will intensify existing challenges to global order, unearthing the forces for a planetary variation on existing forms of sovereignty. Drawing on a wide range of political thought, Wainwright and Mann argue that rapid climate change will transform global political economy and our world's basic political arrangements, leading toward a capitalist planetary sovereignty. Alternative futures must be constructed in the face of these transformations.

AGRO-INDUSTRIES FOR DEVELOPMENT

CABI The development of competitive agro-industries is crucial for creating employment and income opportunities as well as enhancing the quality of and demand for farm products. Agro-industries can have a real effect on international development by increasing economic growth and reducing poverty in both rural and urban areas of developing countries. However, in order to avoid adverse effects to vulnerable countries and people, sound policies and strategies for fostering agro-industries are needed. Agro-Industries for Development highlights the current status and future course for agro-industries and brings attention to the contributions this sector can make to international development. The book includes contributions from agro-industry specialists, academic experts and UN technical agencies, chapters address the strategies and actions required for improving agro-industrial competitiveness in ways that can create income, generate employment and fight poverty in the developing world. This book is a co-publication with FAO and UNIDO.

ECONOMIC THEORY OF COOPERATION

ECONOMIC STRUCTURE OF COOPERATIVE ORGANIZATIONS

"This book is a must for all cooperative thinkers. Reaction to Emelianoff's work has stimulated almost all modern theories about collective action in agriculture."--MICHAEL L. COOK, UNIVERSITY OF MISSOURI. "Emelianoff's book launched analytical inquiry into the economic nature of cooperatives. Although the work has been a source of controversy, I have found his framework of economic integration to be a very useful approach to analyzing & understanding cooperatives."--RICHARD J. SEXTON, UNIVERSITY OF CALIFORNIA-DAVIS. "Emelianoff is a forceful writer with very definite views about cooperatives. While not everyone will agree with those views, they will stimulate one's thinking about cooperatives."--BRUCE ANDERSON, CORNELL UNIVERSITY.

THE PALGRAVE HANDBOOK OF WINE INDUSTRY ECONOMICS

Springer This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

BASIC MATH SKILLS

Ags Pub Provides exercises and activities to teach the basics of mathematics.

WORLD ECONOMIC OUTLOOK, APRIL 2017

GAINING MOMENTUM?

International Monetary Fund Global economic activity is picking up with a long-awaited cyclical recovery in investment, manufacturing, and trade, according to Chapter 1 of this World Economic Outlook. World growth is expected to rise from 3.1 percent in 2016 to 3.5 percent in 2017 and 3.6 percent in 2018. Stronger activity, expectations of more robust global demand, reduced deflationary pressures, and optimistic financial markets are all upside developments. But structural impediments to a stronger recovery and a balance of risks that remains tilted to the downside, especially over the medium term, remain important challenges. Chapter 2 examines how changes in external conditions may affect the pace of income convergence between advanced and emerging market and developing economies. Chapter 3 looks at the declining share of income that goes to labor, including the root causes and how the trend affects inequality. Overall, this report stresses the need for credible strategies in advanced economies and in those whose markets are emerging and developing to tackle a number of common challenges in an integrated global economy.

PAVING THE WAY TO SUSTAINED GROWTH AND PROSPERITY IN CENTRAL AMERICA, PANAMA, AND THE DOMINICAN REPUBLIC

International Monetary Fund Abstract: Accelerating economic growth in Central America, Panama and the Dominican Republic (CAPDR) remains an elusive task. While the region performed relatively well in the post-global financial crisis period, over the last five years obstacles to growth have become more evident and new challenges have emerged. In response, the region has strengthened macro-financial frameworks but more progress will be required to pave the way to sustained growth and prosperity. This book considers the structural factors underlying the region's growth outlook and assesses its macroeconomic and financial challenges to help shape the policy agenda going forward. The book first identifies the structural determinants of growth in the region related to: capital formation; employment; demographic factors, including immigration; productivity; and violence. It then highlights the importance of creating fiscal space through the design and implementation of fiscal rules and mechanisms to increase accountability (better quality of public spending, adequate policies to reduce income inequality and sustainable retirement plans). Finally, it presents recent evidence on the importance of a supportive financial sector for growth (including through financial inclusion and development).

KNOWLEDGE AND POWER

THE INFORMATION THEORY OF CAPITALISM AND HOW IT IS REVOLUTIONIZING OUR WORLD

Simon and Schuster Ronald Reagan's most-quoted living author—George Gilder—is back with an all-new paradigm-shifting theory of capitalism that will upturn conventional wisdom, just when our economy desperately needs a new direction. America's struggling economy needs a better philosophy than the college student's lament: "I can't be out of money, I still have checks in my checkbook!" We've tried a government spending spree, and we've learned it doesn't work. Now is the time to rededicate our country to the pursuit of free market capitalism, before we're buried under a mound of debt and unfunded entitlements. But how do we navigate between government spending that's too big to sustain and financial institutions that are "too big to fail?" In Knowledge and Power, George Gilder proposes a bold new theory on how capitalism produces wealth and how our economy can regain its vitality and its growth. Gilder breaks away from the supply-side model of economics to present a new economic paradigm: the epic conflict between the knowledge of entrepreneurs on one side, and the blunt power of government on the other. The knowledge of entrepreneurs, and their freedom to share and use that knowledge, are the sparks that light up the economy and set its gears in motion. The power of government to regulate, stifle, manipulate, subsidize or suppress knowledge and ideas is the inertia that slows those gears down, or keeps them from turning at all. One of the twentieth century's defining economic minds has returned with a new philosophy to carry us into the twenty-first. Knowledge and Power is a must-read for fiscal conservatives, business owners, CEOs, investors, and anyone interested in propelling America's economy to future success.

PHOTOCATALYTIC SEMICONDUCTORS

SYNTHESIS, CHARACTERIZATION, AND ENVIRONMENTAL APPLICATIONS

Springer This critical volume examines the different methods used for the synthesis of a great number of photocatalysts, including TiO₂, ZnO and other modified semiconductors, as well as characterization techniques used for determining the optical, structural and morphological properties of the semiconducting materials. Additionally, the authors discuss photoelectrochemical methods for determining the light activity of the photocatalytic semiconductors by means of measurement of properties such as band gap energy, flat band potential and kinetics of hole and electron transfer. Photocatalytic Semiconductors: Synthesis, Characterization and Environmental Applications provide an overview of the

semiconductor materials from first- to third-generation photocatalysts and their applications in wastewater treatment and water disinfection. The book further presents economic and toxicological aspects in the production and application of photocatalytic materials.

RICE ALMANAC, 4TH EDITION

SOURCE BOOK FOR ONE OF THE MOST IMPORTANT ECONOMIC ACTIVITIES ON EARTH

IRRI This fourth edition of the Rice Almanac continues the tradition of the first three editions by showcasing rice as the most important staple food in the world and all that is involved in maintaining rice production. It also breaks new ground in its coverage of issues related to rice production, both environmental--including climate change--and its importance for food security and the global economy. It also further expands coverage of the world's rice production area by featuring 80 rice-producing countries around the world.

ENABLING ENVIRONMENTS FOR AGRIBUSINESS AND AGRO-INDUSTRIES DEVELOPMENT

REGIONAL AND COUNTRY PERSPECTIVES

Food and Agriculture Organization The existence of a conducive business climate, or enabling environment, is considered essential to engender economic growth and development. However, what "an enabling environment" should encompass in practical terms remains elusive to many scholars and policy makers, particularly when discussed at the sub-sector level. This publication examines issues associated with enabling environments with a focus on agribusiness and agro-industrial sectors, which have not had their peculiar characteristics sufficiently examined in traditional appraisals of business climates. Based on a series of workshops and consultations organized in Africa, Asia, Eastern Europe and Latin America, the report reviews existing frameworks for general enabling environment assessments and discusses their relevance to agribusiness and agro-industries. It also discusses the challenges of enabling environment reforms and identifies a number of essential, important and useful enablers that are particularly relevant to agrifood business climate appraisals and upgrading.

DIAGRAMMATIC REPRESENTATION AND INFERENCE

11TH INTERNATIONAL CONFERENCE, DIAGRAMS 2020, TALLINN, ESTONIA, AUGUST 24-28, 2020, PROCEEDINGS

Springer Nature This book constitutes the refereed proceedings of the 11th International Conference on the Theory and Application of Diagrams, Diagrams 2020, held in Tallinn, Estonia, in August 2020.* The 20 full papers and 16 short papers presented together with 18 posters were carefully reviewed and selected from 82 submissions. The papers are organized in the following topical sections: diagrams in mathematics; diagram design, principles, and classification; reasoning with diagrams; Euler and Venn diagrams; empirical studies and cognition; logic and diagrams; and posters. *The conference was held virtually due to the COVID-19 pandemic. The chapters 'Modality and Uncertainty in Data Visualization: A Corpus Approach to the Use of Connecting Lines,' 'On Effects of Changing Multi-Attribute Table Design on Decision Making: An Eye Tracking Study,' 'Truth Graph: A Novel Method for Minimizing Boolean Algebra Expressions by Using Graphs,' 'The DNA Framework of Visualization' and 'Visualizing Curricula' are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

As you read the chapters and lessons in this book, you will learn about the different parts of speech. You will learn about writing sentences, punctuation, and proper grammar. You will practice your vocabulary and spelling skills. - p. x.

CONTRIBUTIONS OF THE AUTOMOTIVE INDUSTRY TO THE U.S. ECONOMY IN 1998: THE NATION AND ITS FIFTY STATES

GRADIENT FLOWS

IN METRIC SPACES AND IN THE SPACE OF PROBABILITY MEASURES

Springer Science & Business Media The book is devoted to the theory of gradient flows in the general framework of metric spaces, and in the more specific setting of the space of probability measures, which provide a surprising link between optimal transportation theory and many evolutionary PDE's related to (non)linear diffusion. Particular emphasis is given to the convergence of the implicit time discretization method and to the error estimates for this discretization, extending the well established theory in Hilbert spaces. The book is split in two main parts that can be read independently of each other.

CHEMISTRY

Globe Fearon Company Appealing graphics boost students' interest and understanding of chemistry Chemistry--looking at what matter is made of and how it behaves, down to the subatomic level--comes alive with this new text. With enticing, full-color graphics and page layouts that draw students in, Chemistry provides a clear, sound basis of scientific knowledge. Besides presenting chemistry fundamentals, the text offers bonus features that dispel common myths and provide examples of connections between chemistry and the environment, technology, and consumer choices. It also presents real-life problems affecting the world and their chemistry-related solutions. In addition, Investigations and Express Labs give students added exposure to chapter concepts for greater comprehension. A perfect introduction to the field of chemistry. Lexile Level 880 Reading Level 3-4 Interest Level 6-12

ACHIEVING PERSON-CENTRED HEALTH SYSTEMS

EVIDENCE, STRATEGIES AND CHALLENGES

Cambridge University Press An evidence-based analysis of the opportunities and challenges of moving towards more person-centred health systems.

COLD CHAIN MANAGEMENT FOR THE FRESH PRODUCE INDUSTRY IN THE DEVELOPING WORLD

CRC Press Global food losses are a result of a lack of necessary infrastructure, improper food safety handling procedures, and insufficient training for the personnel working in the cold chain. The development of a resource-efficient and energy-smart food supply chain requires a well-integrated evaluation and development of the cold chain. Cold Chain Management for the Fresh Produce Industry in the Developing World provides a comprehensive review of the benefits of an unbroken cold chain in developing countries and focuses on the critical role of extension education in the implementation of cold chain management. The unbroken cold chain is essential for all stakeholders in the fresh produce industry to maintain the quality and safety of food products during handling, transporting, and storing in their journey from producer to consumer. Appropriate cold chain management is crucial not only to reduce the postharvest losses and wastages, but also to increase farmers' income, generate employment opportunities, and improve the livelihood of stakeholders along the supply chain. Key Features: Includes case studies for promoting the expansion of existing technologies for cold chain development in Asian, Africa and the Caribbean nations. Assesses cold chain management as crucial to the growth of global trade in perishable products with contributions from international organizations, researchers and commercial experts. Articulates resilient, sustainable and creative concepts to develop cold chains to enhance food distribution. This book comprises of chapters contributed by the experts and practitioners of cold chain development in developing countries. The authors in the book provide the scenario of cold chain management in the world and discuss the importance of the cold chain as well as the different options and innovations of cooling systems. Chapters also include case studies, success stories, capacity building activities, and other opportunities in cold chain development.

OECD-FAO AGRICULTURAL OUTLOOK 2021-2030

Food & Agriculture Org. The Agricultural Outlook 2021-2030 is a collaborative effort of the Organisation for Economic Co-operation and Development (OECD) and the Food and Agriculture Organization (FAO) of the United Nations. It brings together the commodity, policy and country expertise of both organisations as well as input from collaborating member countries to provide an annual assessment of the prospects for the coming decade of national, regional and global agricultural commodity markets. The publication consists of 11 Chapters; Chapter 1 covers agricultural and food markets; Chapter 2 provides regional outlooks and the remaining chapters are dedicated to individual commodities.

REMOTE SENSING FOR FOOD SECURITY

Springer This volume gathers a variety of applications for remote sensing of vegetation health (VH) and concretely shows how this information can be used in service of ending hunger and of ensuring future food security. In this book's ten chapters, Dr. Felix Kogan, one of the most prolific scientists in this sphere, shows how a new VH method, designed from operational environmental satellite data, can be used to provide advanced predictions of agricultural losses, helping to enhance food security and reducing the number of hungry people. Topics covered include the scientific basis of the VH method, drought monitoring, prediction of short-term agricultural yield and crop insurance, and impacts of long term climate variability and change on food security. A short discussion on VH for human health-related topics such as detection and prediction of malaria and fire risk is included as well.

AGRICULTURAL INVESTMENT FUNDS FOR DEVELOPMENT

DESCRIPTIVE ANALYSIS AND LESSONS LEARNED FROM FUND M

A PEOPLE'S GREEN NEW DEAL

The idea of a Green New Deal was launched into popular consciousness by US Congressperson Alexandria Ocasio-Cortez in 2018. Evocative of the far-reaching ambitions of its namesake, it has become a watchword in the current era of global climate crisis. But its new ubiquity brings ambiguity: what - and for whom - is the Green New Deal? In this concise and urgent book, Max Ajl provides an overview of the various mainstream Green New Deals. Critically engaging with their proponents, ideological underpinnings and limitations, he goes on to sketch out a radical alternative: a 'People's Green New Deal' committed to degrowth, anti-imperialism and agro-ecology. Ajl diagnoses the roots of the current socio-ecological crisis as emerging from a world-system dominated by the logics of capitalism and imperialism. Resolving this crisis, he argues, requires nothing less than an infrastructural and agricultural transformation in the Global North, and the industrial convergence between North and South. As the climate crisis deepens and the literature on the subject grows, A People's Green New Deal contributes a distinctive perspective to the debate.

AGRICULTURE, BIODIVERSITY AND MARKETS

LIVELIHOODS AND AGROECOLOGY IN COMPARATIVE PERSPECTIVE

Routledge Debate about how best to ensure the preservation of agricultural biodiversity is caught in a counter-productive polemic between proponents and critics of market-based instruments and agricultural modernisation. This book argues that neither position does justice to the range of strategies that farmers use to manage agrobiodiversity and other livelihood assets as they adapt to changing social, economic, and environmental circumstances. Chapters explore relationships between the exploitation and conservation of agricultural biodiversity and the livelihoods of agricultural communities, and evaluate the capacity of national and multilateral institutions and policy settings to support the protection and capture by communities of agrobiodiversity values. The place of ecosystem services in valuing biodiversity in the marketplace is emphasized. A number of authors assess the potential for market-based instruments and initiatives to encourage the protection of biodiversity, while others compare agrobiodiversity/community relationships, and the effectiveness of instruments designed to enhance these, across international boundaries. The book takes a comparative approach, drawing on empirical case studies from across the developed and developing worlds. In doing so, the book does not simply point to similarities and differences in the experience of rural communities. It also shows how global trade and multilateral institutions bring these otherwise disparate communities together in networks that exploit and/or preserve agrobiodiversity and other resources.

LIVESTOCK HEALTH AND FARMING

BoD - Books on Demand Livestock Health and Farming provides a detailed description of key aspects of livestock health issues and farming practices. Chapters cover such topics as antimicrobial resistance in livestock, nutrition and its role in animal health and farming, nutrition and health management in dairy animals, and livestock feeding in semi-arid regions.
