Infrastructure Finance

Trends and Techniques

Euromoney Books "**Gives a broad view of trends and techniques in infrastructure financing around the world today. The title considers a wide range of projects including transport, water systems, power and toll road privatisation. Themes include the rising need for infrastructure investment, the quality of country infrastructure, government budget limitations and benefits and risks of investment.**" - publisher's website.

Project Finance

Structuring, Valuation and Risk Management for Major Projects

Springer Nature

The Emerging Middle East Financial Markets

AuthorHouse The book aims to unravel the potentials of Middle East financial markets, which are spread over a large and wealthy part of the world. These markets are gradually being opened for international investors seeking diversification and rewarding risk adjusted returns. However, opening up to international investors is a necessary but not a sufficient condition to attract institutional money needed to provide depth and professionalism to these markets. Without a cultural shift towards more transparency, better regulations and governance, and the availability of custody, clearance and equity research, up to international best practice, not much institutional money will be forthcoming to the region. Funding sources in the Middle East and North Africa Region are still predominantly channeled through the banking system, with equity and fixed income markets playing a marginal role. While the world's financial markets show on average a balanced structure of bank assets, stock market capitalization and debt securities, the capital mix in the region is heavily skewed towards bank assets with a share of 58.8%, equities around 34% and debt securities (bonds and Sukuk) 7.2%. Stock markets of the UAE and Qatar have recently been upgraded to emerging market status, which together with Egypt are the only three Arab countries that have selected listed companies featuring in the Morgan Stanley Capital Index for Emerging Markets (MSCI EM). Saudi Arabia has opened its stock market to direct investment by foreign financial institutions in the second half of 2015. The opening of the Saudi stock market is a major positive development for the region's capital markets. The path ahead for MENA finance has become now clearer. The relative weight of commercial banks in the financial system will diminish gradually, and a wider range of financial services will be provided by deeper and increasingly more sophisticated debt and equity capital markets, in line with worldwide trends. Sharia compliant products, such as Sukuk, are expected to continue to grow at double-digit rate to meet the strong demand generated regionally and internationally.

Project Financing

Asset-Based Financial Engineering

John Wiley & Sons A timely update to one of the most well-received books on project financing As an effective alternative to conventional direct financing, project financing has become one of the hottest topics in corporate finance. It's being used more and more frequently—and more

successfully—on a wide variety of high-profile corporate projects, and has long been used to fund large-scale natural resource projects. But the challenges of successful project financing are immense, and the requirements of the process can easily be misunderstood. That's why John Finnerty has returned with the Third Edition of *Project Financing*. Drawing on his vast experience in the field, Finnerty takes you through the process step by step. Using updated examples and case studies that illustrate how to apply the analytical techniques described in the book, he covers the rationale for project financing, how to prepare the financial plan, assess the risks, design the financing mix, raise the funds, and much more. Includes completely new chapters that cover the financing of sustainable projects as well as Sharia-compliant (Islamic) project financing. New material has been added to the discussion of financial modeling and international debt financing. Explores today's most innovative financing techniques and analyzes the shortcomings of unsuccessful project financing attempts. Whether you're a corporate finance professional, project planner, or private investor, *Project Financing, Third Edition* demystifies the complexities of project financing and provides an invaluable guide for anyone who wants to master innovation in corporate finance today.

Islamic Wealth and the SDGs

Global Strategies for Socio-economic Impact

Springer Nature The SDGs, developed by the UN in 2012, focuses on 17 goals for the betterment of humanity and humanitarian causes. Among the core objectives of Shari'ah in Islamic finance is to offer a helping hand, emphasizing the efforts and scope of the SDGs. This book explores how Islamic ethical wealth is structured to contribute to the SDGs and an overall socio-economic impact within the principles of Maqasid al-Shari'ah. Focusing areas such as Islamic micro-finance, wealth inclusion, corporate and agro-Zakat, Awqaf, SRI Sukuk, and green Sukuk, this book will feature contributions from the leading researchers in sustainability and Islamic finance and will be of interest to scholars, researchers, industrialists, NGOs, UNDP and students studying both areas.

Handbook of Islamic Banking

Edward Elgar Publishing The *Handbook of Islamic Banking* comprises 25 studies by leading international experts on Islamic banking and finance specially commissioned to analyse the various debates and the current state of play in the field. From its origins thirty years ago, Islamic banking

has expanded rapidly to become a distinctive and fast growing segment of the international banking and capital markets. Despite this expansion, Islamic banking still remains poorly understood in many parts of the Muslim world and continues to be a mystery in much of the West. This comprehensive Handbook provides a succinct analysis of the workings of Islamic banking and finance, accessible to a wide range of readers. At the same time, it seeks to bring the current research agenda and the main issues on Islamic banking before a wider audience. Islamic banking offers, as an alternative to conventional interest-based financing methods, a wide variety of financial instruments and investment vehicles based on profit-and-loss sharing arrangements. These are all explored in detail along with other subjects such as governance and risk management, securities and investment, structured financing, accounting and regulation, economic development and globalization. M. Kabir Hassan, Mervyn Lewis and the other contributors have created an authoritative and original reference work, which will contribute to a wider understanding of Islamic banking as well as provoking further discussion and research. It will be invaluable to all scholars, researchers and policymakers with an interest in this subject.

Islamic Finance

Law, Economics, and Practice

Cambridge University Press This book provides an overview of the practice of Islamic finance and the historical roots that define its modes of operation. The focus of the book is analytical and forward-looking. It shows that Islamic finance exists mainly as a form of rent-seeking legal-arbitrage. In every aspect of finance - from personal loans to investment banking, and from market structure to corporate governance - Islamic finance aims to replicate in Islamic forms the substantive functions of contemporary financial instruments, markets, and institutions. By attempting to replicate the substance of contemporary financial practice using pre-modern contract forms, Islamic finance has arguably failed to serve the objectives of Islamic law. This book proposes refocusing Islamic finance on substance rather than form. This approach would entail abandoning the paradigm of 'Islamization' of every financial practice. It would also entail reorienting the brand-name of Islamic finance to emphasize issues of community banking, micro-finance, and socially responsible investment.

The Chancellor Guide to the Legal and Shari'a Aspects of Islamic

Finance

Harriman House Limited **Unprecedented economic growth and wealth accumulation in predominately Muslim countries have prompted many financial institutions in the US and Europe to position their investment teams across the Middle East and Asia to be closer to the markets in which they invest, and to take advantage or asset-gathering opportunities. This growth has also encouraged an increasing number of western industrialised countries to adopt legislation that responds to the requirements of the Musli investment community. To be effective in these markets it is essential that professionals have an understanding of how Shari'a legal principles are applied in the financial sector. Failure to do so exposes them and their clients to potential financial, legal and reputational pitfalls. The Chancellor Guide to the Legal and Shari'a Aspects of Islamic Finance is the first professional reference to focus specifically on the legal dimension of Islamic Finance. The guide brings together nineteen Islamic Finance legal practitioners and advisers to provide a comprehensive yet practical legal perspective on the subject. Each contributor draws on several years' hands-on experience in Islamic Finance product development and advice to leading financial institutions to provide a real-world, contemporary assessment of the key legal issues in Islamic Finance. The guide's hands-on approach and accessible style make it required reading for everyone with a professional interest in Islamic Finance, be they lawyers, accountants, regulators, bankers or investors. It is also a unique reference for academic institutions worldwide.**

Islamic Banking in Practice - Volume 2

Sukuk - Structuring, Pricing and Risk Management

Fidens Press **This is how Islamic Banking really works** In a sector where publications focus on theory, the Islamic Banking in Practice series concentrates solely on market practice. The evolution of principles into practice is explained clearly and concisely. **Sukuk** Sukuks, sometimes referred to as the Islamic version of bonds, are one the most visible products in islamic banking and finance, and with a global reach. This volume will explain why Sukuks were created, and how they work. The different structures of Sukuk will be explained, and reinforced through detailed analysis of market transactions. Areas covered include Issuance

process Pricing Asset injection Risk management Shariah compliance
 Chapter headings include Common Sukuk structures Ijara, Musharakah,
 Mudarabah, Wakala, Murabaha Project finance Perpetual Equity linked /
 Exchangeable Hybrid Shariah compliance AAOIFI developments Credit
 rating Defaults The issue of a "True Sale"

Contemporary Islamic Finance Innovations, Applications, and Best Practices

John Wiley & Sons **Part I, The Contemporary Islamic Finance Landscape, addresses the most current issues surrounding Islamic economic theory and legal thought as well as presents a new level of thinking about a wide variety of other topics in this industry. Part II moves away from theory to highlight examples of how the products and structures of this discipline are effectively implemented in the real world. Along the way, you'll gain valuable knowledge regarding: Globalization and Islamic finance; The elements of Islamic wealth management; Sukuk--structures designed to bridge Islamic and conventional capital markets; An Islamic microfinance model and its role in poverty alleviation; Islamic finance in an almost postcrisis world; Shifting Islamic financial structures offshore; Islamic mortgages; Shari'ah-compliant investment in the United States; And much more.**

Islamic Financial Markets and Institutions

Taylor & Francis **The rapid pace of progress in the Islamic financial market and investment space, coupled with the COVID-19 pandemic and its aftermath and recovery, has provided the necessary challenges to build a strong case for Islamic investment. This timely and unique book focuses on the foundations of Islamic financial markets and institutions in the context of various products, their market application, Islamic asset management, and regulation. The authors provide a thorough overview of Islamic financing instruments and markets, such as Islamic debt and equity markets, through shares and the stock market, mutual funds, private equity, lease financing, Sukuk, green Sukuk, money market instruments, exchange-traded funds, cryptocurrencies, derivatives and so forth, which have emerged as alternative sources of financing. They offer insight into the numerous infrastructure institutions which have sprung up since the first decade of the new century, such as the Accounting and Auditing Organizations for Islamic Financial Institutions, Islamic Financial Services**

Board, Islamic International Rating Agency, and International Islamic Liquidity Management Corporation, as well as those being established, to satisfy different industry needs. With its uniquely competitive approach to the mainstream financial market, this book facilitates a greater understanding of the concept of Islamic investment. Through a discussion of the current state and future prospects of Islamic financial markets, the book's theoretical and practical approach offers academic, practitioners, researchers, students, and general readers a well-balanced overview of Islamic financial markets, its ethics, Shari'ah foundation, the instruments and operational mechanism used by Islamic capital, money, and debt markets.

The Negotiability of Debt in Islamic Finance

An Analytical and Critical Study

BRILL Trading and securitizing debts should be permitted in Islamic law, with one condition, that the debt should be considered low risk. This new rule, the permissibility of trading debts, is supported by three Islamic legal bases, *istishab*, *qiyas*, and *maslaha*, which are recognized by all four Islamic schools of legal thought.

Local Currency Bonds and Infrastructure Finance in ASEAN+3

Asian Development Bank The Asian Development Bank (ADB) is working closely with the Association of Southeast Asian Nations (ASEAN) and the People's Republic of China (PRC), Japan, and the Republic of Korea--- collectively known as ASEAN+3---to develop local currency bond markets and facilitate regional bond market integration under the Asian Bond Markets Initiative (ABMI). ABMI was launched in 2002 to strengthen the resilience of the region's financial system by developing local currency bond markets as an alternative source to foreign currency-denominated, short-term bank loans for long-term investment financing. The need for infrastructure investment among ASEAN+3 members is well documented, with estimates for needed investment through 2020 reaching as high as \$550 billion. Local currency financing of infrastructure projects has the important advantage of avoiding the currency risk that can arise when a project generating revenues in the domestic currency has foreign currency-denominated debt service requirements. This study was undertaken under ABMI and funded by the Government of the PRC. It addresses two key questions: (i) Why is local currency bond financing not more widely used

for infrastructure projects in ASEAN+3? and (ii) What can be done to promote infrastructure bond financing?

Islamic Capital Markets and Products

Managing Capital and Liquidity Requirements Under Basel III

John Wiley & Sons **Ensure Basel III compliance with expert analysis specific to Islamic Finance** *Islamic Capital Markets and Products* provides a thorough examination of Islamic capital markets (ICM), with particular attention to the products that they offer and the legal and regulatory infrastructure within which they operate. Since Islamic banks act as asset managers, attention is paid to the regulatory challenges which they face in the light of Basel III, as regards both eligible capital and liquidity risk management. The authors of the chapters are professionals and practitioners, and write from experience. The editors also contributed to some of the chapters. The markets and products covered include Islamic equities, Islamic investment certificates (Sukūk) which are Shari'ah compliant alternatives to conventional bonds, and Islamic Collective Investment Schemes. The coverage of legal and regulatory issues includes an examination of the implications for ICM of securities laws and regulations and of Basel III, as well as collateralisation issues. Shari'ah compliance aspects, in terms both of the selection criteria for Islamic equities and of the 'purification' of impermissible components of income, are also examined in some detail, as are the implications of Basel III for eligible capital in general and for Shari'ah compliant capital instruments in particular. A similar analysis is also made of the implications of the Basel III requirements for liquidity risk management and high quality liquid assets (HQLA), including Shari'ah compliant HQLA. The book concludes with three case studies, two describing the ICM in Malaysia and Bahrain and a third which describes Sukūk issued as Shari'ah compliant capital instruments, followed by brief concluding remarks by the editors.

International Project Finance Law and Practice

Oxford University Press **Providing a wide focus on financial techniques and sector coverage on an international scale, this book gives a thorough treatment of the basic principles which affect the structuring and**

documentation of project financings. It studies structural, legal and contractual differences between the different sectors using project financing techniques.

Islamic Finance

The Regulatory Challenge

John Wiley & Sons "Islamic Finance: The Regulatory Challenge" is therefore timely and a truly welcome addition to the growing literature on this subject. I congratulate the two professors for their fine contribution to the evolving art and science of the regulation of Islamic finance." ?Dr. Zeti Akhtar Aziz, Governor, Bank Negara Malaysia "The World's financial regulators have taken too long to appreciate the importance of adapting their regulatory frameworks to the needs of the fast growing Islamic finance sector. Simon Archer and Rifaat Ahmed, the leaders in the field, have put together a fascinating collection of essays which show just what has to be done. It is a very timely book indeed." ?Howard Davies, Director, London School of Economics "The emergence of Islamic finance as a major force in the world financial system has focused attention on regulatory issues. This book, edited by Professor Archer and Professor Rifaat, two of the most respected figures in the field, is an important point of reference for those who have to deal with these issues, whether in regulatory authorities, or in the financial institutions themselves." ?Professor William Blair QC, Grays Inn, London "There is now great interest, both in financial and legal circles, in reliable and authoritative texts on Islamic finance. I have no doubt that the availability of Islamic Finance: The Regulatory Challenge will be warmly welcomed by those who provide financial and legal services. The work will be of great assistance to them." ?The Rt Hon the Lord Woolf of Barnes, Law Lord and former Lord Chief Justice of England & Wales

Forward Lease Sukuk in Islamic Capital Markets

Structure and Governing Rules

Springer This book focuses on forward lease sukuk, which is one of the most viable and dynamic Shari'ah-compliant instruments in the Islamic capital market. The idea of forward lease sukuk is to raise funds from non-existent assets whose subject matter does not exist at the time of the sukuk issuance. This book discusses the significant features of forward lease sukuk and demonstrates its vital contribution to project construction and

manufacturing within the expanding field of Islamic finance.

Project Finance for the International Petroleum Industry

Academic Press This overview of project finance for the oil and gas industry covers financial markets, sources and providers of finance, financial structures, and capital raising processes. About US\$300 billion of project finance debt is raised annually across several capital intensive sectors—including oil and gas, energy, infrastructure, and mining—and the oil and gas industry represents around 30% of the global project finance market. With over 25 year's project finance experience in international banking and industry, author Robert Clews explores project finance techniques and their effectiveness in the petroleum industry. He highlights the petroleum industry players, risks, economics, and commercial/legal arrangements. With petroleum industry projects representing amongst the largest industrial activities in the world, this book ties together concepts and tools through real examples and aims to ensure that project finance will continue to play a central role in bringing together investors and lenders to finance these ventures. Combines the theory and practice of raising long-term funding for capital intensive projects with insights about the appeal of project finance to the international oil and gas industry Includes case studies and examples covering projects in the Arctic, East Africa, Latin America, North America, and Australia Emphasizes the full downstream value chain of the industry instead of limiting itself to upstream and pipeline project financing Highlights petroleum industry players, risks, economics, and commercial and legal arrangements

Islamic Asset Management

Forming the Future for Shari'a-compliant Investment Strategies

Euromoney Books A unique book, *Islamic Asset Management* combines the expertise of banks, asset managers, Shari'a scholars, service and distribution partners to provide you with the latest, creative innovative solutions in the provision of Shari'a-compliant investment structures. Whether you are advising retail, high net worth, corporate or sovereign investors, on equity investments, sukuk, real estate investments, takaful and alternative investment vehicles, this book provides a comprehensive, global examination of Islamic asset management issues with contributions from the UK, US, the Gulf and Malaysia. Through 19 individual chapters, experts in Islamic finance and practitioners across the industry provide you

with all you need to know about: Shari'a-compliant investment guidelines Shari'a supervision Screening criteria for Islamic equity funds Islamic indexes Islamic equities Sukuk Private equity investment Investing in real estate and leasing funds Takaful and health insurance plans Legal and regulatory issues, investor confidence and governance Contributors include BUPA, DIFC, Dow Jones Indexes, Ernst & Young, ICP Ltd, King & Spalding LLP, NCB, National Bank of Sharjah, Oasis, Shamil Bank, Vinson & Elkins LLP, and Wafra. Published in association with Kuwait Finance House and National Commercial Bank.

Asia Bond Monitor

March 2014

Asian Development Bank **The Asia Bond Monitor (ABM) reviews recent developments in East Asian local currency bond markets along with the outlook, risks, and policy options. The ABM covers the 10 Association of Southeast Asian Nations member countries plus the People's Republic of China; Hong Kong, China; and the Republic of Korea.**

Shari'ah and Common Law

The Challenge of Harmonisation

Walter de Gruyter GmbH & Co KG **Harmonisation of law, a term that refers to the bringing together of two different legal traditions, has developed a negative connotation when considered in the context of Shari'ah and common law. Harmonisation began to be looked at as an attempt by one legal system to impose its values on the other. A major reason for that is the lack of understanding of the scope to which these two legal traditions converge. One of the principal findings of this book is that Shari'ah and common law have many more commonalities than differences. As a result, the need for harmonisation between the two might have been exaggerated. The similarities do not need to be harmonised. Rather, they need to be acknowledged and appreciated. If the differences between Shari'ah and common law, which undoubtedly exist as evidenced in this book, are viewed with an appreciation of the commonalities, the ambiance to reconcile the differences would be more conducive to the harmonisation process. This book is intended to help readers better understand Shari'ah and common law and aid harmonisation efforts when the need arises.**

Disruptive Technologies and Eco-Innovation for Sustainable Development

IGI Global **The rise of technology in human culture has changed almost every facet of society. Technology is especially useful regarding sustainable development. These technologies can cause significant greenhouse gas reductions and other benefits in terms of logistics and smart cities. New technology applied in this way can greatly help the human effort to restore the environment. Disruptive Technologies and Eco-Innovation for Sustainable Development provides an in-depth look into the new techniques, strategies, and technologies for achieving environmental sustainability through best business and technology practices. The book covers topics such as eco-innovation, green criteria, Agriculture 4.0, and topics related to logic, philosophy, and history of science and technology from the green/sustainable point of view. It is essential for managers, academicians, scientists, students, and researchers in various government, public, and private sectors.**

Islamic Finance

The Regulatory Challenge

John Wiley & Sons

A Muslim's Guide To Investing & Personal Finance

Lightbulb Press, Inc.

New Issues in Islamic Finance and Economics

Progress and Challenges

John Wiley & Sons **New Issues in Islamic Finance & Economics: Progress and Challenges provides a review of the main issues and challenges facing Islamic finance. The application of Islamic finance is currently limited to banking. This book starts with an overview of the factors and motives**

behind the development of Islamic finance. A critical review of issues facing the industry is provided followed by a detailed analysis of areas where further attention is required. The book offers some original thinking on issues pertaining to governance, institutions, public finance and economic development within an Islamic financial system.

Islamic Finance and Circular Economy

Connecting Impact and Value Creation

[Springer Nature](#)

Islamic Financial Products

Principles, Instruments and Structures

[Springer](#) Islamic finance has grown exponentially since 1963 and has reached more than 70 countries around the world with the asset size of about \$2.5 trillion. The Islamic financial system today comprises a sizable asset base and there is evidence of sustained demand for Islamic financial products and services in the global market, with demand outstripping supply. This book provides a new source of understanding of the Islamic financial products in view of facilitating academia, industrialists, professionals, product designers, students and policymakers globally. There is a mass of literature on Islamic finance available to the market, but very little research is found in the form of book exclusively on Islamic financial products and their structures. Thus, this book is a timely contribution to the global market with Islamic financial product solutions.

Sukuk Securities

New Ways of Debt Contracting

[John Wiley & Sons](#) The essential guide to global sukuk markets worldwide **Sukuk Securities** provides complete information and guidance on the latest developments in the burgeoning sukuk securities markets. Written by leading Islamic finance experts, this essential guide offers insight into the

concepts, design features, contract structures, yields, and payoffs in all twelve global sukuk markets, providing Islamic finance professionals with an invaluable addition to their library. The first book to fully introduce the market, this book provides a detailed overview of the sukuk market, with practical guidance toward applying these instruments in real-world scenarios. Readers will learn how sukuk securities are regulated and the issues that arise from regulations, and gain insight into the foundation and principles of Islamic finance as applied to these instruments. Extensive tables illustrate t-test comparisons between conventional bonds and sukuk, risk factors, and the issuance of different types of sukuk securities by country to give readers a deeper understanding of the markets. In 2010, the World Bank recommended sukuk as the best form of lending for growth in developing countries; since then, the value of new issues has grown at 45 percent per year. The market's present size is close to US \$1,200 billion, with private markets in major financial centers like London, Zurich, and New York. This book provides comprehensive guidance toward understanding and using these instruments, and working within these markets. Get acquainted with the sukuk market, definitions, classification, and pricing Learn the different approaches to structuring and contract design Discover how sukuk is applied, including regulations, ratings, and securitization Examine payoff structures and suggested sukuk valuation in the context of Islamic finance principles With the sukuk market growing the way it is, regulators, investors, and students need to fully understand the mechanisms at work. Sukuk Securities is the complete guide to the sukuk markets, with expert insight. July 2014 saw the first sukuk listing in London. Hong Kong and Seoul have also entered this niche market. Predictions are that there will be continued high growth of sukuk debt markets around the world, all providing targeted funding via sukuk contracting modes.

Contemporary Issues in Islamic Law, Economics and Finance

A Multidisciplinary Approach

Taylor & Francis This book explores how Islam can impact the structures and performance of firms, financial institutions and capital markets across a range of countries and industries. The Islamic finance industry represents an important reality not only because of the oil wealth of the Gulf states, which have fueled demand for such financial services, but also for an increased demand from a growing Muslim population in the West that aspires to express a full and all-inclusive religious identity. The increased demand for Muslim financial institutions has prompted Western non-Islamic firms to begin providing these services in an interesting effort of

acculturation to the new plural scenario. By adopting a multidisciplinary approach, which also takes into account the theological, legal and geopolitical framework, the book offers a comprehensive picture of Islamic financial tools, contracts and business opportunities. Drawing on different fields of expertise, it deals with various themes, such as the theological roots of Islamic economics and finance and its geopolitical impact; the EU policy of cooperation with MENA and GCC countries; the instruments of Islamic finance, its legal principle and ability to become an instrument for enhancing business opportunities; the functioning of Islamic banks; the development of capital markets within a financial model influenced by religious constraints and, finally, the new relationships of this religious financial system with Western legal systems. The book thus provides a complete and extensive overview of the practice of Islamic finance through the lenses offered by studies of economics and management. Providing a careful analysis and an integrated framework of geo-economic and political issues, the book will be a valuable resource for academics, researchers and professionals in International Business, Entrepreneurship and Small Business Management, Law and Religion and Intercultural Studies.

Critical Issues and Challenges in Islamic Economics and Finance Development

[Springer](#) This book explores contemporary issues and trends facing Islamic banks, businesses and economies as presented at the International Conference of Islamic Economics, Banking and Finance. The authors leverage current empirical research and statistics to provide unique and fresh perspectives on the changing world of Islamic finance. They focus specifically on to the implementation of Islamic financial instruments and services in global capital markets and how their success can be evaluated. Chapters feature case studies from all over the world including examples from Afghanistan, Bosnia and Herzegovina and the United Kingdom, to name a few. The breadth and immediacy of the research presented by the authors will appeal to practitioners and scholars alike. The global outlook and rich data-based approach adopted in this book guarantee that it is a timely and valuable addition to the field of Islamic finance.

Economic Development and Islamic Finance

[World Bank Publications](#) Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully

exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

Energy and Finance

Sustainability in the Energy Industry

Springer This book analyses how socially responsible investments as well as the rising importance of Islamic finance are linked to the shift towards renewable energy. Academics and practitioners in the field take a global perspective and present case studies from several countries. The book is divided into three parts: The first part sheds new light on the energy shift towards renewable energy. The second shows the increasing interest of investors in sustainability, and the authors argue that investors not only look at expected returns and risks, but also at social returns. Finally, the third part explains the need for social returns in Islamic finance, which cannot be explained by traditional finance theory. This is the fifth volume in a series on energy organized by the Centre for Energy and Value Issues (CEVI).

The Report: Qatar 2009

Oxford Business Group

Handbook of Research on Climate Change and the Sustainable Financial Sector

IGI Global Climate change is a major problem, generating both risks and opportunities that will have a direct impact on the economy and the financial sector. In recent years, climate change has threatened both the survival of the financial system and economic development. The growing occurrence of extreme climate events combined with the imprudent nature of economic growth can cause unsustainable levels of harm to the financial sectors. On the other hand, it presents a range of new business challenges. In contrast to the most evident physical risks, companies are vulnerable to transformational risks that arise from the reaction of society to climate

change, such as technological change, regulation and markets that can boost the cost of doing business, threats to the profitability of existing goods, or effects on the value of the asset. Climate change also offers new business opportunities, and it has made research in the context of a sustainable financial sector indispensable. The Handbook of Research on Climate Change and the Sustainable Financial Sector focuses on the impacts of climate change on various sectors of the world economy. This book covers how businesses can improve their sustainability, the impact of climate change on the financial sector, and specifically, the impacts on financial services, supply chains, and the socio-economic status of the world. Beyond focusing on the impacts to the financial industry itself, this book assesses how climate change in the financial sector affects the well-being of society in areas such as unemployment, economic recessions, decreases in consumer purchases, and more. This book is essential for stockbrokers, business managers, directors, fund managers, financial analysts, consultants and actuaries, institutional investors, policymakers, practitioners, researchers, academicians, and students interested in a comprehensive view of the impact of climate change on the financial sector.

Islamic finance : a practical guide

This new second edition features fully updated, insightful chapters by leading practitioners in Islamic financing (including from Hogan Lovells, White & Case and Taylor Wessing), and analyses market trends, key developments and structures for sukuk, syndications, funds, takaful, project financing and Islamic liquidity management. New to the second edition are chapters on the regulation of Islamic finance and an overview of the sukuk market."

Raising Capital on Şukūk Markets Structural, Legal and Regulatory Issues

Springer Şukūk markets have grown significantly worldwide since their emergence— in Islamic jurisdictions as well as conventional jurisdictions including the US, the UK, Germany, China, France and Singapore. The practices of şukūk markets, however, have come under close scrutiny. The legal and regulatory risks arising from the existing general legal environment and their impact on those investing and trading in şukūk markets has not received adequate attention. The topic of şukūk has been subject to extensive research and academic discussion from different perspectives, but the existing literature has not adequately addressed the

issues associated with these markets. This book examines the contemporary issues encountered in the foundation and operation of *şukūk* markets by providing an in-depth discussion of the issues facing *şukūk* markets from legal and regulatory perspectives and focusing attention on how soundness can be ensured in the wider context. These issues go to the heart of what the *şukūk* market is really about, as recent debate has recognised in *şukūk* the replication of conventional bonds in ways that are considered unsatisfactory from an Islamic law point of view.

Term Structure of Profit Rates of Sukuk

MATLAB Stochastic Simulation

Cambridge Scholars Publishing This book explores several non-traditional and under-researched fields in Islamic finance through its investigations into how the newly-emergent financial instrument Sukuk behaves in the broader field of finite-period financing and pricing in the market place. It provides readers with didactic information on the fundamental theories of term structure and in-depth information on this nascent financial instrument in the Islamic capital market. The book employs one and two-factor models of term structure in order to analyse sovereign and corporate Sukuk bonds from the world's leading Islamic economy, Malaysia. For the purposes of the study, the book establishes "profit rate yield curves" in the tradition of the conventional bond yield curve in order to define different risk classes of Sukuk. The dynamics of term structure of profit rates are captured with the inclusion of volatility as a factor in one of the models. The book provides informative case studies for interested students and researchers in the field of financial economics and mathematical finance. It also provides examples that will serve to simplify future research in term structure analysis and reduce its computational inefficiency.

The Challenges and Prospects of Sukuk

A Content Analysis-Based Study

Cambridge Scholars Publishing Over recent decades, Sukuk (Islamic bonds) have emerged as one of the most important tools for Islamic investment and financing. They have become the most successful financial product in the Islamic financing industry, which has grown at a phenomenal pace over

the past decade. A key driver in this regard has been the development of the Islamic capital markets, which offer tremendous potential for sovereigns, financial institutions, firms, and investors alike. This book comes at a key juncture in the development of the Islamic capital markets, with the global pandemic crisis providing an opportunity for the different players in the Islamic capital markets to re-appraise successes and failures to date. More stringent Shariah oversight has also encouraged a recent critical re-evaluation of the structures used in the Islamic capital markets. This book provides a comprehensive overview of the Sukuk markets, tracking their development from the first Sukuk to the current outlook after the global pandemic crisis and the recent Shariah rulings for Islamic financial institutions in relation to Sukuk. It presents key insights for beginners, as well as more experienced practitioners, and will serve as a practical handbook for postgraduate research students, undergraduate students pursuing a degree in Islamic banking and finance, academics, researchers, and stakeholders in Islamic capital markets, among others.

Handbook of Research on Theory and Practice of Global Islamic Finance

IGI Global As an emerging global phenomenon, Islamic economics and the financial system has expanded exponentially in recent decades. Many components of the industry are still unknown, but hopefully, the lack of awareness will soon be stilled. The Handbook of Research on Theory and Practice of Global Islamic Finance provides emerging research on the latest global Islamic economic practices. The content within this publication examines risk management, economic justice, and stock market analysis. It is designed for financiers, banking professionals, economists, policymakers, researchers, academicians, and students interested in ideas centered on the development and practice of Islamic finance.

The Transformation of Islamic Law in Global Financial Markets

Cambridge University Press This contextual analysis of Islamic financial law challenges our understanding of both Islamic law and global financial markets.
