Yet while religious discourse buttressed such oppressive activities as slavery and the destruction of native populations, oppressed communities have also made use of religion to critique and challenge this abuse. As **Liberation Theologies in the United States** demonstrates, this critical use of religion has often taken the form of liberation theologies, which use primarily Christian principles to address questions of social justice, including racism, poverty, and other types of oppression. **Stacey M. Floyd-Thomas and Anthony B. Pinn** have brought together a stellar group of liberation theology scholars to provide a synthetic introduction to the historical development, context, theory, and goals of a range of U.S.-born liberation theologies. Chapters cover **Black Theology, Womanist Theology, Latino/Hispanic Theology, Latina Theology, Asian American Theology, Asian American Feminist Theology, Native American Theology, Native Feminist Theology, Gay and Lesbian Theology, and Feminist Theology.** **Contributors:** Grace Ji-Sun Kim, Mary McClintock Fulkerson, Nancy Pineda-Madrid, Robert Shore-Goss, Andrea Smith, Andrew Sung Park, George (Tink) Tinker, and Benjamin Valentin. **Deeper Shades of Purple** **Womanism in Religion and Society** NYU Press **Womanist** approaches to the study of religion and society have contributed much to our understanding of Black religious life, activism, and women's liberation. **Deeper Shades of Purple** explores the achievements of this movement over the past two decades and evaluates some of the leading voices and different perspectives within this burgeoning field. **Deeper Shades of Purple** brings together a who's who of scholars in the study of Black women and religion who view their scholarship

through a womanist critical lens. The contributors revisit Alice Walker's definition of womanism for its viability for the approaches to discourses in religion of Black women scholars. Whereas Walker has defined what it means to be womanist, these contributors define what it means to practice womanism, and illuminate how womanism has been used as a vantage point for the theoretical orientations and methodological approaches of Black women scholar-activists. The Social Construction of Technological Systems, anniversary edition New Directions in the Sociology and History of Technology MIT Press An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science, technology, and society. This pioneering book, first published in 1987, launched the new field of social studies of technology. It introduced a method of inquiry—social construction of technology, or SCOT—that became a key part of the wider discipline of science and technology studies. The book helped the MIT Press shape its STS list and inspired the Inside Technology series. The thirteen essays in the book tell stories about such varied technologies as thirteenth-century galleys, eighteenth-century cooking stoves, and twentieth-century missile systems. Taken together, they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical, social, economic, and political questions, and they demonstrate the illuminating effects of the integration of empirics and theory. The approaches in this volume—collectively called SCOT (after the volume's title) have since broadened their scope, and twenty-five years after the publication of this book, it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way.
